ARMOR COAT

SLATE OR CERAMIC SURFACED

ASPHALT ROOFING

**EXTRA HEAVY WEIGHT
EACH ROLL
WEIGHS 90 POUNDS**

\$2⁴⁰
Per Roll

- The Type of Asphalt Roofing Proved Superior to Others by the U. S Bureau of Standards Research Department.
- Furnished in Three Rich, Beautiful Non-Fading Colors.

When you buy Asphalt Roofing get the kind that Government tests show to be more durable, longer lasting! Get the extra years of service, the added protection against fire hazards, the enduring beauty that my Armor Coat Roofing offers! It's yours, *without* extra cost.

Armor Coat is the finest slate or Ceramic granule surfaced roofing I know of—it is extra heavy weight, at a price lower than many charge for the lighter weights. In fact, I believe there is no other roofing in America that can even come close to Armor Coat for Quality at my low prepaid price. I have sold hundreds of thousands of rolls, and it has always given satisfaction.

Thick Felt Base—Non-Fading Surface

The backbone of this roofing is a thick long-fiber rag felt base, which is thoroughly saturated with asphalt saturant. All surfaces are coated and sealed with asphalt, and bright, non-fading slate or Ceramic granules are imbedded in the weather exposed side; this surface will not wash off, will not discolor rain water, will not fade, and WILL increase the life of the roofing by many years, and protect it against sparks and flames.

Cuts Insurance Costs About 12%!

Armor Coat Roofing is listed as Standard by the Underwriters Laboratories, Inc., saving you about 12% in insurance in most localities, as compared to wood shingles. Best of all this Extra Heavy Roofing should give you 15 to 20 years satisfactory service—my customers have written to tell me of roofing which has been in service up to 25 years. They have told me of how this fire-resistant Armor Coat roofing has saved their buildings from burning, while buildings nearby have gone up in flames!

2-Inch Water-Tight Lap Joint

Each roll of Armor Coat Roofing is 36 inches wide, 36 feet long, and covers 100 square feet allowing for a two-inch water-tight lap. You have your choice of 3 New, Brilliant Non-fading Colors: **Red, Green, and Blue-Black.** These colors are NOT to be confused with the old, dull shades found in ordinary roofing . . . they are more beautiful and just as permanent, with no increase in price. Armor Coat is easy to apply and no experienced roofer is needed. Can be laid over old shingles or composition roofing, or on a new roof. $\frac{7}{8}$ -inch nails and cement furnished FREE with each roll. If $1\frac{1}{4}$ -inch nails are wanted for laying over shingles, please specify on order and add 10c per roll. Specify Color Wanted.

Cat. No. 3E7X—Per Roll. **\$2.40**

Freight Prepaid On Orders of \$10.00 or More

THE BROWN FENCE & WIRE CO. CLEVELAND, OHIO

IMPORTANT LETTER WRITTEN of Business Experience

SPECIAL NOTICE

The prices quoted in this Catalog are not to be construed as an offer to sell, but as an invitation to deal. Your orders will be offers to buy, which will be subject to our acceptance. If Price Schedule No. 49—Resale of Iron and Steel Products—is applicable to us and to the products which you contemplate purchasing, and if the prices herein referred to exceed the limitation prescribed by said order, we will refund as soon as the amount of the excess payment is determined, if any such is due you.

THE BROWN FENCE & WIRE CO.

conditions as they have been during the past six months, as they are today, and as they are likely to be during the balance of 1942. There is no need to review these conditions—every American knows about the shortages of steel, rubber, zinc, and other materials, about rising prices, about increased labor costs, about vastly increased taxes. Incidentally, we even had difficulty in obtaining the very paper on which this catalog is printed!

Despite these handicaps, here is your Jim Brown catalog. And, despite these handicaps, **YOU CAN SAFELY ORDER** from this catalog with the assurance that your order will be shipped, will be shipped promptly, and will be shipped at the prices quoted **UNLESS FUTURE CONDITIONS BEYOND OUR CONTROL PREVENT US FROM DOING SO.**

Under ordinary circumstances we prepare well in advance for our year's business. We purchase and contract for huge quantities of raw materials and manufactured products—and we make our prices and promises in the knowledge that we will have the goods when our customers send in their orders.

Under today's conditions we cannot obtain, **AT ANY PRICE**, the large stocks of some materials we would like to have. We cannot contract far in advance for additional supplies. Most manufacturers will not guarantee price or **DELIVERY** of materials. But I firmly believe we will be able to take care of our customers in a manner that will be **PERFECTLY SATISFACTORY TO THEM!**

The Government has granted a certain Priority on materials required for farm machinery and equipment, which includes fencing and most of the other products shown in this catalog. While the effectiveness of this priority depends on how much actual defense material is required, and upon the amount of machinery and equipment that will be required, I believe **ENOUGH OF EVERYTHING** will be available to supply the farmers of America with what they need, with reasonable promptness.

However—no one can fore-tell what conditions will be. For this reason I have found necessary to qualify my quotations in this catalog by saying: "Prices and Delivery Subject to Conditions Beyond my Control." But not let this stop you from sending me your orders. I want to assure you that as long as we possibly can we will **SHIP AT ONCE** and **AT PRICES QUOTED IN THIS CATALOG.**

If—and when—we must increase our prices we will **WRITE YOU PROMPTLY** explaining what we can or cannot do. If shipment is delayed, we will **WRITE** you and tell you as nearly as we can **WHEN** we expect to ship. We may have to **PAY** more and therefore have to **CHARGE** more for some things we have to replace. If so, we will **WRITE YOU AT ONCE** telling you what the difference in price is—or if the difference is small we will ship at once and depend on you to send us the small balance due us. If we ever find that we **CANNOT SHIP WITHIN A REASONABLE TIME**, we will not hold your order at all but will return your money at once with an explanation so that you may try to obtain the merchandise elsewhere, or order the best substitute we have.

Let me repeat: I **BELIEVE SINCERELY WE ARE IN AS GOOD POSITION, OR BETTER, AS ANYONE IN THE UNITED STATES TO FILL YOUR ORDERS PROMPTLY** and **AT THE PRICES QUOTED IN THIS CATALOG.** Any time we find we must change our prices or delivery schedule you can rest assured **NO ONE ELSE CAN DO BETTER!** So, do not hesitate to send me your orders. You will always get a square deal from me, as my customers can testify after half a century of dealing with me. **IN FACT YOU CAN TELL YOUR FRIENDS** to send me their orders—and if I can't take care of them I don't know who can!

In closing, I want to leave this thought with you. **DON'T WORRY ABOUT THE U.S.A.** We will be able to take care of ourselves—and of our enemies! We may suffer inconvenience—we may have to undergo a few "hardships"—but we will always be far better off than the people of any other nation, and we will be victorious in the end. Everyone of us must **HELP** instead of complaining. Everyone of us must prove ourselves **WORTHY** of living in this **LAND OF THE FREE** and by so doing **KEEP IT FREE.**

Sincerely yours,

Jim Brown

NOTICE: In some instances because of the Defense Program, it may be necessary for us to modify the specifications of certain products after our present supply is exhausted. We reserve the right to do this without notice, but we absolutely guarantee your satisfaction with everything you purchase from us.

THE MOST IMPORTANT LETTER I HAVE WRITTEN In My 53 Years Of Business Experience

Dear Friend:

This has been the most difficult catalog to prepare in all my 53 years of experience.

During the past half century I have gone thru wars, panics, floods, droughts, Republican administrations, Democratic administrations, foreign upheavals, domestic disturbances, depressions, booms, and everything else that could have affected my business.

But—never before have I been faced with conditions as they have been during the past six months, as they are today, and as they are likely to be during the balance of 1942. There is no need to review these conditions—every American knows about the shortages of steel, rubber, zinc, and other materials, about rising prices, about increased labor costs, about vastly increased taxes. Incidentally, we even had difficulty in obtaining the very paper on which this catalog is printed!

Despite these handicaps, here is your Jim Brown catalog. And, despite these handicaps, **YOU CAN SAFELY ORDER** from this catalog with the assurance that your order will be shipped, will be shipped promptly, and will be shipped at the prices quoted **UNLESS FUTURE CONDITIONS BEYOND OUR CONTROL PREVENT US FROM DOING SO.**

Under ordinary circumstances we prepare well in advance for our year's business. We purchase and contract for huge quantities of raw materials and manufactured products—and we make our prices and promises in the knowledge that we will have the goods when our customers send in their orders.

Under today's conditions we cannot obtain, **AT ANY PRICE**, the large stocks of some materials we would like to have. We cannot contract far in advance for additional supplies. Most manufacturers will not guarantee price or **DELIVERY** of materials. But I firmly believe we will be able to take care of our customers in a manner that will be **PERFECTLY SATISFACTORY TO THEM!**

The Government has granted a certain Priority on materials required for farm machinery and equipment, which includes fencing and most of the other products shown in this catalog. While the effectiveness of this priority depends on how much actual defense material is required, and upon the amount of machinery and equipment that will be required, I believe **ENOUGH OF EVERYTHING** will be available to supply the farmers of America with what they need, with reasonable promptness.

However—no one can fore-tell what conditions will be. For this reason I have found it necessary to qualify my quotations in this catalog by saying: "Prices and Delivery Subject to Conditions Beyond my Control." But do not let this stop you from sending me your orders. I want to assure you that as long as we possibly can we will **SHIP AT ONCE** and **AT THE PRICES QUOTED IN THIS CATALOG.**

If—and when—we must increase our prices we will **WRITE YOU PROMPTLY** explaining what we can or cannot do. If shipment is delayed, we will **WRITE** you and tell you as nearly as we can **WHEN** we expect to ship. We may have to **PAY** more and therefore have to **CHARGE** more for some things we have to replace. If so, we will **WRITE YOU AT ONCE** telling you what the difference in price is—or if the difference is small we will ship at once and depend on you to send us the small balance due us. If we ever find that we **CANNOT SHIP WITHIN A REASONABLE TIME**, we will not hold your order at all but will return your money at once with an explanation so that you may try to obtain the merchandise elsewhere, or order the best substitute we have.

We reserve the right to do this without notice, but we absolutely guarantee your satisfaction with everything you purchase from us.

IT'S EASY TO ORDER *from Jim Brown* BY MAIL

Give Complete Information

Write or print your name and address plainly, and if Shipping Point is different from Post Office address, be sure to fill in both squares on the order blank so we will know your Post Office address as well as the address to which your order is to be shipped. Be sure to give complete Catalog Number, Quantity, and Description of article, including SIZE and COLOR where necessary, and also the Price. All members of one household should order under one name.

How to Send Money

Do not send currency by mail unless it is registered. It is very easy to get a Post Office Money Order, Express Money Order, or a Bank Draft. If you have a checking account, send your Personal Check.

If You Want Shipment C.O.D.

If your order amounts to \$10.00 or more, and if you do not wish to send a remittance for the full amount with your order, we will ship C.O.D. provided you send us one-fourth ($\frac{1}{4}$) of the amount with your order. C.O.D. shipments by freight cannot be made to railroad stations where there is no regular Agent, or to a boat landing. In these cases be sure to send full amount with your order.

The Post Office charges you a fee for Parcel Post packages sent C.O.D. We recommend that you send remittance with your order to save time and money.

I Do Not Cut Rolls of Fencing

Lawn Fence, Chain Link Fence, Trellis, and Flower Bed Guard are sold by the foot, and you can order any number of feet you desire. Field Fences are made only in roll sizes shown in my catalog under each style number. I do not cut rolls of Field Fencing, Wood Picket Fencing, Poultry Netting, Wire Cloth or Screen Cloth. Order only in the roll sizes shown.

Freight and Postage Paid

Throughout this catalog you will find items indicated as being "Postpaid." If you do not find the item marked "Postpaid" it is one on which the postage would be so great that it is inadvisable to mail it, or one that cannot be mailed at all. On all items marked "Postpaid" we ship prepaid at the price quoted, but all such orders must amount to \$2.00 or more.

Items NOT marked "Postpaid" are shipped *Freight Prepaid* if your order for these items amounts to \$10.00 or more as explained throughout this catalog. Do not include any "Postpaid" items with a freight order to make up the total \$10.00, but make your freight order alone amount to at least \$10.00 and then you can include as much or as little "POSTPAID" merchandise as you wish. We will then include the postpaid items in your freight prepaid shipment, or mail them, at our option.

HOW TO RETURN PACKAGES TO US

If necessary to return mailable merchandise to us, such as shoes or clothing, please write us a letter explaining why you are returning the merchandise and what you want us to do—that is, whether you want us to exchange it for another size or style, or if you want your money refunded. Paste the letter on the outside of the package as shown in the illustration, placing a 3c stamp on the envelope, and regular Parcel Post postage on the package. Do not seal the package, and do not place your letter inside the package or you will have to pay first class postage on the entire package.

Be sure to put your return address on the package. If you live on a Rural Route and your package is subject to postage for 1 pound or more, deduct 3c from postage and mark the package "Mailed on Rural Route."

On Freight or Express shipments, always write us before returning goods. It may be advisable to return large items to other factories instead of having them come here.

In returning ANYTHING to us, please send us all papers pertaining to the sale. Tires must be returned to us "Prepaid."

YES—YOU CAN STILL BUY on EASY PAYMENT TERMS

BUY NOW—PAY LATER

If You Haven't the Ready Cash

Pay cash if you can, but don't hesitate to ask for credit if that will enable you to buy more of the things you need NOW at present low prices. If you are a responsible person with a regular income, I will be glad to open an account for you on my Easy Payment Terms.

Anything in this catalog may be bought on Easy Terms, and you can make up an Easy Payment Order for an amount as low as \$10.00.

The table at right shows how LITTLE it costs to buy on my Easy Terms—it shows how MUCH you can buy for a small payment each month. Write your order in the regular way, then add the carrying charge shown in the table opposite the amount of your order. Immediately at the right is shown the down payment to send with your order, and to the extreme right is shown the amount of your monthly payments.

SPECIAL NOTICE:

New Government Regulations provide that certain types of merchandise must be sold on specified minimum terms. For example, Stoves and Kitchen Ranges must be purchased with a minimum down payment of $\frac{1}{3}$ or 20% of the purchase price. For any other merchandise, make out your Time Payment order in the regular way, as at the right, and if terms of payment do not conform to Government Regulations, we will notify you at once.

IMPORTANT: It takes a few days to establish any Easy Term Account. Be sure to answer all the questions and sign the Time Payment Agreement which is printed on Page 131 on back of Order Blank. This will enable us to handle your account with greatest possible speed.

QUALITY FIRST!

Jim Brown's

53-YEAR-OLD POLICY WILL BE CONTINUED!

WHEN I started in business more than 50 years ago it was with one main purpose in mind—to sell **QUALITY FENCE** Direct from Factory to Farm, and to pass on to my customers the big saving that direct-from-factory prices made possible. I determined that I would sell *only* quality merchandise, and would back it with my unqualified guarantee of complete satisfaction. I have maintained my Policy throughout more than half a century in business.

When I started I had no customers at all, and now I have more than 1,500,000 customers. My business has grown to be the largest of its kind in the world, and I believe this is proof that my policy of *Quality and Low Price* was sound. There have been plenty of changes in the last 53 years—I have been through panics, depressions, good times, bad times, and even a couple of wars . . . but I see no reason to change my policy of doing business now! I believe that **QUALITY** is now needed more than ever, and

I am going to maintain the **QUALITY** of my Fencing and of every product I sell! I am going to continue my Guarantee of Complete Satisfaction, and I am going to continue to sell at the lowest prices consistent with high quality.

I believe American Farmers are entitled to the finest their money can buy, and I will continue to offer it to them in **EVERYTHING** shown in my catalog. Whatever the future may bring I pledge myself to give my customers the best quality obtainable . . . at the lowest prices I can offer! I think my prices in this catalog are proof of my sincerity.

Because of scarcities and governmental restrictions it may be necessary for me to modify or change some of the specifications in this catalog. These changes will be so small as to make no material difference in the life or usefulness of the item affected. In every instance I guarantee your entire satisfaction. Read my Guarantee below.

»» MY GUARANTEE ««

I guarantee that you will save money every time you send me an order. I guarantee that you will receive the satisfaction and service you have a right to expect from everything you buy from me. If for any reason you are disappointed with any purchase you make, just write and tell me the facts. I will then give you shipping instructions for return of the unsatisfactory article, at my expense, and I will exchange it or refund the purchase price you paid, whichever you prefer. My business was founded, and has grown, on the principle that a satisfied customer is my greatest asset. You are always sure of getting a bargain, and complete satisfaction, when you send your orders to me.

Jim Brown Chairman,
The Brown Fence & Wire Co.

PRINTED IN U. S. A.

2

NOW IS THE TIME TO BUY YOUR FENCING DIRECT FROM *Jim Brown's* FACTORY!

EVERYONE wants to save money, and the best way to save money on fencing is to send me your order for the fencing you need NOW. In times of emergency old friends are best friends, and I am going to take care of my customers as long as there is a roll of fencing left in my warehouses, and as long as I can get steel to manufacture more!

At present I have generous stocks of practically all styles of farm fencing. Every rod of this fence is made in the time-tested Jim Brown way, of COPPER-STEEL with HI-TEST PURE ZINC GALVANIZING. This is the kind of fencing that has proved to be finest quality, the kind that outlasts some other fence as much as 3-to-1! I intend to *continue* to make all my fencing this better way, but should Government restrictions make it impossible for me to conform to specifications shown in this catalog, I reserve the right to ship the nearest thing permitted.

FREIGHT AND POSTAGE PAID

When you compare the prices shown in my catalog with those in other catalogs, always remember that prices are freight prepaid on orders amounting to \$10.00 or more, unless otherwise stated.

This means that if you see a lower price than mine quoted in any other catalog, you must add freight to the other fellow's price, from shipping point to your freight station unless the price quoted is clearly marked "Freight Prepaid." That is the only way to get an exact comparison of the delivered price from both of us.

On Parcel Post items I pay the postage if your order amounts to \$2.00 or more. Parcel Post items throughout the book are marked "Postpaid." If you wish to add Parcel Post items to any freight order of \$10.00 or more, you can do so even if the postpaid items amount to less than \$2.00.

Because I sell direct from my own factories I can give you the lowest possible prices for Quality fencing, and I also offer you the largest selection. You'll find more styles of fencing in this Bargain Catalog than anywhere else in America, and buying from Jim Brown by mail is the easiest, most satisfactory way to buy that you ever heard of. You can shop right in your easy chair, select *exactly* the style of fencing which meets your requirements best . . . then just write your order and drop it in the mail box. It's like having Jim Brown in your own town!

Order NOW to protect yourself against scarcity and higher prices which may come later! Pay cash if you can, because that's the most economical way to buy. But if you don't have the cash NOW to fill all your needs, take advantage of my Easy Terms, which make it possible for you to get what you need at today's prices by paying a little down and a little each month. See page 2.

SATISFACTION GUARANTEED

This company has built its business on the policy that no transaction is complete unless you are satisfied, and everything in this catalog is backed by this guarantee which has not been broken in more than 50 years.

More than 1,500,000 customers know that they can depend on Jim Brown for *High Quality, Prompt Shipments, and Low Prices*. They know that if they are not thoroughly satisfied with any purchase they make, they can write us and a prompt adjustment will be made or their money will be refunded. This business was founded, and has grown on the principle that a satisfied customer is its greatest asset. You are always sure of getting a bargain and complete satisfaction when you send your orders to Jim Brown!

SAVE MONEY ON OTHER FARM SUPPLIES

Don't miss a single page in this Bargain Catalog! It shows my complete line of Fencing, Steel Posts, Barb Wire and Steel Gates. It also lists hundreds of other bargains. If you need Stoves or Ranges, Asphalt or Metal Roofing, Bee Supplies, Mineral Feeds, Cow Stalls, Stanchions, Nursery Stock, Tires, Paints, Work Clothing, Shoes, or practically any other farm or home needs you can save money by buying from this Bargain Book at my freight prepaid prices. Prices and Deliveries Are Subject to Conditions Beyond Our Control.

Yes Sir! The Same Good Old Fashioned GALVANIZED BARB WIRE

Jim Brown Takes Care
of His Customers!

Steel and zinc are getting scarce—but you can still get first-quality wire from Jim Brown. This is the same High-Quality, Heavily Galvanized, Sharp-Pointed Barb Wire that has become famous for long life and good service over the last half century. Some of my Barb Wire has been up for 25 years!

Jim Brown's Galvanized Barb Wire is made of Open Hearth Steel heavily galvanized with Hi-Test Pure Zinc to insure long life. Wires are twisted evenly and the barbs are firmly wound, evenly spaced and sharp-pointed. Every foot of this wire is made in America in the good old-fashioned way; it comes to you bright and new and it outlasts any barb wire I have ever seen. At my present prices you can still make a worthwhile saving!

FREIGHT IS PREPAID ON ORDERS OF \$10.00 OR MORE.

7 BAR-26 INCH HOG and SHEEP FENCE

HINGE JOINT (Wrapped Stay) STYLE

Stay Wires 12 Inches or 6 Inches Apart

These six Hinge Joint Fences are all 26 inches high, and horizontal or line wires are close spaced, hog-tight as shown in the illustration below. You have your choice of 3 weights to choose from, either Junior Weight, Standard Weight, or Heavy Weight. All of these fences can be had with upright or stay wires spaced either 12 inches apart or 6 inches apart to fit your requirements. Check the specifications shown in the table below—then decide which of these fences most exactly meets your needs.

All of these fences are economical to buy and because of their long life, cost very little per year of service. They are excellent for hogging down corn and for rotation of pasture because they can be quickly taken down and moved. By adding strands of barb wire at the top you can use them for general purpose fencing.

Finest construction, like all of my fencing. All wires are made of Copper-Steel and are further protected from rust by Hi-Test Pure Zinc Galvanizing. Take advantage of my Factory-to-You Prices. Remember I pay the freight on orders of \$10.00 or more—an additional saving!

Made of Copper Steel Wire—With Hi-Test Pure Zinc Galvanizing

7 BAR-26 INCH HOG and SHEEP FENCE

RING KNOT (Stiff Stay) STYLE Just Add Barb to Make Fences Higher

Here are 6 low-cost hog-tight fences, each 26 inches high, made in famous Jim Brown Ring-Knot Stiff Stay style. In this style of fencing the upright stay wire runs in one continuous piece from the bottom wire clear to the top wire of the fence. Because of this construction, Stiff Stay fence is especially rigid and hard to ride down when tightly stretched—hard to root up from the bottom!

Furnished in Junior, Standard, and Heavy Weight with stay wires spaced either 12 inches apart or 6 inches apart. Specifications and wire sizes are given in the table below—decide the weight of wire you want, and whether you want the 6 or 12 inch stay wire spacing. Any one of these fences will give excellent service. They are all made from Copper-Steel Wire with Hi-Test Pure Zinc Galvanizing, and experience shows that this kind of fencing outlasts ordinary fencing by **MANY YEARS**. This insures you lower price per year of service, and my Factory Prices keep the first cost low. I know of no better fencing values in all America! Prices shown are Freight Prepaid on all orders of \$10.00 or more.

8 BAR-32 INCH HOG and SHEEP FENCE

HINGE JOINT (Wrapped Stay) STYLE

First Choice of Hog and Sheep Raisers

Thousands of my customers call this the perfect fence for holding hogs and sheep. It is made in popular Hinge Joint style. Many persons prefer this style because it does not require as tight stretching—each stay wire has a hinge joint that can be brought back into place readily when pressed down from the top or rooted up from the bottom. Easy to erect, because the hinge joint allows the fencing to follow the ground contour perfectly, even over very rolling, hilly fields.

It is easy to make this a horse-high fence, simply by stretching two or three strands of barb wire across the top. Made in three weights, with stay wires spaced either 12 inches or 6 inches apart. Buy the heaviest fence you can afford because heavy fences last much longer and so cost less per year of service. *Easy Terms* are available—see Page 2.

All of these fences are made from Copper-Steel Wire with Hi-Test Pure Zinc Galvanizing; this is the kind of fencing that outlasts ordinary fence . . . sometimes as much as 2 to 1! My Factory-to-You prices save you money and remember I pay the freight on orders of \$10.00 or more.

8 BAR-32 INCH HOG and SHEEP FENCE

RING KNOT (Stiff Stay) STYLE Factory-to-You Prepaid Prices

The 6 fences shown on this page are just as popular with hog and sheep raisers as those on the facing page. These fences, however, are made in Ring Knot style with Stiff Stay Wires. This style of fence is exceptionally rigid because stay wires are all one-piece from bottom wire to top wire. Ring Knot fence is hard for hogs to root up, hard for horses and cattle to ride down! The Ring Knot holds the one-piece stay wires securely in place, absolutely prevents slipping.

Fences here are furnished in 3 weights and with line wires spaced either 12 inches or 6 inches apart. I always recommend the heavier weights for longer life, but even my lighter weight fencing gives wonderful service for the price. All Jim Brown Fencing is made from finest Copper-Steel Wire with Hi-Test Pure Zinc Galvanizing. Any of the fences shown here will make good general purpose stock or pasture fences if you stretch two or three strands of barb wire across the top. When ordering fence don't forget to order Steel Posts . . . you will find a complete selection at money-saving factory prices on pages 34 to 37. All my prices are Freight Prepaid on Orders of \$10.00 or More. Easy Terms, see Page 2.

HOGS CAN'T ROOT THIS FENCE UP!

My hinge-joint or wrapped stay fence, with a barb bottom, is the best fence I know of to prevent rooting. The breaking strain is equal to or greater than, any other fence of similar specifications and the ability of this fence to maintain itself in a straight and trim line is truly remarkable.

Made of Copper Steel Wire with Hi-Test Pure Zinc Galvanizing it has the same extraordinary rust resisting qualities as all my other fences. It is offered to you with your choice of 3 heights and weights, from which you can readily make a selection to take care of your requirements economically. My Direct-from-Factory prices make sure of that!

LOOK AT MY PRICES

It is easy to see why my customers keep coming back year after year to buy my fence and other products. I have been increasing my business constantly for a period of over 50 years by working on the principle that direct-from-factory prices are unbeatable! Years ago I knew that quality merchandise, furnished at a low, reasonable price, would be eagerly sought by intelligent, thrifty people, and today it is still true! Look at my fence, then compare my low prices with others of the same specifications. You will quickly be convinced of the fact that you save money by buying from Jim Brown!

Copper-Steel Wire with Hi-Test Pure Zinc Galvanizing

9 BAR-39 INCH SHEEP and STOCK FENCE

HINGED JOINT (Wrapped Stay) STYLE

Hog-Tight and High Enough for Cattle

Here you've your choice of 6 Hinge Joint Sheep and Stock fences, all of which will give wonderful service. They are made in Junior Weight, Standard Weight, and Heavy Weight with stay wires spaced either 12 inches or 6 inches apart as listed below. Anyone of these fences may exactly fit your needs for horses, cattle, hogs, or sheep because they are built high enough to serve as general purpose fences.

Almost everyday I get letters from old customers who tell me of Jim Brown fence which has been in service 15, 20, sometimes as much as 30 years. The reason that my fencing gives such amazingly long service is that it is made from Copper-Steel Wire with a heavy coating of Pure Zinc Galvanizing to protect it from rust and corrosion. Tests have proved that fencing made this way ALWAYS outlasts fence made from ordinary steel wire. Why ever accept fence of unproved quality when you can buy Copper-Steel fencing direct from my factory at my low prices!

For all Steel Farm Gates see pages 26 and 27.

Don't forget Jim Brown pays the freight on orders of \$10.00 or more. This means an extra saving for you.

9 BAR-39 INCH SHEEP and STOCK FENCE

RING-KNOT (Stiff Stay) STYLE Built to Give You Many Years of Service

Like the fence on the facing page, the 6 fences shown here are high enough and close spaced enough to serve a variety of purposes. All are built in the Ring Knot Style which makes an exceptionally rigid fence, one hard to root up or to "ride down." They are close spaced enough for hogs, heavy enough for cattle and horses, ideal for sheep, and make fine pasture fences by stretching a strand or two of barb wire across the top.

Made in 3 weights, but instead of furnishing this fence in the Junior Weight (like the Hinge Joint Fence on facing page) I list an extra heavy weight for "Heavy-Duty" fencing jobs. Made from fine quality Copper-Steel Wire coated with Hi-Test Pure Zinc Galvanizing, like all Jim Brown fence. Guaranteed to give excellent service, and I have never gone back on my guarantee in over 50 years in the fence business.

Don't put off fencing just because you are short of money right now! Fence is a permanent farm improvement and may be bought on easy monthly payment terms; for complete details see page 2.

COPPER-STEEL WIRE WITH HI-TEST PURE ZINC GALVANIZING

THE BROWN FENCE & WIRE CO., CLEVELAND, OHIO.—MEMPHIS, TENN., Address Nearest Office

6-BAR 36 INCH STIFF STAY SHEEP and CATTLE FENCES

PRICED TO SAVE YOU MONEY

All of these Stiff Stay Ring Knot fences are 36 inches high, and the spacing between the line, or horizontal wires, is the same on each as shown by the figures in the fence. All are made from my famous Copper-Steel Wire with Hi-Test Pure Zinc Galvanizing.

The sizes of wire and the distance between stay wires are different, for different purposes. Read the specifications carefully and order the fence that meets your needs. My Direct-From-Factory prices will save you money! See Page 2 for Easy Terms.

Freight Paid on Orders of \$10.00 or More.

6-BAR 36 INCH HINGE JOINT SHEEP and CATTLE FENCES

2 POPULAR HINGE JOINT FENCES

These 36-inch Hinge Joint Fences are exactly the same except for the size of the wire used. They have line wires spaced as shown by the figures in the fence, and have upright wires spaced 12 inches apart. However, one of these fences is made in Standard Weight, and the other is made in Heavy Weight. Either can be used as general purpose stock fence by stretching barb wire over the top. Both are made from Copper-Steel Wire with Hi-Test Pure Zinc Galvanizing to give you years of longer service. Order NOW to take advantage of present prices. See Page 2 for Easy Terms.

Freight Paid on Orders of \$10.00 or More.

All Brown Fence Is Hi-Test Galvanized with Pure Zinc

8 BAR 45 INCH CATTLE and FIELD FENCES

Stiff-Stay and Hinge Joint Styles — Direct-From-Factory Values

You get Bigger Values when you buy fence from me, because I make my own fence and ship it direct to you from my factories! The fences shown below are good examples of how I can save you money on stock fence.

The Stiff Stay Fence shown below is made in Extra Heavy Weight only. It will give you many extra years service because of its extra heavy construction.

My Hinge Joint Cattle and Field Fences at the bottom of the page are made in both Standard and Heavy Weights. They have Stay Wires spaced 12 inches apart, make good cattle and sheep fences and can be used as general purpose stock fences by stretching a few strands of barb wire on top. All of my fences are made from Copper-Steel Wire, with Hi-Test Pure Zinc Galvanizing.

RING KNOT STYLE
Extra Heavy Weight

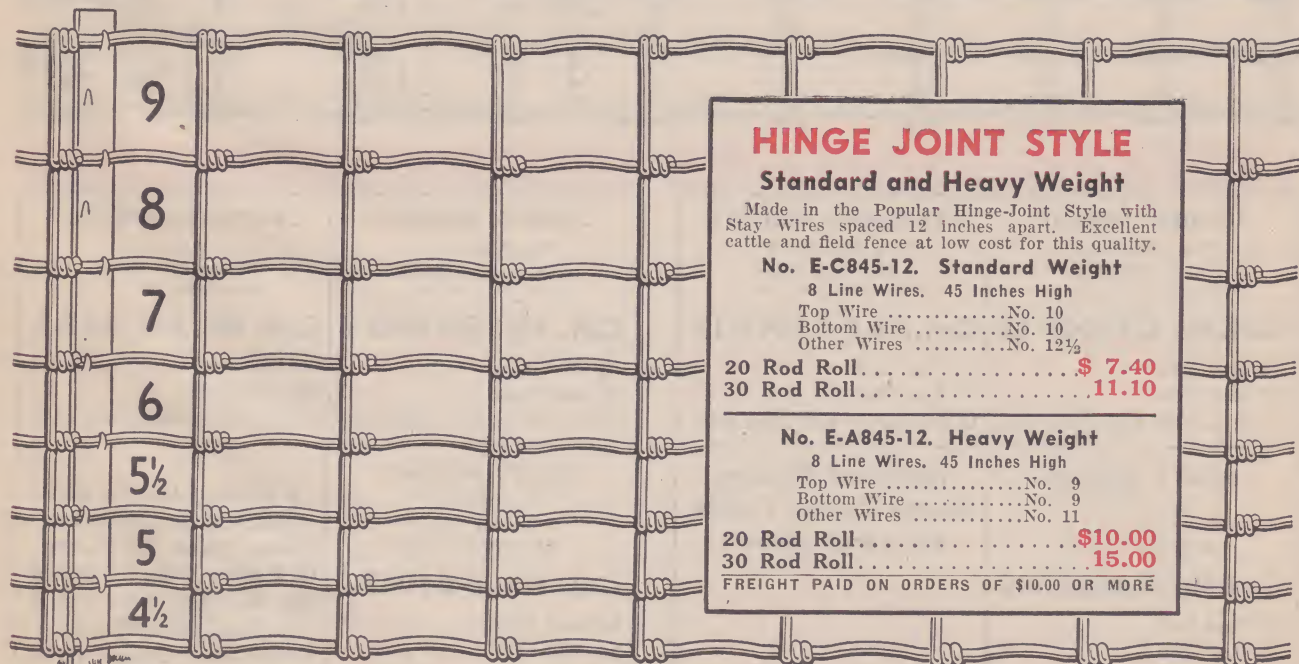

This 8-Bar 45-Inch Cattle and Field Fence is made in Stiff-Stay style with the famous Non-Slip Ring Knot. Extra Heavy wires throughout, for extra years of service. Stay wires spaced 14 to the rod.

10 BAR-47 INCH ALL PURPOSE FARM FENCE

**HINGE JOINT (Wrapped Stay) STYLE
Low Prices—Six Popular Styles**

These 47-inch height fences are most popular of all for general purpose stock and pasture use. They are high enough and strong enough for cattle and horses, tight enough for hogs, and in fact, will fit practically every need. So if you need a husky, durable multiple-duty fence for long economical service, you may find exactly what you want here, at unusually low prices.

The Hinge Joint 47-inch height fences shown on this page are made in Junior Weight, Standard Weight, and Heavy Weight; and you have your choice of line wires spaced either 12 inches or 6 inches apart. Any of these fences is sure to give you satisfactory service, because they are built from Copper-Steel Wire protected by my famous Hi-Test Pure Zinc Galvanizing.

You may be surprised that my prices are still so low, but I sell fencing direct from my own factories and you get the benefit of the saving. Remember too, my prices are Freight Prepaid on Orders of \$10.00 or More. There is no guessing about freight charges when you buy from Jim Brown . . . because there are no freight bills to pay!

SPACING

10 BAR-47 INCH ALL PURPOSE FARM FENCE

RING-KNOT (Stiff Stay) STYLE
Fits Practically Every Fencing Need!

All of the six Ring-Knot fences on this page have 10 line wires, spaced 3 inches apart at the bottom and widening to 8 inches apart at the top. Stay wires are spaced either 12 inches apart or 6 inches apart, depending on which style you select. They are furnished in 3 weights, Standard Weight, Heavy Weight, and Extra Heavy Weight. More farmers use the styles of fence shown here than any other kind of fencing I know of, because this is the type of construction which fills practically all fencing needs.

I always advise you to purchase the heaviest weight fencing you can afford, and my Easy Payment Terms shown on page 2 make it easy for you to buy the best. Heavy weight fences are cheapest per year of service!

All of these fences are made of Copper-Steel Wire with Hi-Test Pure Zinc Galvanizing and are sold direct from factory-to-you to give you rock-bottom cost! Freight is Prepaid On Orders Of \$10.00 or More. I have been in the fencing business for more than 50 years, and I do not believe it is possible for you to duplicate the values that my factory-to-you method of business makes possible.

Made of Copper Steel Wire — With Hi-Test Pure Zinc Galvanizing

THREE HEAVY DUTY STOCK FENCES

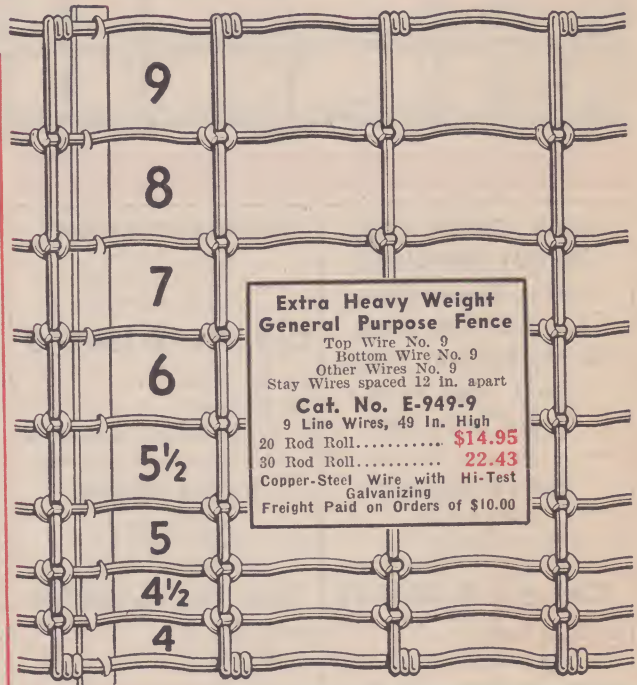

Famous Jim Brown Quality — Direct-from-Factory Prices!

A well fenced farm helps you with your farm work, enables you to rotate your crops and pasture your stock to the best advantage. Fencing is a *Permanent* improvement which will pay you good dividends for many years, so when you build fence lines it is best to use the heaviest gauge fence your money will buy. I can help you do this and save you money because my Direct-From-Factory prices enable you to buy heavier weight fencing *without* extra cost. Many Jim Brown Heavy Duty fences are still standing and giving good service 25 and 30 years after erection!

The three fences on this page are all Heavy Duty, built from Jim Brown's famous Copper-Steel Wire, heavily coated with Hi-Test Pure Zinc Galvanizing to insure extra years of service. My General Purpose fence immediately below can be used for hogs, cattle, or horses—in fact, practically all kinds of livestock. The 42-inch high fence at the lower left is an Extra Heavy cattle or corral fence. The fence at the lower right is a good General Purpose stock and pasture fence. When you buy fencing from Jim Brown you make an EXTRA saving because my prices are Freight Prepaid on orders of \$10 or more.

BUY FENCING NOW—EASY PAYMENT TERMS, SEE PAGE 2

FREIGHT PAID ON ORDERS OF \$10.00 OR MORE

Jim Brown's

TRIPLE DUTY FENCES

HORSE HIGH—BULL STRONG—HOG TIGHT!

Greatest All Purpose Fences Ever Built!

Here is my greatest all-purpose fence! It is made in the popular Hinge-Joint style, with upright stay wires spaced 6 inches apart in the lower portion. This gives you an ideal fence for hogs, sheep, cattle and horses. If you place a strand or two of barb wire above this fence, you will have an extra high horse-proof, hog-proof and cattle-proof fence that will prove its merits and save you money for many years.

Barb Wire or Plain Wire Bottom

You will notice that this fencing can be supplied with barb wire bottom or with plain wire bottom. The barb bottom fences have a 2-point barb wire woven into them as a bottom line wire, with barbs spaced 3 inches apart. This prevents hogs from rooting under the fence. The fence with the plain wire bottom has a smooth wire the same gauge or size in the bottom as used for the top of the fence.

Made in the famous Jim Brown way, with high grade COPPER-STEEL WIRE, protected with a heavy coat of HI-TEST PURE ZINC GALVANIZING. Take advantage of Present Prices—ORDER NOW! Prices and Deliveries are subject to conditions beyond our control; see Page 1.

BARB TOP HORSE and CATTLE FENCE

Jim Brown's Sensational New Fence That Stock Will Not Ride Down!

My new Barb Top Cattle Fence fills the need for a low-priced Medium Weight Fence that stock cannot ride down. It is made Stiff Stay style, 55 inches high.

Has a husky strand of 2-point 14-gauge Barb Wire woven right into the top of the fence, and because of this holds cattle better than some fencing in heavier weights. Made of my Copper-Steel Wire, Heavily Galvanized. In 20 and 30 Rod Rolls.

Four SPECIAL PURPOSE FENCES

There isn't anything "just as good" as fencing that has been built to fill special needs of stock raisers! That is why I show more styles of fencing in my catalog than you can find anywhere else in America. I've come to know what fencing farmers need, because I've been selling them fencing for 52 years.

41-IN. SHEEP and GOAT FENCE

I've shipped carload after carload of this close spaced fence to Texas because it's the most economical fence of its kind. They use it down there for fencing those beautiful goats they raise, and for sheep ranches, but it's just as practical for use wherever a Junior Weight, close spaced, high fence is called for. It's an excellent combination fence for cattle and hogs. Like all Jim Brown fences, it's made of Copper-Steel Wire, with Hi-Test Pure Zinc Galvanizing, Ring-Knot style. At my Direct-From-Factory price this fence is a tremendous bargain!

Below are shown four of my most popular "Special Purpose" fences. All of them are made in my non-slip Ring-Knot (Stiff Stay) style, woven from Hi-Test Zinc Galvanized Copper-Steel Wire; guaranteed for long satisfactory service! All prices and deliveries are subject to conditions beyond our control—See Page 1.

48 INCH ECONOMY FENCE

Here's another mighty good fence for the man who specializes in raising sheep and goats. Notice especially the height and the extra close spacing of the line wires. These features keep the animals from getting their horns entangled and protects them against dogs, coyotes, etc. The upright stay wires are spaced 12 inches apart. This fence is easily erected and will give excellent service when stretched tightly. Also suitable for a combination fence for cattle and heavy poultry. Ring-Knot style, made of Copper-Steel Wire, galvanized with Hi-Test Pure Zinc.

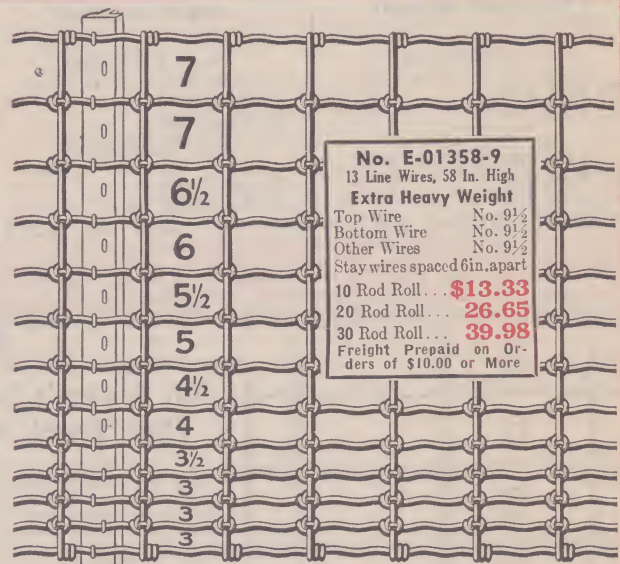

SEE PAGES 35 and 36 FOR STEEL POSTS

No. E-01451
14 Line Wires, 51 In. High
Medium Weight
Top Wire No. 10
Bottom Wire No. 10

DOG, WOLF and COYOTE FENCE

Here is a high Ring-Knot style fence, with the line wires spaced only 3 in. and 3 1/2 in. at the bottom and only 4 in., 4 1/2 in. and 5 1/2 in. at the top. The upright or stay wires are spaced only 6 in. apart. So you see why this fence keeps dogs, wolves, coyotes and even smaller animals out! Heavy enough for the purpose, yet not so heavy as to make it expensive. This fence can be used as a barnyard or boundary fence, as an orchard fence or as a combination stock and poultry fence. Made of Copper-Steel Wire with Hi-Test Pure Zinc Galvanizing.

No. E-01358-9
13 Line Wires, 58 In. High
Extra Heavy Weight

BULL STRONG CORRAL FENCE

Special for Lanes, Bull Pens, Paddocks and ideal wherever a high, heavy, close spaced fence is needed—almost like a 58-inch high steel wall! It is made of ALL NO. 9 1/2 GAUGE WIRE with the bottom openings only 3 in. high by 6 in. wide, and the top openings only 7 in. high by 6 in. wide. Look at the spacing of horizontal or line wires as shown above. The upright or stay wires are spaced only 6 in. apart. Ring-Knot style—should last 15 to 25 years under normal conditions! Made of Copper-Steel Wire with Hi-Test Pure Zinc Galvanizing.

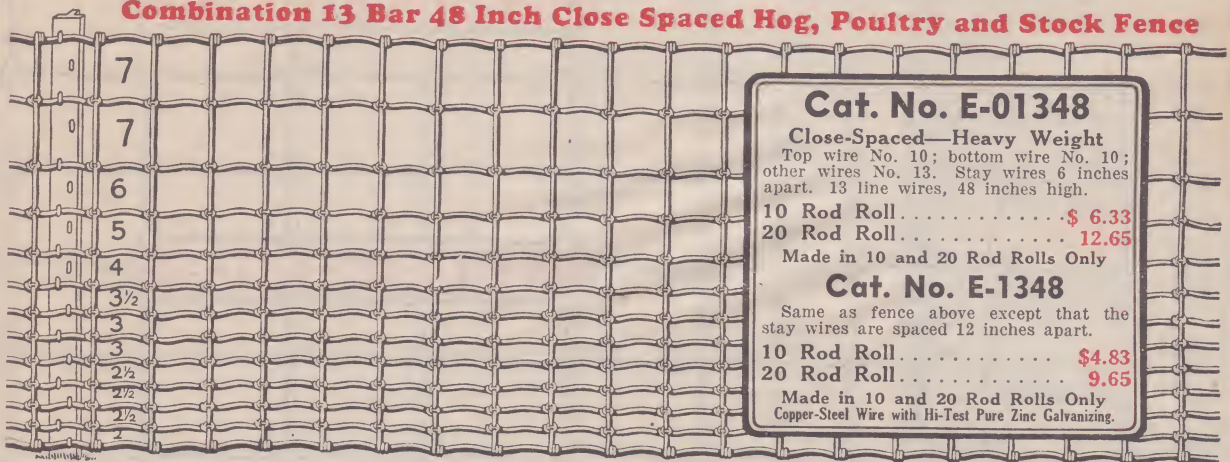

Made of Copper Steel Wire — With Hi-Test Pure Zinc Galvanizing

POULTRY TIGHT STOCK FENCES

These four heavyweight fences really do double duty! They have close-spaced bottom wires and are excellent poultry fences as well as heavy-duty general-purpose stock fences. All are made from Copper-Steel Wire with Hi-Test Pure Zinc Galvanizing.

Built in the famous Jim Brown non-slip Ring-Knot Stiff Stay style, with stays spaced only 6 inches apart in three of the fences, 12 inches apart in the other. Can be used for almost any farm fencing job; especially recommended for hogs and poultry.

THE BROWN FENCE & WIRE CO., CLEVELAND, OHIO. — MEMPHIS, TENN., Address Nearest Office

A detailed illustration of a tall, cylindrical woven basket or drum. The structure is composed of numerous vertical bands, each featuring a series of horizontal lines or ridges. These bands are interconnected by a grid-like pattern of small, dark, cross-shaped joints. The overall appearance is that of a tightly woven, segmented cylinder. The top of the cylinder is capped with a red background, and the bottom tapers slightly. The illustration is rendered in a style reminiscent of traditional woodblock prints or woven textile patterns.

20 BAR - 48 INCH

When you build poultry fences do the job right! Select the height, weight and style you need with care, then be sure to set the posts solidly and stretch the fence tightly. Of course you'll want the best possible fencing for your job. One of my Copper-Steel Hi-Test galvanized Poultry Fences will give unbelievably long service when properly erected.

THE BROWN FENCE & WIRE CO., CLEVELAND, OHIO.—MEMPHIS, TENN., Address Nearest Office

FENCE 48 TO 72 INCHES HIGH

RING KNOT STYLE—CLOSE SPACED STAYS

ALL fencing I make, even in light weight, is made from steel containing Copper, to keep rust from starting *under* the galvanizing; it is coated with Hi-Test Pure Zinc Galvanizing on the outside to fight the rust and corrosion that attacks bare steel. This DOUBLE protection adds YEARS to the life of fencing!

While you're building poultry fence, use the best that your money can buy! The best is always the cheapest in the long run.

All of the 11 poultry fences listed below are tight, strong and durable! They are made in different heights and different weights to suit your needs, but all have bottom wires spaced only 1 inch apart, and all are made in the famous Ring-Knot Stiff Stay style.

All of these fences have close spaced stay wires, but for those who want an absolutely chick-tight fence I list two EXTRA close-spaced fences, with stays only 3 inches apart.

Finest Quality! Direct-from-Factory Prices!

High-Quality in fencing assures long life, and long life means lower cost per year of service. Make SURE of High-Quality in Poultry Fencing you buy!

Jim Brown's Fencing saves you about HALF your fencing expense. My Direct-From-Factory prices enable you to buy this BETTER fencing for less than retail stores ask for ordinary quality. And I Pay Freight on Orders of \$10.00 or More.

Jim Brown offers you a wider selection of styles, as well as better quality and lower prices! On these two pages are shown 10 different heights and styles of my Galvanized Poultry fence. ALL of these fences are made of Heavy Weight Wire, the strongest you'll ever need for poultry.

The 6 fences on the opposite page are in heights up to 60 inches, for heavier breeds. Fences shown below are for Leghorns and other light breeds which are high flyers. Be sure to include your order for Poultry Gates and Steel Posts with your fencing order. Gates are shown below; See pages 34 to 37 for posts.

FOUR-HIGH HEAVY WEIGHT POULTRY FENCES

17 BAR - 60 INCH

15 BAR - 48 INCH

High and CloseSpaced!

These fences will fill the need on many poultry fencing jobs, and their low cost is proof that your money goes farther when you buy from Jim Brown! Both are STIFF STAY style with the famous, non-slip Brown Ring-Knot. Made of Copper-Steel Wire which is protected with Hi-Test Pure Zinc Galvanizing.

AUTOMATIC SELF-RAISING GATES

My Self-Raising Gates come to you in the raised position. When in closed position gate is perfectly level. This gate raises itself automatically, about a foot and a half off the ground when the latch is released. It swings freely above snow, stones, hummocks and uneven ground. You can let small stock go through while keeping larger stock on side you want them. Top and bottom of frame of high carbon steel tubing, 1½ inches in diameter. Ends are 2x2x½ "U" Bars. Wire is all big, extra heavy No. 9½, galvanized. Cross wires only six inches apart. 14 and 16 ft. Gates have two upright braces. Smaller size, one upright brace. Add 65c if steel post fittings are required and specify size and shape of posts.

NOTE:

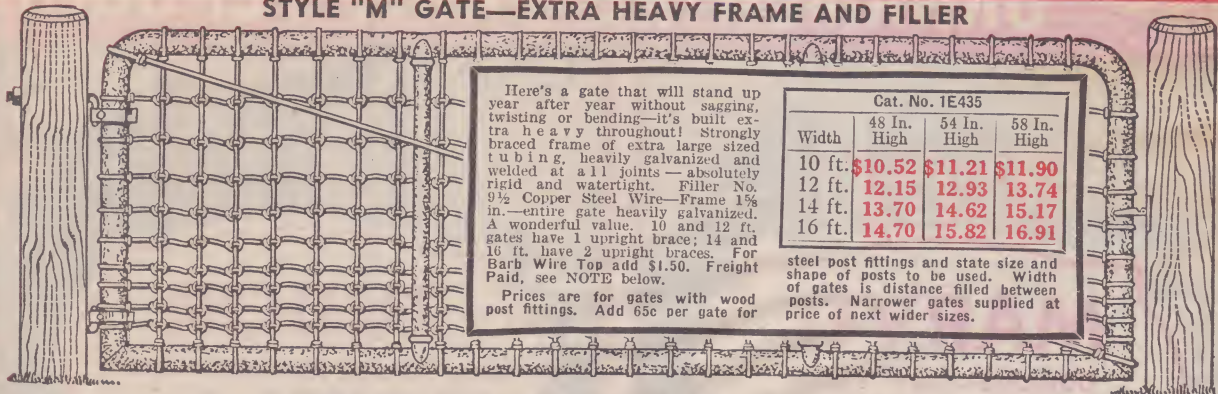

When our present supply of zinc is exhausted, if we cannot secure more on account of National Defense requirements, we will ship gates with frames and fittings coated with a high grade rustproof paint.

Open Position, Closed Position Shown Below

DON'T PAY MORE THAN MY LOW PRICES!

STYLE "M" GATE—EXTRA HEAVY FRAME AND FILLER

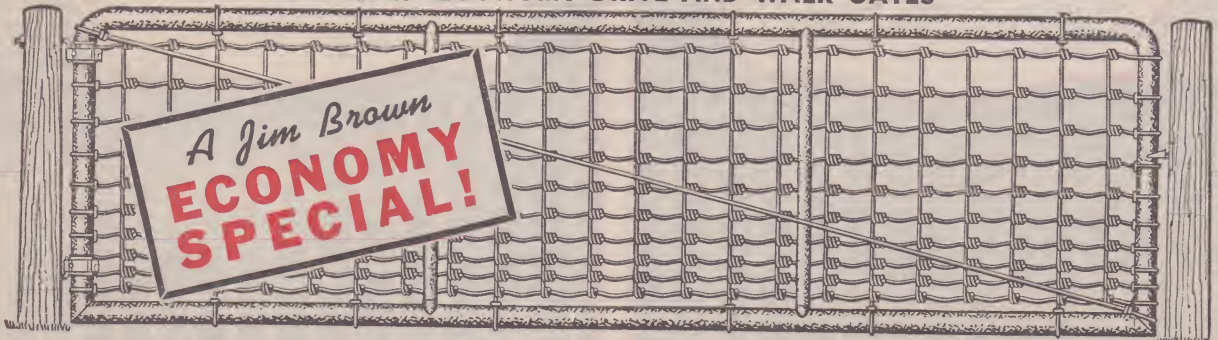

Here's a gate that will stand up year after year without sagging, twisting or bending—it's built extra heavy throughout! Strongly braced frame of extra large sized tubing, heavily galvanized and welded at all joints—absolutely rigid and watertight. Filler No. 9½ Copper Steel Wire—Frame 1½ in.—entire gate heavily galvanized. A wonderful value. 10 and 12 ft. gates have 1 upright brace; 14 and 16 ft. have 2 upright braces. For Barb Wire Top add \$1.50. Freight Paid, see NOTE below.

Prices are for gates with wood post fittings. Add 65c per gate for steel post fittings and state size and shape of posts to be used. Width of gates is distance filled between posts. Narrower gates supplied at price of next wider sizes.

16 ft.	14.70	15.82	16.91

STYLE "R" ECONOMY DRIVE AND WALK GATES

A Jim Brown ECONOMY SPECIAL!

These Gates Beat Anything of Their Kind on the Market!

The frame is made of 1½ inch outside diameter steel tubing extra heavily galvanized with pure zinc. The joints are electrically welded so the frame is one solid piece. The wire filler is my regular hinge-joint fencing with No. 9 gauge copper-steel wire at top and bottom and No. 11 gauge intermediate wires. Upright wires spaced only 6 inches apart and the horizontal wires are graduated from 3 inches at the bottom to 8 inches apart at the top. All wires securely fastened

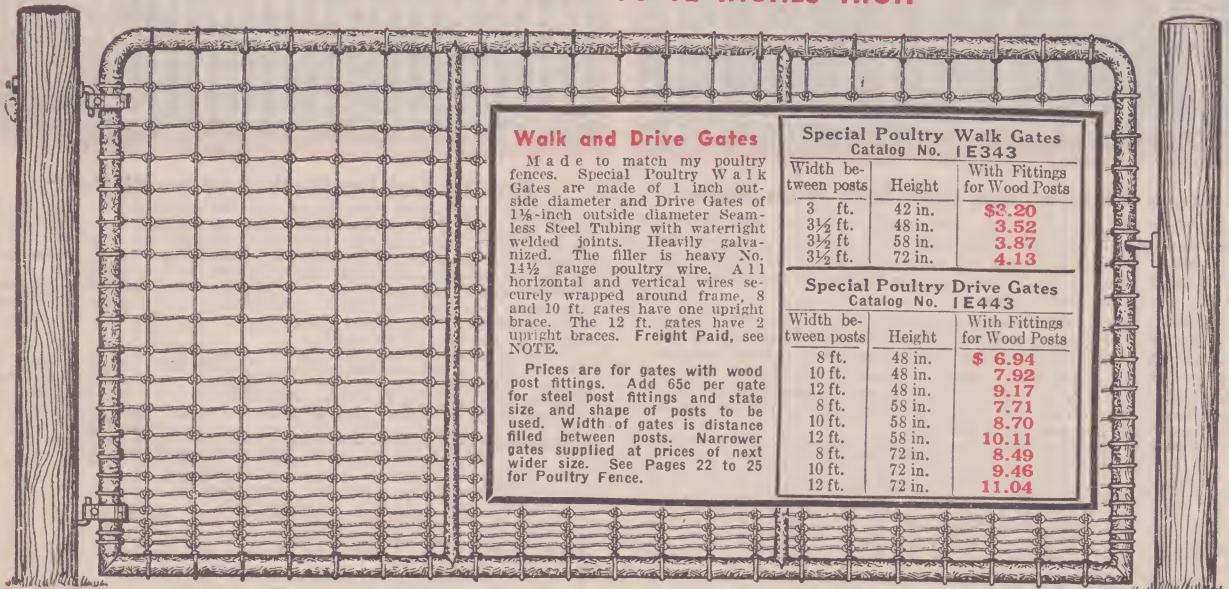

to the frame. 10 ft. gate has one upright brace; 12 ft. gate has two upright braces.

Walk Gates are made of 1 inch tubing, welded at the joints and heavily galvanized. Filler is same as in Drive Gates. Freight Paid, see NOTE below.

Prices shown are for gates with wood post fittings. Add 65c per gate for steel post fittings and state size and shape of posts to be used. Width of gates is distance filled between posts. Narrower gates supplied at price of next wider size. Barb Wire Top \$1.50 Extra.

When our present supply of zinc is exhausted, if we cannot secure more on account of National Defense, we will ship gates with frames and fittings coated with a high grade rustproof paint, instead of galvanized.

Jim Brown's

ORNAMENTAL LAWN FENCING

MARVEL

DURABLE—LOW PRICE

Protects and Beautifies your property at very low cost. Very popular as a back yard or division fence. Pickets are spaced 3 inches apart. For Gates to match, see page 30. For Posts, see page 37.

TUDOR

With DOUBLE BOTTOM PICKETS

The most beautiful and popular ornamental wire fence made! Extra pickets in bottom give extra protection. For Gates to match, see page 30. For Ornamental Fence Posts, see page 37.

Keeps Children and Pets Safe from Harm

My "Marvel" Lawn Fence is very popular as a back yard or division fence and is also frequently used as a complete enclosure for play-yards. It has a beautiful and ornamental weave, with corrugated or crinkled wire, looped at the top as shown in the illustration. Height, 30 inches to 60 inches.

"Marvel" Lawn Fence is made in two weights of wire, the Medium Weight, No. 11 gauge, and the Heavy Weight, No. 9½ gauge. The double cable wires are two 13 gauge wires twisted together and around the picket wires, spaced 6 in. apart, except the two top cables which are 2½ in. apart. All wires are Copper-Steel with Hi-Test Pure Zinc Galvanizing. Order in standard size rolls as far as possible. Odd feet are priced per foot.

Beauty and Protection at Small Cost

It costs little for the Extra Beauty and Protection you get in Tudor Lawn Fencing. The upright wires at the top are 3 inches apart, while at the bottom an extra wire is inserted, making the spacing at the bottom 1½ in. apart. This "double" style of spacing is ornamental as well as practical, the close spacing at the bottom serving to keep chickens and small animals out. It also prevents children from getting their toes into the fence. The twisted cables are made up of two 13 gauge wires, spaced 6 in. apart, except the two top cables which are spaced 2½ in. apart.

"Tudor" Lawn Fence is made in several heights from 30 in. to 60 in., and in two weights of wire, the Medium Weight, No. 11 gauge, and Heavy Weight, No. 9½ gauge. All wires are made of Copper-Steel with Hi-Test Pure Zinc Galvanizing. My Direct-from-Factory price saves you several cents per foot. Order in standard size rolls as far as possible. Odd feet are priced per foot.

NOTE: Gates are shipped Freight Prepaid when your order amounts to \$10.00 or More and includes fence or poultry netting; if no fence or netting is ordered add 5% to price of gates. Gate Orders under \$10.00 NOT prepaid if shipped separately. If necessary, on account of National Defense, we will ship gates with frames and fittings coated with a high grade rust-proof paint, instead of galvanized.

Wood Picket Flower Bed Guard

Constructed the same as my Pointed Top Wood Picket Fence which is described on opposite page. Makes a very "homey" and neat appearing guard for flowers. Comes in rolls containing either 25 or 50 running feet and in 18-inch height only. Smooth finish. Sold only in full rolls. Prepaid with Orders of \$10.00 or More.

Cat. No.	Color	25' Roll	50' Roll
1E85	White Painted	\$3.22	\$5.88
1E86	Green Painted	2.96	5.38

Freight Paid on Orders of \$10.00 or More

Stiff Wire Plant Stakes

Made from 6 gauge Galvanized Wire - very STIFF and STRONG! Each stake has a double loop formed in one end to prevent ties slipping out of the loop. Easily pushed into the ground.

Put up in bundles containing 100 stakes of one length only. Order in full bundles.

Cat. No. 9E1

Jim Brown **WOOD PICKET** *Lawn and Garden* **FENCING**

IDEAL FOR ENCLOSING GARDENS, ORCHARDS and LAWNS

Neat, Practical and Very Low Priced

Jim Brown Ready-Woven Wood Picket Fence is made of strong and durable wood. The wood pickets measure $1\frac{1}{2}$ inches wide by $\frac{1}{2}$ inch thick, and are spaced about 2 inches apart. The pickets are tightly held by double strands of No. 12 $\frac{1}{2}$ gauge galvanized steel wire, twisted. This wire is Copper-Steel, protected with Hi-Test Pure Zinc Galvanizing, the same as used in my woven wire field fences. You have a choice of this fence in either the 36-inch or the 48-inch height. The 36-inch height has 4 double strands of twisted wire, while the 48-inch height has 5 double strands of twisted wire.

Sharp Evenly Pointed Pickets

The red painted fence comes in rough finish only and is coated with red oxide, dull-finish paint. The rough finish is just as the pickets come from the saw. The rest of these fences have smooth finish, that is, the pickets are planed on the two flat sides. The unpainted fence is in the natural wood, while the green and white fences are painted with a good oil paint which gives a beautiful glossy finish.

This fence can be easily stretched without kinking or cutting, even over rolling land. Furnished in 50 and 100 foot rolls only. We do not cut rolls. For suitable posts refer to pages 34 to 37.

- Stock and Poultry Proof.
- Sharp Tops Prevent Trespassers.
- In RED, WHITE or GREEN.
- White Gates to Match Fence are Listed Below.

Jim Brown's SQUARE TOP WOOD PICKET FENCE

Ideal for Snow Fence and for Temporary Corn Cribs

My Square Top Wood Picket Fence is the same as Picket Fence above but without the pointed tops. Will stop the drifts that block your drives and barnyards, and can be used for temporary corn cribs. Easily erected and taken down. Can be stored in small space and used many seasons. Jim Brown Steel Posts shown on Pages 34 to 37 are ideal for these fences. Furnished in rough finish Red only. Made in 48-inch height and sold in 50 and 100 foot rolls only. We do not cut rolls.

THE BROWN FENCE & WIRE CO., CLEVELAND, OHIO.—MEMPHIS, TENN., Address Nearest Office

For BEAUTY and PROTECTION

Jim Brown's

CHAIN LINK FENCING

for Homes, Factories, Estates, Tennis Courts, Cemeteries, Kennels and other places where a Non-Climbable, Beautiful, Durable Fence is desired.

2 in.
MESH

Easy
to Splice

If necessary to splice rolls of this fencing, untwist (same as reversing a corkscrew) the end wire of one roll and bring the end of each roll together. Then corkscrew the loose strand back through the end of both rolls and twist the ends together like other stay wires in the fence.

Jim Brown's Chain Link Fencing is made of genuine copper-steel wire heavily galvanized with Hi-Test zinc. You have your choice of 7 heights from 36 inches to 96 inches high, made in either the heavy No. 11 gauge, or the extra heavy No. 9 gauge.

Wires in my Chain Link Fence are continuous and interwoven from top to bottom, forming a 2-inch non-climbable mesh. Top is barbed and bottom is knuckled as illustrated in the 36, 42 and 48 inch heights. 60 to 96 inch Chain Link Fence has BOTH barbed top and barbed bottom.

Gates, Tension Bars, Fabric Bands and Bolts, are illustrated and priced on this page. Posts for Chain Link Fencing are shown on page 37. Complete Chain Link Fences including Posts, Top Rail, Fittings and Extra Barb Wire Top and Barbed Bottom are illustrated and priced on page 33.

TENSION BARS

For fastening Chain Link Fence Fabric to tubular steel end and corner posts (see illustration at right): First, slip a tension bar down through the end links of the fabric, then fasten the tension bar to the post by means of fabric bands and bolts, listed below. Figure one tension bar for each end post, and two tension bars for each corner post. Order tension bars the same length as the height of the fence.

Tension Bar Prices—Cat. No. 1E131

Length.....	36 In.	42 In.	48 In.	60 In.	72 In.	84 In.	96 In.
Price Each.....	36½c	42½c	48c	59c	71c	84c	93c

FABRIC BANDS and BOLTS

Used to fasten tension bars to tubular steel end and corner posts (see illustration above). Figure one fabric band and bolt for each foot in height (or fractional foot) of fence. For instance, a fence 42" or 48" high would take 4 fabric bands and bolts; a fence 60" high would take 5. Before ordering, be sure to measure the OUTSIDE DIAMETER of your posts.

The prices shown are for gates with fittings for wood posts. If steel post fittings are wanted add 65c per gate and be sure to tell us the shape and size posts to be used. Width of gates is distance they fill between posts. We can also furnish Heavy Duty 2 in. O.D. Seamless Steel Tubing Gates Heavily Galvanized; send specifications for quotations. If necessary, on account of National Defense, we will ship gates with frames and fittings coated with a high grade rust-proof paint, instead of galvanizing.

NOTE!

Gates are shipped Freight Prepaid when your order amounts to \$10.00 or More and includes fence or poultry netting; if no fence or netting is ordered add 5% to price of gates. Gate Orders under \$10.00 NOT Prepaid if shipped separately.

COMPLETE-READY TO PUT UP-CHAIN LINK FENCES

Saffee
Complete Chain Link Fencing With Barb Wire Top
 Fabric is 2-inch mesh Copper-Steel wire, heavily galvanized with Hi-Test Pure Zinc. Furnished with Line Posts, Extension Arms and Top Rail painted Green.

These complete Chain Link Fences are the kind used for Factories, Estates, Parks—every place where greatest protection and a permanent installation is wanted! Everything needed for erecting the complete fence, except Gate and Corner Posts with complete fittings are listed at the prices shown. Gate and Corner Posts to match Chain Link Fences are shown and priced separately on page 32.

The price per running foot includes 2-inch mesh Fabric in Heavy or Extra-Heavy gauge, 3 Strands of 4-point Barb Wire, Extension Arms, Top Rail, Line Posts, (spaced approximately 10 feet apart) and all necessary fittings. Overall height shown in table at right means distance from bottom to the extreme top of fence including Barb Wire. Send sketch when ordering. See sample sketch at bottom of page.

NOTE: All prices and deliveries are subject to conditions beyond our control. See Page 1.

Guardall
Complete Chain Link Fencing With Tubular Top Rail
 Fabric is 2-inch Copper-Steel Wire, heavily Galvanized. Furnished with Line Posts and Top Rail Painted Green.

This type of complete Chain Link Fencing is very popular on private estates and other places where the barb wire top is not needed, and it makes a very ornamental and attractive installation.

Price per running foot includes 2-inch heavy or extra heavy Galvanized Fabric, Painted Top Rail, Line Posts (spaced approximately 10 feet apart) and all necessary fittings. If Top Rail is not wanted, deduct 12c per running foot. End, Gate and Corner Posts are not included, but are priced separately at right below. Gates to match this fence are priced separately on page 32.

The Top Rail in the illustration above is pictured above the top of the fence in order to show it clearly. In actual construction the top of the fence fabric is usually placed above the Top Rail as shown in illustration at top of this page.

END, GATE AND CORNER POSTS FOR ABOVE FENCES

Prices for posts shown here include Rail End Sockets, Socket Bands and Bolts, Tension Bars, and Fabric Bands and Bolts. Posts for Chain Link Fences should be set in concrete at least 30 inches in the ground. For complete description of posts see page 37. For Chain Link Fence Gates see page 32.

When ordering either of Complete Chain Link Fences shown above, send sketch or diagram showing location of End, Gate and Corner Posts, distance between such posts and size of Gates.

Jim Brown's CARBON STEEL

Punched Steel Posts—Angle or Tee Style

Jim Brown Rail Steel Fence Posts will help you do a better fencing job, and do it easier. They will put an end to your post troubles and save you a lot of time and money. You know that railroads use Carbon Steel in making railroad rails, and that's what these strong, sturdy, steel line posts are made from. You can't get better post material no matter what you pay because these rail steel posts have extra strength and stiffness without brittleness, will give years of service.

The Angle and Tee posts shown on this page are made in the punched style—oval holes $\frac{5}{8} \times \frac{3}{16}$ inches are punched in the posts 2 inches apart so that any type of fencing wire or netting can be fastened with ordinary $\frac{1}{4}$ inch staples, or with my Blunt End Staples especially designed for these posts which are illustrated and priced below. You can fasten any fencing to these posts quickly and easily with my free Staple Clincher which I include with every order for punched steel posts.

Easy to Drive—No Post Holes to Dig

All my steel posts are sharply pointed at the bottom for easy driving; it takes just one or two minutes to drive a steel post. Compare this with the time and back-breaking labor required for digging holes and setting wood posts! All Jim Brown steel posts have heavy double-riveted Anchor Plates with Extra Big Bearing surface to "anchor" them solidly and keep them from turning in the ground. Posts are listed in lengths from 60 to 108 inches. **Angle Posts** are $1\frac{1}{4} \times 1\frac{1}{4} \times \frac{3}{16}$ inches; they weigh 1.12 lbs. per foot. **Tee Posts** are $1\frac{1}{2} \times 1\frac{1}{2} \times \frac{3}{16}$ inches; they weigh 1.25 lbs. per foot. All posts are given a heavy coating of rust-resisting Red Oxide compound at the factory, which helps protect them against rust in all climates.

I think you'll agree with me that it costs less, and will save you time which can be used to better advantage, to build a fence with steel posts. When ordering your posts better order the Steel Post Driver which I illustrate on the next page. This driver is a dandy, and enables one man to drive steel posts with amazing speed.

Freight Prepaid on Orders of \$10.00 or More

BLUNT END STAPLES For Punched Posts

No. 10 gauge galvanized wire, $1\frac{1}{4}$ in. long. For use with punched Angle or Tee posts. Just put staple over fence wire, stick ends through the oval holes punched in the posts and clinch, as shown in the small illustration in the center above. About 500 staples in each 5 lb. package. Prepaid.
No. 1E3—
5 lb. Pkg. **57c**

FREE STAPLE CLINCHER

Jim Brown "Jiffy" stapling tool shown above is included FREE with every order for these punched Angle and punched Tee posts.

See page 39 for my handy Combination Pliers, Wire Cutter, Splicer, Staple Puller and Lifter for bent lugs on steel posts. You should have one of these pliers in your tool box!

FREIGHT PREPAID ON ORDERS OF \$10.00 OR MORE

LINE POSTS 5 STYLES

Big Anchor Plates—Double Riveted

Two Bottom Lugs Are Turned Down

Just Top Lugs to Fasten Fence Wire

Self-Fastener Steel Posts—3 Styles

My Self-Fastening steel posts are a Real Sensation! The "wire fastener" is a part of the post and no staples or other wire fasteners are needed. You just hang the line wires on the lug fasteners, tap the lugs with a hammer or fence tool, and the fence is fastened in place. The two bottom lugs are turned down, as shown in small illustration in center above, to prevent hogs or other stock from lifting fence. Self-fastener lugs are spaced so they fit any style or type of fencing or netting. If you ever want to move the fencing, the lugs can be easily lifted with pliers or hammer claws. Self-Fastener posts are furnished in Angle, Tee, or U-Flanged styles shown at right.

Carbon Rail Steel—Big Anchor Plates—Sharp Points!

All of these posts are made of springy, long-life Carbon Rail Steel, the hardest, springiest, toughest steel you can imagine; the ideal steel for fence posts. All posts are sharply pointed for fast, easy driving, and have big oversize double-riveted anchors to keep post from turning—once set they "stay put"! Steel posts save you a lot of time and money in fence building—they can't burn or rot away and they'll give many years of service. They are heavily coated with a Red Oxide rust-resisting paint in the factory, which keeps them in good condition for years. They are painted AFTER they are formed so there are no unpainted edges.

Posts are all made in 60 to 108-inch lengths, as listed below. **Angle Posts** are $1\frac{1}{4} \times 1\frac{1}{4} \times \frac{3}{16}$ -inch and weigh 1.12 lbs. per foot. **Tee Posts** are $1\frac{1}{2} \times 1\frac{1}{2} \times \frac{3}{16}$ -in. and weigh 1.25 lbs. per foot. **U-Flanged posts** are extra stiff because of their shape, are $2 \times \frac{3}{4} \times 1\frac{1}{4}$ -in. and weigh 1.12 lbs. per foot.

Handy Steel Post Driver

One man can drive steel posts straight and true, with amazing speed, by using this special Post Driver. It's just what you need to drive your steel posts; can be used for driving any style steel line post. Simple in operation, but a wonderful time and labor saver!

The top end is plugged with heavy metal. You just slip open end of the driver over top of post—place post in upright position, then raise and lower driver with "plier driver action" and your post is set in just a few seconds! Be sure to include one with your order.

JUMBO Steel Corner, End, and Gate Posts ~

3 1/4" and 4" Extra Heavy Steel Posts Made of Reclaimed Seamless Tubing!!

These big strong posts are made in two sizes, 3 1/4-inch outside diameter and 4-inch outside diameter; of heavy reclaimed seamless steel tubing. The tubing used in these posts comes from boiler plants which have been dismantled. The walls are thick, and the material is strong. For fence posts it is as good as new and costs about half as much. We remove the rust and scale and paint each post with a heavy coat of red oxide metallic paint. These are the strongest and most economical heavy posts I have ever seen. The top end of each post is sealed with a heavy metal cup, making it

ornamental and absolutely water-tight, preventing moisture getting inside to rust and shorten the life of the post. Posts come complete with all necessary bolts and braces. End or Gate posts have 1 brace, Corner posts 2 braces. Braces adjustable to any angle. Order the 4-in. posts for heavy fences and long stretches.

Freight Paid on orders of \$10.00 or more.

My New DIRT-SET Post

NO CONCRETE IS NEEDED Just Set Them in Dirt—These Posts Will Stay Put!

I have been experimenting for years to produce a Dirt-Set End, Gate and Corner Post that really stays in the ground even though you stretch your fence on it as tight as a violin string. At last I have it! These great big 3 1/4-inch and 4-inch Extra Heavy Posts have stood every test. We have stretched heavy No. 9 fence on these posts and pulled them as tight as we could with a Double Jack Stretcher and these posts were solid as a rock. You can do a real job with these posts.

Has Two Big Brace Plates

You do not need to use concrete in setting these Dirt-Set Posts. Just dig a hole—put the post in the ground and tamp the dirt solidly on the bent "foot" and against the post. The breast plate and anchor plate drive into the ground with a sledge or maul. You can stretch your fence as soon as the posts are in the ground—you don't have to wait.

Extra Heavy Seamless Tubing

These Dirt-Set posts are made of Extra Heavy reclaimed Seamless Steel Tubing, same as my Jumbo posts described above. Their thickness and weight provide strength greater than they will ever require. Protected from rust, with a heavy coat of special metallic Red Oxide compound. Look at my Low Prices on these strong posts.

FAULTLESS Seamless Steel Posts for Line, End, Gate or Corner

My Faultless Posts are made of reconditioned Seamless Steel Tubing. Not welded, not sheet steel, but heavy, thick-walled tubing without seams! They are heavier and stronger than any other round posts of the same diameter I have ever seen, because of this construction. Ideal for use with either lawn fencing or field fencing. Top of each post is fitted with an ornamental ball top securely wedged onto post.

Faultless Posts are furnished painted with a heavy coat of weather and rust-resisting green paint; an occasional coat of paint will protect them from rust indefinitely.

Sizes given are outside diameters. Prices quoted are for length of post, not height of fence—order End, Gate, and Corner Posts 30 or 36 inches longer than the height of fence. Braces are included with End and Corner Posts as noted at right; line posts do not have braces.

4-Inch Seamless Steel BUILDING COLUMNS

Made from Heavy Redrawn Seamless Steel Tubing. Painted with Rust-Resisting Red Oxide. For barns and other buildings where a good support is needed. Should be set on a solid foundation and filled with concrete.

Made of 4-inch outside diameter thick-walled seamless steel tubing. You could hardly find a better, stronger material at any price. Won't rot, cannot be attacked by termites or other insects. Weight of columns includes thickness of base and cap. Base and cap plates included in price. Here is a real bargain in first class building columns.

FINEST QUALITY—10 DIFFERENT SIZES

Jim Brown Wire is SMOOTH, uniformly cylindrical, even in temper and free from flaws. It can be bent and twisted readily, yet it is tough and strong. This wire is made of Basic Open Hearth Copper-Steel, and is well protected with a uniform coat of Hi-Test Pure Zinc Galvanizing.

Supplied in coils of 10 lbs. or more and in 10 different wire sizes. The lighter gauges, from 12 to 18, are not recommended for grape vines, but are excellent for repairing fences, for tie wire and other general purposes. I have sold tons and tons of Nos. 9, 10, and 11 gauges for grape vineyards—and my customers re-order whenever they need more.

ORDER NOW! All prices and deliveries are subject to conditions beyond our control. See Page 1.

BETTER SKIP IT, FELLOWS - THAT'S A *Jim Brown* APPROVED ELECTRIC FENCE

IMPORTANT!

Don't take a chance on homemade or unapproved electric fences! They are illegal in many states, may be dangerous, ineffective and costly!

ALL Jim Brown Electric Fences are Approved by The Wisconsin Industrial Commission and Are LEGAL FOR USE IN ALL STATES. Every one has been thoroughly tested, checked, and proved mechanically perfect.

They are self-starting, and no adjustments are necessary. Full instructions for use are furnished.

Electric Fences make ideal low-cost fence installations for temporary pastures, for feed lots, hogging down corn and for similar purposes. They are quickly and easily installed and are very satisfactory.

HOLDS ALL STOCK IF PROPERLY INSTALLED. IDEAL FOR USE IN TEMPORARY FENCING JOBS.

**Jim Brown's STANDARD
6-Volt Battery Operated Fencer**

- Very efficient! Cost of operation is small because drain on battery is unusually low.
- High - Low Terminal. The current can be regulated for wet or very dry weather.

\$11.14
Freight Prepaid

An efficient, well-built battery-operated fencer for either indoor or outdoor use. Sells for several dollars less than most other electric fences of equal quality. Safety Scaled! The Controller Mechanism is Hermetically Sealed against dust, moisture, and "sweating" of metal parts to guard against rust and corrosion. The entire unit is housed in a durable steel cabinet with Hammerloid finish. Operates from ordinary 6-Volt Hot-Shot battery, and charges up to 15 miles of wire. A high-grade Timing Mechanism delivers a powerful "shock" but is absolutely harmless under all conditions.

Has an Automatic Starter, High-Low Terminals for dry or moist ground, Signal Light and built-in Lightning Arrestor. Also has Underwriters' approved Battery Cable and Ground Clamp. My Electric Fence Manual is included. Battery and Insulators not included, order from listings below. Approved by the Wisconsin Industrial Commission.

No. IE1007—Prepaid.....**\$11.14**

**VALUE
LEADER**
**Battery
Operated**
\$8.07
Freight Prepaid

A guaranteed efficient battery-operated electric fence at a bargain price. Has a high-quality Timing Mechanism and built-in Lightning Arrestor. Operates from any 6-Volt battery and delivers a strong shock with complete safety. Oil-sealed Ball Bearings. Heavy embossed steel cabinet with Hammerloid finish. Cross-grained Tungsten Points for long life. Furnished with Battery Cable, Ground Clamp, and Fencing Manual with full instructions. For inside installation only. Battery and Insulators not included. Order separately from listings below. Approved by the Wisconsin Industrial Commission.

No. IE1006—Prepaid.....**\$8.07**

HI-LINE

Inexpensive but efficient — a absolutely safe! Approved by Wisconsin Industrial Commission. Legal for use in all states.

\$16.02

Ready to operate, just plug it in. Double fuses protect against overload from power line. Has efficient Timing Mechanism and High-Low Terminals for dry or moist ground. Handles up to 12 miles of fence. Shielded against radio interference. Steel cabinet with Hammerloid finish; metal parts specially plated against rust and corrosion. All working parts Hermetically Sealed inside the cabinet. Has built-in Lightning Arrestor, Ground Clamp, and Fencing Manual. For 110-Volt, 50-60 Cycle A.C. current only. Insulators not included, see below.

No. IE1008—Prepaid.....**\$16.02**

**The WEED-MASTER
HI-LINE FENCER NOW ONLY**

- Weeds don't put THIS Fencer out of commission! It KILLS WEEDS that grow into the fence line, eliminates "shorts."
- Shocks instantly . . . No Wait!
- Unequaled for Low Operating Cost . . . only 3 to 9c per month.

\$19.95
Freight Prepaid

The WEED-MASTER is more efficient, safer, and costs less to operate than any Electric Fencer I have ever seen. It transmits a different "shock" than other fences. KILLS WEEDS which grow up and touch the wire. Holds stock even while temporary "shorts" from weeds are being automatically eliminated. You don't get this exclusive feature on Fences which sell for double my price.

The Weed-Master far outlasts most other fences . . . there's not a single moving part to wear, and the Radio Type tubes give unusually long service. Comes in compact metal case, complete with fence lead wire; ground clamp; 4 corner and 30 line insulators with bolts for steel posts and leather washers. Has Winker-type signal light. For 110 Volt, 50-60 cycle A.C. current only. Approved by Wisconsin Industrial Commission.

No. IE1005—Prepaid, ONLY.....**\$19.95**

JIM BROWN STANDARD FENCE STRETCHER

The Jim Brown Standard Fence Stretcher is an old standby and is just the tool for those who want a good stretcher at a Low Price. It is strong enough for any fence in this catalog with strength to spare. Has wooden clamp bar made of 2 strong pieces of seasoned timber 5 ft. long and are bolted together by 6 heavy machine bolts with washers allowing a grip on the fence that will not slip. Comes with one heel chain 4 feet long and one jack chain 8 feet long. The heavy cast iron chain jaws are positive in action and are designed to operate with ease even under great tension.

Use crowbar or any suitable piece of timber in operating the Standard Stretcher, as we do not supply the handle shown in the illustration. A good fence well stretched adds years to its usefulness.

DOUBLE JACK STRETCHER 20,000 POUNDS PULLING CAPACITY!

\$12⁶⁴

Jim Brown Double Jack Stretcher is designed and built for extra heavy work as well as long stretches. Having a pulling capacity of 20,000 pounds it is particularly suited for stretching my all No. 9 and 9½ gauge woven fences. The stretcher consists of two heavy 5 foot steel clamp bars, which bolt together with a vise-like grip that's sure to hold, two extra heavy jacks, two heel chains 4 feet long and two jack chains 8 feet long which allow for making long stretches without making two hitches. The outfit includes a nut wrench and wire twister for splicing. The stretching capacity, ease of operation and the low price make this stretcher a real bargain.

Cat. No. 1E62—Prepaid**\$12.64**

Tackle Block Wire Stretcher

This powerful Roller-Bearing, Self-Locking, Double-Duty tool will stretch barb or plain wire and also serve as a hoist. Easy to operate. One pound pull on the rope equal to 4 pounds on the wire. Not to be compared with cheap plain bearing stretchers. Has two Non-Slip wire grips. Hook and chain for anchoring around post at one end. Swivel at each end. Comes with 16 feet of ¾-inch rope all strung ready to use.

No. 1E64—Postpaid, See NOTE below.....**\$1.37**

Single Wire Stretcher

This simple, sure-grip hand stretcher is intended for stretching single strands of plain or barb wire and for taking up slack between the heavy stretcher and the last post. Made of malleable iron 17 inches long. The harder you pull the tighter the jaws grip the wire. A handy tool for fence building. It will help you do a real stretching job on your fence. Look at the low price—Include one in your next order!

No. 1E63—Postpaid, See NOTE**96c**

Combination Fence Pliers

The latest and only type Fence Builders Pliers which can be used on all types of Fence Posts, Combination Pliers, Wire Cutter, Spliced Hammer, Staple Puller, Lifter for bent Lugs on steel posts, and short distance wire stretcher. Made of forged steel, 10¼ inches overall.

Postpaid, see NOTE.
Cat. No. 1E52—Unpolished with Smooth Handles... **\$1.02**
Cat. No. 1E51—Polished with Knurled Handles **\$1.40**

Stay-Tite Wire Grip

One of the best wire grips on the market for stretching smooth or barb wire. Made of Malleable iron—used by linemen of utility companies. Never slips; grip on wire tightens as pull increases! Can be attached to any Tackle Block Wire Stretcher. Postpaid, See NOTE below.

Cat. No. 1E71—
Each**51c**

POST HOLE DIGGERS

Atlas

This Famous Atlas Type Digger has high carbon steel blades 9" long, sharpened and tempered, shaped at the bottom to give a fast cutting edge in either wet or dry soil. Fitted with strong malleable castings. Handles, made of selected northern Ash, rounded, sanded and varnished to fit the grip comfortably, are 48 inches long making it possible to operate in a comfortable, upright position. No suction when removing dirt from hole.

Prepaid, see NOTE below.
Cat. No. 1E31
\$1.51

Auger Type

A high grade, fast cutting auger. By turning handle auger-wise the steel blades dig rapidly in almost any kind of soil.

Top handle is strong seasoned wood. Pipe handle measures 1 inch outside diameter. Overall length 47 inches.

This tool can also be used for boring suitable wells by adding suitable lengths of ¾-inch pipe to handle.

Supplied in sizes for boring holes from 4 inches to 9 inches in diameter. Prepaid, see NOTE below.

No. 1E34. 4 in. **\$2.00**
No. 1E36. 6 in. **2.07**

Fence Anchors

Drive in these anchors between line posts. Holds fence to the ground and stops hogs from pushing under. Made of steel 16 inches long, 1¼ inches wide, about ¾ inch thick. Hook over wire and tap prong with hammer. Painted with rust-resisting paint. Postpaid, see NOTE below.

Cat. No. 2E151—
Each**8½c**

Galvanized Tie Wire

For attaching fencing to posts. Also used for repairing broken fences where short lengths of wire are needed. Comes only in 12 inch lengths. Made of No. 12 wire, heavily galvanized with pure zinc. Wire twister is included.

Postpaid, see NOTE below.
No. 1E19—Per bundle of 100 pieces.....**34c**

SAVE MONEY ON BALE TIES

Jim Brown single Oval Loop Bale Ties are made from specially annealed steel wire with a special hard-oil finish that resists rust.

There are 250 or 500 ties packed in a bundle. The loop-end of each bundle is protected by burlap, and the whole length of the bundle is spirally wrapped to prevent the ties from becoming bent and tangled. The wire for this spiral wrapping comes off in one long piece, which eliminates the danger of short pieces of wire dropping into the hay. Sold only in full bundles. Freight Prepaid—See NOTE below.

NOTE!

Four Gauges and Four Mesh Sizes from Which You Can Choose

Netting is used for many different jobs which require different weight wires and different size mesh. For that reason, Jim Brown offers netting in four different gauges or sizes of wire, that is 16, 18, 19 or 20 gauge. The 16 gauge is the heaviest, 18 gauge is next, and so on to the 20 gauge which is the smallest size wire. You will also find netting in ¾-inch, 1-inch, 1½-inch and 2-inch mesh size. The heights range from 12 inches to 72 inches. All of the nettings can be supplied in rolls containing 150 running feet. Two styles of the more popular poultry nettings are also supplied in rolls containing 50 running feet as well as 150 running feet.

NETTING STAPLES

Made of Heavy Galvanized Wire

Points Are Sharp! **11c** Per Lb.

No. 14 Galvanized steel wire, and are ¾-inch long. There are about 480 staples to the pound. Used for fastening Poultry Netting and Hardware Cloth. Prepaid if Ordered with Netting or Fencing amounting to \$10.00 or More.

Cat. No. 1E2.....Per lb. **11c**
For other staples, see Page 5.

Galvanized Before or After Weaving

Jim Brown Netting is made in Hexagon or Diamond style of mesh, GALVANIZED BEFORE WEAVING or GALVANIZED AFTER WEAVING. Netting galvanized BEFORE weaving is intended for ordinary jobs where cost is first consideration. Netting galvanized AFTER weaving is extra durable because all twists are practically soldered together in a molten bath of Pure Hi-Test Zinc after weaving. Thus, the galvanized AFTER kind is especially recommended for permanent structures and fur-bearing animal enclosures.

High-quality steel wire is used in making my nettings. The edges are smoothly bound with strong, twisted selva wires. The weaving machines turn out the netting at a uniform rate and wind it into a uniformly tight roll. This makes a netting which unrolls evenly, and which can be erected easily without bulges in the fence line.

Here you will find a netting suitable for practically any purpose, such as: Poultry, Muskrat and Fox Fences, Bird and Squab Cages; Window Guards; Flower and Shrubbery Guards; Vine Trellis; Tennis Courts; Baseball Back Stops; Garden Fence, etc. See specifications in price tables below. You will be surprised at these wonderful values. And, best of all, my prices are FREIGHT PREPAID to your nearest steam railroad station if your order amounts to \$10.00 or more.

All prices and deliveries are subject to conditions beyond our control—See Page 1.

LOCK LEVER POST HOLE DIGGER

If you've ever worked until you thought your back was broken digging fence posts holes with a spade, you'll appreciate the saving of work that this post hole digger means.

This Jim Brown Lock Lever digger makes post hole digging easy and fast! The unusual feature of this digger is that it has a short lever handle attached to the hinge blade. When the handle is pushed down this lever holds the blade vertically in cutting position. When the handle is pulled up it turns the blade to a horizontal position which makes it easy to lift out the dirt which has been cut loose. Will work well in all kinds of soil.

The 4½ ft. handle is made of strong, seasoned, straight-grain ash. The blade is heavy high carbon steel treated and tempered to insure long wear. Blade is mounted on an extra hinge. Prepaid, see footnote.

Cat. No. 1E32—Each **\$1.92**

SEE PAGE 39 FOR OTHER POST HOLE DIGGERS

Jim Brown ROPED HOIST

With 50 Feet of Manila Rope

Comes Fully Roped, Neatly Spliced, Ready for use. Heavy, reinforced steel blocks; 2 sheaves in each block. Hardened steel axles with easy running cold rolled steel roller bearings. Positively Self-Locking at any position. Free moving drop forged swivel hook on each block. Hook and hoist guaranteed to carry 3 times working capacity of rope sizes given below. One man can do a lot of lifting and pulling with one of these hoists. For fence stretching, general Farm and Shop use, butchering, stump pulling, etc. Equipped with 50 ft. Manila rope.

HARDWARE CLOTH

For Tree and Shrubbery Guards

Keeps Rats and Weasels
Out of Poultry Houses

Ideal for Brooder House Floors

Lining Corn Crib and Grain Bins

Square Mesh, Heavily Galvanized Woven Wire

Line your corn cribs and grain bins with my Hardware Cloth and make them absolutely rat and mouse proof. If you have fruit trees or shrubbery that need protection from rabbits and other pests Hardware Cloth is just the thing and costs very little.

Line your poultry house with it and you won't have to worry about rats and weasels getting in and killing your fowls. The No. 2 mesh and the 1/2-inch mesh are ideal for floors in brooder houses and laying houses—all droppings go through the Wire Cloth; and the birds always have a clean, sanitary floor.

Hardware Cloth and Heavy Wire Cloth are also used as screens for sifting sand and ashes. The Heavy Wire Cloth is used extensively for making pens for larger animals. The 1/2-inch mesh, No. 16 gauge wire is particularly recommended for building rabbit hutches. Made of cold drawn Carbon Steel Wire, heavily galvanized AFTER weaving. The Standard Weight is furnished in Nos. 2, 3, 4, 6 and 8 mesh. The number represents the number of square mesh to the inch. The Heavy Wire Cloth is furnished in 1/2, 3/4, 1 and 1-inch square mesh.

Jim Brown's WIRE SCREEN CLOTH

Protection Against Insects at Low Cost

Keep out flies, mosquitoes, and other insects—protect your health and add to your comfort! You can screen all of your windows, doors, and porches at very low cost with Jim Brown's Wire Screen Cloth. It is made of splendid quality, clean new wire, which is rust and weather resisting. Furnished in Three Qualities, Black Enamelled, Galvanized, or Bronze. I recommend galvanized or bronze screen wire for longest life, although my black enameled wire gives good service.

My Black Enamelled screen cloth is covered with a heavy coat of glossy black enamel that will not crack or peel; it is made in 12 mesh size, that is, 12 squares to the inch. My Better Quality Galvanized screen cloth is protected with a coat of durable zinc galvanizing that greatly increases its life and service; it is made in 14 and 16 mesh, that is, either 14 or 16 squares to the inch.

My best grade screening is made of pure Bronze wire and is furnished in 16 mesh size, 16 squares to the inch—this size is so fine that the smallest insects and mosquitoes cannot get through. Bronze screen wire does not require painting, is rust-proof and corrosion-proof and should give almost life-time service!

Prices and Deliveries are subject to conditions beyond our control.

CORRUGATED and V-CRIMP

1 1/4 IN. CORRUGATIONS

2 1/2 IN. CORRUGATIONS

ONLY METAL ROOFING HAS ALL THESE BIG ADVANTAGES

ECONOMICAL—EASY TO APPLY

Anyone can apply Metal Roofing easily—and it can be laid on a skeleton framework if desired; this saves both labor and lumber. It greatly adds to the strength and rigidity of any roof. Suitable for practically any type of building.

IS ABSOLUTELY FIREPROOF

Sparks and burning brands will sputter out harmlessly on Jim Brown Metal Roofing. If properly grounded at roof corners, it will also arrest lightning. Many a building has been saved from destruction by a metal roof.

UPKEEP COST IS LOW

This roof comes from my factory with a "Shop-Coat" of red oxide paint. Should be painted again on both sides when applying. It will last indefinitely if given a coat of paint every few years, and there is no other upkeep cost.

KEEPS ORIGINAL GOOD LOOKS

Few other roofs can equal the fine appearance of a painted metal roof! If painted occasionally it will still look like new when wood shingles or other ordinary roofing is worn out and ready to be replaced.

Full Weight, Full Size Sheets!

Jim Brown Painted Roofing is made in my own metal roofing factories from full weight, full size, first-quality steel sheets—I do not sell "seconds." Because I manufacture my own roofing and sell direct to you by mail, I can offer you real savings over the prices you might have to pay elsewhere for equal quality.

Very Low Cost Per Year of Service

Metal roofing needs only an occasional coat of paint to keep it looking like new and to prolong its life indefinitely. It increases the structural strength of a building, is absolutely fireproof and one man can apply it quickly and easily. Sheets of metal roofing are equally good to use as siding.

My corrugated roofing, shown above, comes with 2 1/2 or 1 1/4 inch corrugations, which make it unusually rigid. Each sheet covers full 24 inches wide plus extra width needed for the laps.

Metal roofing is given a "shop-coat" of Red Oxide metallic paint at the factory, but should be painted again on the under side before applying and on the top (or weather side) immediately after it is laid. Lead headed nails or galvanized nails with lead washers, which are used for applying this roofing, are listed on page 45. No tools are needed with the exception of a hammer and a punch.

See "How to Figure Sheets Needed" on opposite page. Send Your Order Early—all prices and deliveries are subject to conditions beyond our control; see page 1.

Freight Is Prepaid on Orders of \$10.00 or More.

PAINTED METAL ROOFING

Factory-to-You Low Prices!

Although ALL of my Painted Metal Roofing presents fine appearance, my V-Crimp Metal Roofing is most popular for use on homes because of its distinctive beauty. It is rigid enough so that it can be laid right on the skeleton framework of the roof if desired.

Three Styles of V-Crimp Roofing

All three styles come in full weight, full gauge sheets which cover 24 inches wide, in addition to the necessary lap. 2-V Crimp has a crimp at each side of the sheet, 3-V has a crimp at each side and one in the center to give it extra stiffness. 5-V Crimp Roofing has **TWO** Crimps at each side in addition to the center crimp, which not only adds to its stiffness and rigidity, but also provides a double lap on each side of every sheet; it is doubly protected against leaking because it is practically impossible for water to work under the two laps on each side.

Metal roofing is given a "shop-coat" of Red Oxide Metallic paint at the factory but should be painted again both sides before applying. Lead headed nails, or galvanized nails with lead washers, for applying this roofing are shown on page 45. Wood "V" Sticks, also shown on page 45, should be used under the outside crimps of 2-V and 3-V Crimp Roofing for nailing, but are not required for applying 5-V Crimp roofing. All prices and deliveries are subject to conditions beyond our control; see page 1.

Freight Is Prepaid on Orders of \$10.00 or More.

HOW TO FIGURE SHEETS NEEDED TO ROOF YOUR BUILDING

To find the number of sheets required to go across the roof divide the length of roof by 2, as each sheet covers a space 2 ft. wide. Then decide the length of sheets required to reach from ridge to eaves and add enough for end laps. For cyclone or gambrel roofs measure from ridge to hip and from hip to eaves; figure each one separately for correct lengths of sheets.

Here Is An Ordinary Example

For a plain gable roof 18 ft. from ridge to eaves by 30 ft. long, divide the length (30 ft.) by 2 (2 ft. width is covered by each sheet); the answer is 15. Therefore you need 15 sheets to go across the roof.

Measure distance from ridge to eaves and add one foot for end laps; figure what lengths will answer your purpose. Adding one ft. to 18 would give you 19 and the best lengths to use would be one 9 ft. and one 10 ft. length. As it requires 15 sheets to go across the roof once, you would need fifteen 9 ft. sheets and fifteen 10 ft. sheets for each side or thirty 9 ft. sheets and thirty 10 ft. sheets for both sides.

FOR MY EASY PAYMENT TERMS SEE PAGE 2

THE BROWN FENCE & WIRE CO., CLEVELAND, OHIO.—MEMPHIS, TENN., Address Nearest Office

GALVANIZED METAL ROOFING

HOT DIP GALVANIZED

Both Sides and All Edges with

PURE HI-TEST ZINC!

No Place for Rust to Start

- The No. 1 Roofing For Low Cost Per Year of Service . . . and Complete Protection!
- Meets All U.S. Government Specifications.
- Easy To Apply—Practically No Upkeep!

Jim Brown Galvanized Metal Roofing is made from full-gauge, full-size Quality Steel Sheets. It is heavily galvanized with pure molten zinc on BOTH SIDES AND ALL EDGES after the sheets are cut—by the HOT DIP PROCESS, the finest galvanizing process known. Every sheet conforms to the strict Specifications of the U. S. Bureau of Standards, and to the Building Codes of all Cities and All States.

Lowest Cost Per Year!

Galvanized Metal Roofing lasts so many years longer than ordinary roofing that cost per year of service is very low. Users tell of Galvanized Metal Roofing still in good condition after 25, 30 or 35 years! It is easily applied, and suitable for practically all types of buildings, such as houses, barns, garages, corn cribs, etc. Wood "V" Sticks should be used under the outside crimps of V-Crimp Roofing for nailing. Wood "V" Sticks, lead-headed nails, or galvanized nails and lead washers for applying metal roofing, are shown on the bottom of page 45.

Metal roofing cuts insurance costs because it is fireproof; it also arrests lightning if properly grounded at each roof corner. It is attractive and clean, will not taint or discolor rain water.

3 Weights and 6 Styles

Galvanized Roofing comes in the 6 styles illustrated which are listed in the table below. Made in 3 weights—29-gauge is the lightest, 28-gauge is medium weight, and 26-gauge is heavyweight. I recommend 26-gauge for **Longest Wear**. Comes in sheets which cover full 24 inches wide; different lengths furnished are shown in price table. See "How To Figure Sheets Needed" and "Example How To Measure" on Page 43.

Freight Prepaid on Orders of \$10.00 or More.

Low Priced
But WATERPROOF
and DURABLE!
Jim Brown's

PERFECTION ASPHALT ROOFING

AS LOW AS
99^c
Per Roll

Perfection Roofing is made to meet the demand for a good quality roll roofing at a low price. To equal the quality of Perfection I believe you would have to pay 25% more than my price anywhere else! The reason my prices are so low is that I buy carload after carload of Perfection each year from the most reliable and largest roofing manufacturers and I am willing to take a small profit on my tremendous volume of sales.

I don't claim that Perfection Roofing gives the service that my Dreadnaught or Armor Coat roofing does, but I will say that it is ideal for use where first cost is an important consideration. Perfection Roofing will give satisfactory service for more years than you expect at such a low price.

Why Pay More Than My Prices?

Don't judge Perfection Roofing by price alone. It has a base of high grade rag felt, thoroughly saturated and coated with hot asphalt; talc finished on both sides. Contains no tar or rubber. Compare construction with others and you will see why it pays to buy your roofing from Jim Brown. Each roll contains 108 sq. ft. and covers 100 sq. ft.; we allow 2 inches on each roll for the lap. Comes with enough nails and cement for proper laying.

I particularly recommend Perfection for tool sheds, out-buildings, siding, and wherever a low priced roofing is desired. I suggest that you use heavy weight for permanent roofs.

IMPORTANT $\frac{7}{8}$ in. Nails and cement free with each roll. To lay roofing over shingles order $1\frac{3}{4}$ inch nails and add 10 cents per roll extra.

Jim Brown's DREADNAUGHT

The Highest Quality *Smooth Surface* ASPHALT ROOFING

Money Can Buy!

**Worthy of
the Finest Buildings
A Quality Roofing at a Bargain Price**

My Dreadnaught Roofing is all that the name implies. It is built to weather hard storms and to withstand for many years the battles waged against it by driving rain, hail, and wind, melting snow and burning sun. That's why thousands of people in all sections of the country use Jim Brown Dreadnaught Roofing. In addition to giving wonderful service Dreadnaught has a Mica-Galvo finish which makes it attractive.

Jim Brown Dreadnaught Roofing is made of the same high quality, long fibre, rag felt that is used in my famous Armor Coat Roll Roofing and Shingles. Every fibre is saturated with an asphalt saturant. Both sides are then surfaced with a heavy coating of hot waterproof asphalt which seals the asphalt saturant. This allows the roofing to remain flexible, and prevents rapid drying, cracking, blistering, and hardening.

Attractive—Permanent—Easy to Lay

If you want the best roofing value for your money use Dreadnaught. Your roofing problems will be over for years to come. No time lost—no crops or property spoiled. Suitable for new roofs as well as over old shingle or composition roofs. Each roll contains 108 sq. ft. and covers 100 sq. ft., allowing for 2 inch lap. Enough Galvanized Nails and Cement for proper laying are included in each roll. Furnished in three weights, any one of which is suitable for permanent roofs. The Heavy Weight and Extra Heavy Weight are approved by the National Board of Fire Underwriters and save you as much as 12% on insurance in most localities when used in place of wood shingles.

I am proud to offer Dreadnaught Roofing. It is the best grade of smooth-surface asphalt roofing made—is sold by me at a low price—and is a real investment in your buildings. Below are my Low Prices. Remember Jim Brown Pays the Freight on Orders of \$10.00 or More.

IMPORTANT $\frac{7}{8}$ " Nails and Cement Free. Each roll covers 100 sq. ft. To lay roofing over shingles order 1 $\frac{1}{2}$ inch nails and add 10 cents per roll extra.

EXTRA HEAVY—EACH ROLL WEIGHS 90 LBS.

Jim Brown Armor Coat Asphalt Roofing is the finest Slate or Ceramic Granules Surfaced roofing produced today. This EXTRA HEAVY WEIGHT Roofing is built UP TO A STANDARD and not down to a price! It will improve the appearance and enhance the value of your property. I have sold hundreds of thousands of rolls of Armor Coat Roofing. It has always given the best satisfaction. Now it is even better than ever before.

The backbone of this roofing is a high quality, long fibre rag felt base which is saturated with asphalt saturant, sealed and coated on both sides with hot asphalt. A thick layer of bright, non-fading Crushed Slate or Ceramic Granules, that will not wash off or discolor rain water, is embedded in the roofing. Resists burning embers, flames and sparks, and is listed as Standard by the Underwriters' Laboratories, Inc., saving you about 12% on insurance in most localities, as against wood shingles.

Two-Inch Water-Tight Lap Joint on Each Roll

You have a choice of 3 New Brilliant, Non-Fading Colors: Red, Green, and Blue-Black. Not to be confused with the old dull shades found on ordinary roofing. More beautiful and just as permanent at no increase in price.

Each Roll of Armor Coat is 36 in. wide, 36 ft. long and contains 108 Sq. Ft. and covers 100 Sq. Ft., allowing for two-inch water tight lap. Easy to apply—no experienced labor required. Can be used on a new roof or over old shingles or composition roofs.

Extra Heavy—Each Roll Weighs 90 Lbs.

Each Roll weighs 90 pounds. Furnished in Red, Green, or Blue-Black. Be sure to state color wanted. $\frac{7}{8}$ -inch nails and cement FREE with each roll. If $1\frac{3}{4}$ -inch nails are wanted for laying over shingles, please specify and add 10c per roll.

Jim Brown

EVERITE SLATE or CERAMIC GRANULE SURFACED ASPHALT ROOFING

DURABILITY AND LONG WEAR AT LOW COST

First cost and number of years of service per dollar constitute the basis of all roofing values. You can now afford roofing protection that is really worth while at a material saving in cost by ordering Jim Brown EVERITE Slate Surfaced Roofing.

EVERITE Roofing is of similar appearance and second only in quality to my famous ARMOR-COAT Roofing shown on Page 48. It is made with a base of long fiber rag felt, thoroughly treated, saturated and waterproofed with a coating of heavy asphalt. It is then surfaced with durable crushed slate or ceramic granules in permanent colors which is thoroughly imbedded in the asphalt under pressure. Will not fade, wash off or taint or discolor cistern water. Contains no tar.

PROVIDES A SATISFACTORY ROOF FOR MANY YEARS

Jim Brown EVERITE Roofing has been tested in every climate and under all weather conditions. It has proven so generally satisfactory to my customers all over the country that I am sure it will meet all your requirements for a low-priced, durable, leak-proof, fire-resisting roofing.

TWO-INCH LAP JOINT MAKES TIGHT SEAMS

EVERITE Roofing has the 2 inch water-tight lap-joint which makes cementing easy and prevents leaks at the joints. Comes in rolls containing 108 square feet covering 100 square feet allowing for 2 inch lap. Each roll weighs full 75 to 80 pounds and is furnished in Red, Green or Blue-Black non-fading colors. Be sure to state color wanted.

Supplied with cement and $\frac{3}{4}$ inch roofing nails at no extra cost. If to be used over old roofing or shingles be sure to order $1\frac{3}{4}$ inch nails and add 10c per roll to price quoted.

PROTECTION—BEAUTY—LOW COST

Imagine how attractive your home can be made if roofed with one of the three styles of Armor Coat Slate-Surfaced, brilliant colored Shingles shown on this page. Think of the Beauty, Safety and Permanent Protection this roofing material affords! These shingles are made with high quality long fibre rag felt base, saturated with high grade asphalt and surfaced with bright, non-fading crushed slate—just like Jim Brown Armor Coat Slate Surfaced Roll Roofing. Because the colors are permanent this roofing will not discolor rain water and retains its beauty.

Armor Coat Slate Surfaced Shingles are listed as Standard by the Underwriters' Laboratories. They resist burning embers, flames and sparks and save you about 12% on insurance, compared to wood shingles, in most localities.

Hexagonal Slab Shingles

\$2.39

Hexagonal Slabs illustrated above are furnished in strips 11½x36 inches and weigh approximately 170 pounds per square. Priced by the bundle containing enough slabs to cover 50 sq. ft. exposed surface if laid according to instructions. 2 bundles to the square. Furnished in Red, Green, Blue-Black and Color-Blend (a mixture of red, green, blue-black and tan). Nails must be purchased extra. When applied over sheeting use ¾-inch galvanized nails, 2¼ lbs. per square. Over old Shingles use 1½ Galvanized nails, 3½ lbs. per square. Galvanized nails priced at bottom of page. Be Sure to State Color Wanted.

Cat. No. 3E21—Per Bundle Covering 50 sq. ft. **\$2.39**

4-in-1 Shingles

\$3.09

These 4-in-1 Strip Shingles illustrated at the right give the effect of individual shingles when laid. Furnished in strips 10x36 inches long, 4 shingles to strip. Approximate weight 210 lbs. per square. Easily laid and give a perfect individual shingle effect. Priced by the bundle containing enough strips to cover 50 sq. ft. exposed surface when laid 4 inches to the weather. Two bundles to the square. Furnished in Red, Green and Blue-Black. Galvanized nails must be purchased extra. When applied over sheeting use ¾-inch galvanized nails, 2¼ lbs. per square. Over old shingles use 1½-inch nails, 3½ lbs. per square. Galvanized nails priced at bottom of page. Be Sure to State Color Wanted.

Cat. No. 3E22—Per Bundle Covering 50 sq. ft. **\$3.09**
FREIGHT PAID ON ORDERS OF \$10.00 OR MORE.

3-in-1 Thick Shingles

\$2.05

My 3-in-1 Thick Shingles have a base of long fibre rag felt saturated with hot asphalt and coated with crushed slate. Stronger than ordinary construction and gives much greater protection and longer life.

These shingles are listed as Standard by the Underwriters' Laboratories, Inc., and save 12% on insurance over wood shingles in most localities. They weigh approximately 215 lbs. per square and come in slabs measuring 36 inches by 12 inches and should be laid 5 inches to the weather. When laid directly on sheeting use 1½ lbs. of 1½-inch galvanized nails per square. Over old shingles use 2½ lbs of 1½-inch galvanized nails per square. Nails are priced at bottom of page. Each bundle covers 33½ sq. ft. of exposed surface when laid according to directions. Three bundles cover 100 sq. ft. of roof. Colors: Red, Green, Blue-Black or Green-Blend (a mixture of Green and Red.) Be Sure to State Color Wanted.

Cat. No. 3E25—Per Bundle Covering 33½ sq. ft. **\$2.05**

BRICK EFFECT SIDING

Makes Old Buildings Look Like New!

Jim Brown BRICK EFFECT SIDING

This beautiful and economical new slate surface asphalt roll siding duplicates the appearance of actual brick . . . makes it easy to modernize the face of any old building for very low cost. Roll covers 100 sq. ft., is 32 inches wide, 41 feet long, split in center making two 41-foot rolls 16 inches wide with a selvage edge. For use over any old siding. Rigid Backing Board, listed below, should be used as a base for Brick Siding if surface is rough or uneven, like drop siding—assures a perfect job.

Soldier Course, shown in small illustration at right below, should be used as a base or starting strip—also used as a corner trim by cutting off selvage edge and bending. Comes in rolls containing 141 lineal feet. Weighs 110 pounds per roll. Colors: Both Siding and Soldier Course furnished in Buff or Red. Specify color wanted. Order ¼ pound galvanized nails per roll for laps and 2½ pounds black nails for mortar lines.

POINT EDGE SLATE SURFACED ASPHALT ROOFING

Ideal For Use Over Old Shingles

- Point Edge Is the Lowest Cost of Any Slate or Ceramic Granule Surfaced Roll Roofing.
- Will Give Many Years of Satisfactory Service When Used Over Old Shingles.
- Easily Applied. 4 Attractive Colors.
- Weighs 100 Lb. Per Roll.

ONLY
\$2.85
PER ROLL
100 Sq. Feet

Point-Edge roofing presents the beautiful appearance of individual shingle roofing at a fraction of the cost. Has a long fiber rag-felt base saturated with hot asphalt and surfaced with natural bright colored non-fading crushed slate or Ceramic Granules. It will give many years of protection as thousands of owners will testify.

Point-Edge is recommended for use only over old roofing and not over sheeting. It comes two strips in a roll and covers 100 sq. ft., allowing for a 2-in. lap. Extra heavy—weighs 100 lbs. per roll. Colors: Red, Green, or Gray Black. Also supplied in Color-Blend (a Mixture of Red, Green, Gray-Black and Tan). If Color-Blend is wanted, add 25c per Roll. Nails are not included. Use 1½ lbs. of 1¼-in. nails per roll—see listing on page 50. Full instructions for applying are included. State color wanted.

Insulate YOUR HOME Against Heat and Cold with ROCK WOOL!

CUT FUEL COSTS!

Rock Wool Insulation cuts fuel costs up to 35%—keeps houses warmer in winter and cooler in summer. Made from Molten Rock in fiber form. It is so efficient that a 3-inch layer of Rock Wool equals a 3½ ft. Brick Wall for insulating value. Clean, vermin-proof and will not deteriorate. As fireproof as rock itself! Freight Prepaid on Orders of \$10.00 or More.

LOOSE TYPE

GRANULATED (Pellets)

Loose Type Rock Wool

Lowest cost! For hand packing where batt or blanket type insulation cannot be conveniently used. Comes in form like cotton batten, can be stuffed into any space. Ideal for between floor joists in attic. 36 lb. bag covers 18 sq. ft. 3 inches thick; 27 sq. ft. 2 in. thick; 54 sq. ft. 1 in. thick. Costs about \$25 to insulate the attic of an average 5-room house.

3E1000—36 lb. Bag, **94c**
Only

Granulated Type Rock Wool

Similar to Loose Type above but easier to use—because of its granulated form it can be poured from the bag like sugar for insulating floor and ceiling joists and for between walls. Easily leveled to the thickness you want. Coverage is the same as loose type Rock Wool above, slightly higher in cost but saves time in applying. In 36 lb. Bags. Freight Prepaid on \$10.00 Orders.

3E1005—36 Lb. Bag, **\$1.26**
Only

BLANKET TYPE

ROCK WOOL BATTS

Blanket Type Rock Wool

Comes in rolls 1 or 3 inches thick. Has waterproof Kraft paper with nailing flange on one side, other side and edges are covered with very strong wrinkled Kraft wax paper. 15 inches wide. Orders of \$10.00 or More

More Than HALF A MILLION Gallons Used

Thousands of home owners have used Wearbest House Paint for many years, and they say that my Wearbest Paint is the best they have ever seen at anywhere near my price. It has stood the test of time on all kinds of buildings in practically every part of the country . . . that is why I can make such a strong, unqualified Guarantee! I know that Wearbest House Paint will give you a beautiful job, will save you money, and provide long-lasting protection.

QUALITY in Every Brush-Full

The first brush full of Wearbest House Paint that you put on will convince you that it is FRESH paint and one of the easiest spreading paints you ever used—that it covers more surface and hides better than some paint selling elsewhere for \$1.00 more per gallon. For instance, it takes only six gallons of Wearbest to give an average size five-room house a TWO COAT job of painting, if the surface is in good condition. That is REAL economy! Wearbest House Paint is made of Pure Lead, Pure Zinc and other reinforced pigments, ground in pure raw Linseed Oil and mixed with other high grade oils and the necessary amount of thinner and drier.

Gives Lasting Beauty—Lasting Protection!

Wearbest dries to an even tough glossy finish, hides well and forms a long lasting coat of protection that will give years of satisfactory service. One gallon covers about 300 sq. ft. of surface, Two Coats. I advise you to figure your paint needs now and take advantage of my present low price. Remember, I pay the freight on all orders of \$10.00 or more, another big saving for you. See page 57 for high quality paint brushes at very reasonable prices.

MY GUARANTEE!

I guarantee that you will be thoroughly satisfied with the Jim Brown Wearbest House Paint you purchase, providing you follow directions when applying it.

After completing your painting, if you are not delighted with results, I will refund your money or replace the paint free. If you do not receive the number of years' service you have a right to, expect from Wearbest House Paint, I will make an adjustment that will make up for the difference.

You Can't Buy Better or Purer Paint at Any Price

PURE
HOUSE PAINT

READ MY FORMULA
READ MY GUARANTEE
NOTE MY PRICES AND SEE HOW MUCH YOU SAVE!

It isn't the name of the manufacturer that covers your house, but the paint that's in the can. All I ask is that you compare my formula with that of any other paint on the market. That will tell you the story of quality regardless of any claims that anyone may make.

Lead—Zinc—Titanium—Linseed Oil

You will note that in my formula I use 67% Pigment. This Pigment consists of 58% White Lead; 17.1% Titanium Magnesium Pigment; 24.9% Zinc Oxide. This is considered to be a perfect balance of White Lead, Zinc Oxide, and Titanium Pigment, in fact, if you will refer to Federal Specifications TT-P-101A, you will find that Pigment percentages conform to government specifications for this type of paint.

One Gallon Covers 400 Sq. Ft., 2 Coats

Everyone agrees there is nothing like White Lead. It dries to a soft film, which sheds dirt and which deteriorates by oxidization, leaving an excellent surface for re-painting. The addition of Zinc Oxide to White Lead makes the film harder, thus reducing the tendency to get dirty. By adding the new wonder pigment, Titanium, greater whiteness and hiding power are obtained. You will also note that the liquid or Vehicle amounts to 33% of the total contents in the can. This consists of 90% Linseed Oil and 10% Thinner and Drier. Thus, from every conceivable standpoint my 100% Pure Paint is the ideal paint!

HOW TO FIGURE THE AMOUNT OF PAINT YOU WILL NEED FOR YOUR PAINT JOB

Under average conditions, Jim Brown Paints will cover the number of square feet per gallon mentioned in each description. However, it may require from 10 to 15% more, if the surface is old and has never been painted before or if it has been painted before and the surface is in poor condition.

The number of gallons required can be determined by multiplying the distance AROUND the building by the HEIGHT. Then divide by the number of square feet ONE gallon will cover. Example: a building 30' wide x 45' long x 20' high would figure as follows: $30 + 30 + 45 + 45 = 150' \times 20' \text{ high} = 3,000 \text{ sq. ft. of surface}$. Divide this by number of sq. ft. of surface a gallon will cover, and your answer is the number of gallons required.

HERE'S MY 100% FORMULA

Pigment	
White Lead	58.0%
Titanium Magnesium Pigment.....	17.1%
Zinc Oxide	24.9%
100%

Jim Brown's HIGH QUALITY SOYA BEAN HOUSE PAINT

Direct from the Farm comes the amazingly useful Soy Bean Oil which makes this splendid house paint so Elastic, so Tough, so Durable—and so LOW-PRICED.

When Paint Chemists found that Soy Bean Oil is *ideal* for paint-making, that it has all of the protective, life-giving qualities of other oils once used exclusively in making quality paints, they made one of the most IMPORTANT discoveries in paint history! It enabled them to develop Fine Quality House Paint out of the products of American farms . . . it opened another market for thousands of farmers who are profiting from soy bean culture. I am happy to offer this new high-quality, low-price paint, and to have a share in helping increase farm income.

AS LOW AS

\$1.48
PER GALLON

One of the Most Durable Paints Made!

- Contains over 20% Soy Bean Oil blended with pure linseed and other high-quality oils.
- Dries to a tough, flexible finish that resists sun, wind, rain, cold, and the ravages of time.
- Spreads easily, covers thoroughly and goes farther per gallon than many higher priced paints. Cuts the cost of house painting!
- The white is as white as snow, and all the other colors are beautiful to behold.
- Wears evenly by oxidation — doesn't crack, chip, check, or chalk — leaves the surface in good condition for repainting.
- Costs little to buy because Jim Brown is satisfied with a very small percentage of profit.

Soy Bean Oil Paint is long past the experimental stage; it is recognized as one of the finest paints now on the market. Linseed oil, Chinawood oil and certain fish oils were once used *exclusively* in the manufacture of house paint . . . but TODAY Soy Bean Oil has proved that it meets every good paint requirement! It has all the toughness, elasticity, and protective properties of the costlier oils, but *unlike* them, it can be produced in America at low cost. It carries my *Guarantee of Satisfaction*.

The vehicle or liquid in Jim Brown's Soya Bean House Paint contains over 20% Soy Bean Oil, effectively blended with linseed and other oils and driers to make it a perfectly balanced paint.

Spreads Easily and Covers Well

Jim Brown's Soya Bean House Paint spreads easily, and can be thinned out with linseed oil for a first coat. It dries to a hard, tough, surface and does not scale, chip or crack—it weathers evenly, so when time comes for refinishing the surface will be in excellent condition for the new paint job! This paint covers about 250 sq. ft. per gallon, 2 coats, depending on the surface. It is made in White, and 12 of the most popular colors as listed in the table at the right. See Page 53 for *How to Figure Amount of Paint You Need for Your Paint Job*.

Jim Brown's Money-Saving BARN PAINTS

WEARBEST SUPER-GRADE

I am proud to put the name of Jim Brown on the label of my Wearbest Barn Paint. I am proud of the quality, because years of use have proved it an excellent protective paint that looks well and lasts as long as many costing more.

I have sold my WEARBEST Barn Paint to farmers in every section of the country. They know that it really lasts, really protects and really looks fine in spite of its low prices. That's because it has quality oil and quality pigment in it, and is mixed by men who know how! My reputation for fair and square dealing which dates back over 50 years, assures you complete satisfaction.

Look at your barn. It is costing you big money not to paint it. Just a few dollars invested in WEARBEST Barn Paint will make it look like new—will protect it for years, will make your entire place worth more. Just measure the size of your barn and see how little it will cost to give it a brand new coat.

One gallon of Wearbest Barn Paint covers about 300 sq. ft. 2 coat work and covers it well. How to figure paint required shown on page 53. Remember, my prices are freight prepaid on orders of \$10.00 or more.

Paint means a lot more than merely making your barn attractive! It is the best insurance against rot and decay. It makes your buildings look better, adding to their value, but the main job of paint is to protect and preserve the wood, adding to its life, saving money and repairs.

Many people want nothing but the best regardless of price. To meet that demand my Super-Grade Barn Paint was formulated. It meets every requirement of a tough, durable, attractive, protective Coating for your barn. It spreads easily, covers thoroughly, brushes out over a large area and dries with a good color.

If you have a new barn start right by giving it a coating that will properly seal the pores of the wood and give you a surface which will withstand the elements for years. If you have an old barn that is thirsty for a new coat of paint why not use the best since my Super-Grade costs so little?

Be sure to state color wanted.
Under average conditions one gallon of Super-Grade Barn Paint covers 350 sq. ft. two coats. How to figure paint required shown on page 53.

Jim Brown's

WHITE BARN PAINT

This beautiful, new White Barn Paint has all the toughness and durability of old style super quality barn paints, but is just as clean, clear, and Snow White as the finest white house paints. White Barn Paint is thick and full bodied; is made from higher quality oils than are used in most colored barn paints, and will give better protection to the surface.

It brushes on easily and covers well. Weathers evenly by oxidation, so even when repainting is finally necessary, the surface will be in an excellent condition for the new job. Does not scale, chip, crack or chalk. Can be thinned out with linseed oil for the first coat.

White Barn Paint covers about 250 sq. ft. per gallon, 2 coats, depending on the surface. See Page 53 for How to Figure the Amount of Paint Required.

Jim Brown WHITE CREOSOTE PAINT

THE GREATEST PAINT SENSATION IN MANY YEARS

This paint is in a class by itself. It is noted for its beautiful soft-tone, velvety finish, and for its penetrating and preserving qualities.

Creosote has long been recognized as one of the best protections for wood, but heretofore, it could only be obtained in its original dark, grimy state. Now Jim Brown offers you SPOTLESS WHITE CREOSOTE PAINT. And considering its excellent quality, its price is exceptionally low.

With my White Creosote Paint you will not be troubled with flaky particles absorbing moisture which will cause decay. Neither will my White Creosote Paint become gray and streaked like whitewash, after a short time.

Jim Brown White Creosote Paint has the uniformity, the durability and the weather-resistance of a linseed oil paint, yet its low price will enable you to "paint up" your premises without any burdensome outlay.

For Inside or Outside Use

My White Creosote Paint is especially desirable to use on wooden fences and on buildings inhabited by livestock because it is non-poisonous if livestock should lick it. This paint will help keep your stables and buildings sanitary as it repels vermin, such as lice, etc. White Creosote Paint is equally suitable for inside or outside use and is especially recommended for barns, hog pens, hen houses, kennels, garages, basements, out-buildings, fences, trellises, etc. It can be applied successfully to either smooth or rough surfaces. One coat is generally sufficient unless the wood is very absorbent.

Beauty for Small Cost

You can now make your premises the most attractive in your neighborhood, at small cost. Just think, on dressed lumber one gallon will cover about 250 to 300 sq. ft., 1 coat work; for rough lumber figure about 150 to 200 sq. ft. If two coats are wanted, figure 50% more paint. *How to Figure Paint Requirements Shown on Page 53.*

Comes in White and 3 Other Colors

Can be supplied in WHITE, LIGHT GRAY, RED and BRONZE GREEN. BE SURE TO STATE COLOR WANTED, OTHERWISE WE SHALL SHIP WHITE. Orders of 5 gallons or more supplied in 5 gallon cans as far as possible.

SHINGLE STAIN

Jim Brown Wearbest Creosote Shingle Stain is a penetrating preservative, non-fading stain for use on Shingles, Rough Siding, Fencing, Trimmings, Clapboards, exterior Sheathing, etc. It is the most preservative and cheapest exterior coloring available for beautification and preservation of wood shingles and other exposed wooden surfaces.

My Super Grade Shingle Stain is the very best made, representing the best combinations of Creosote, Linseed Oil with non-fading coloring matter and necessary penetrative and drying properties producing the very utmost in long life, durability and beauty.

One gallon covers about 75 sq. feet with two coats when applied with a brush. For dipping it requires 3 gallons per thousand shingles. Both Wearbest and Super-Grade Shingle Stain are supplied in the following colors: Red, Special-Brown, Light Green and Gray. When Ordering Be Sure to State Color Wanted.

A light colored shingle stain should not be used on a dark surface.

Freight Paid on Orders of \$10.00 or More

Jim Brown Safety EXTENSION LADDERS

APPROVED BY SAFETY ENGINEERS EVERYWHERE

Make no mistake on your ladder purchase. Avoid ladder accidents due to defective materials and faulty constructions by sending me your order for one of my safety TRUSS RUNG EXTENSION LADDERS. Every Jim Brown SAFETY EXTENSION LADDER is made under specifications which have been approved by SAFETY Engineers everywhere. They have many features not usually embodied in ordinary ladders... features which make them Extra Big Values at my low prices.

Reinforced and Braced with Steel Truss Rungs

Rails with shaped ends are made from carefully selected Western straight grained Fir, and measure full 1½ x 2½ inches when finished. The rungs are from carefully selected, thoroughly seasoned second growth hickory and a ¼-inch steel Truss Rod under the top, middle and bottom dowel of each section firmly ties the side rails together adding greatly to the sturdiness and long life of Jim Brown Ladders.

Wide-Spread Bottoms Prevent Tipping

Jim Brown Safety Extension Ladders are equipped with Cadmium-Plated metal parts insuring longer life and have a wide spread at the bottom to prevent tipping. Two heavy roller guides and two plain guides at top make them extra easy to handle. Heavy malleable automatic lock. Order Jim Brown Reinforced Extension Ladders for extra safety. Freight Prepaid on Orders of \$10.00 or More.

WASHABLE INTERIOR FINISHES

Ideal for Walls and Woodwork!

Washable SOFTONE FLAT WALL PAINT

Jim Brown Softone is a high-grade, flat oil finish paint for interior use. Produces a soft, velvety, washable finish on woodwork and plastered walls. Softone is easy to apply, hides the old surface perfectly, dries to the touch in from six to eight hours and wears exceptionally well. Makes a splendid background for pictures, room furnishings, etc. Can be kept clean and attractive with mild soap and water washing. May also be used as an undercoat for enamel. When used on plastered walls a coat of Jim Brown Wall Size, described below, should first be applied.

One gallon of Jim Brown Softone Flat Wall Paint covers 250 sq. ft. 2 coats. Attractive colors: Coral, Ivory, Cream, Pearl Green, Pea Green, Dove Gray, Holland Blue, French Orchid, Buff, White. Be sure to specify color wanted when ordering. For Paint Brushes, see page 57. Prepaid, see NOTE below.

MODERNIZE YOUR HOME with E-Z FLO ENAMELS

DRIHARD ONE COAT-4 HOUR Gloss ENAMEL

Ideal for Woodwork,
Walls, Furniture and
All Inside Use

LOOKWELL WASHABLE Semi-Gloss ENAMEL

Produces a Very
Durable and
Colorful Finish

THE ENAMEL FOR UNIVERSAL USE

- Fast drying! Dries hard in only 4 hours.
- One coat of Dri-Hard covers perfectly.
- Can be used both inside and outside.
- High Quality! Equals enamels that sell for as high as \$1.50 per quart.
- Made in White and 12 Beautiful Colors.

DRI-HARD is a bright, beautiful, general purpose enamel for use on walls, woodwork, furniture; either inside or outside. An ideal finish for any surface where you need a durable, full gloss finish that can be washed repeatedly without destroying the luster. Dries hard in only 4 hours and is so easy to apply that it actually is fun to use.

You will be delighted with Dri-Hard because of its fast drying qualities and its unusual covering capacity. One gallon covers about 450 sq. ft. one coat. You can make breakfast sets and similar furniture look like new with Dri-Hard for just a few cents cost. Will not chip, peel, blister or crack. Furnished in white and 12 vivid up-to-the-minute colors. Colors: Ivory, Cream, Deep Blue, Sky Blue, Pea Green, Dark Green, Brown, Vermilion Red, Orange, Orchid, Gray, and White. When ordering be sure to specify color wanted.

Look Well Semi-Gloss enamel has been a favorite with hundreds of my customers for years because of its durability, its surface-hiding qualities, and because it flows on easily leaving no brush marks. It can be used on practically any interior surface.

Look Well Semi-Gloss enamel is especially well suited for decorating kitchens and bathrooms. Its smooth, semi-gloss finish can be repeatedly washed without losing its luster. Coverage is exceptionally good; one gallon covers from 250-300 sq. ft. of surface, 2 coats. Colors: Coral, Ivory, Cream, Pearl Green, Pea Green, Dove Gray, Holland Blue, French Orchid, Buff and White. When ordering be sure to state color wanted.

Jim Brown PAINTS, VARNISHES and ENAMELS

For Floors - Porches and Woodwork

Has a tough varnish base! Forms durable, elastic, water-proof coating that defies wear and weather. Brushes on easily and dries hard overnight.

Famous WEARBEST \$2.78 FLOOR and DECK ENAMEL

Per Gallon
In 5-Gallon Pails

For 50 years Wearbest Floor, Porch and Deck Enamel has been known as an ideal finish for interior or exterior surfaces. It's a wonderful protector and beautifier on wooden or composition floors, and also for linoleums. Wearbest provides a brilliant high gloss, wear-resisting finish that makes it especially suitable for use on porch floors, steps, railings, concrete, cement and other exterior surfaces—as well as for interior use.

RESISTS HEAVY TRAFFIC WEAR

Wearbest Enamel seals ordinary cracks, finishing to a hard, tough, elastic lustrous surface that will resist traffic wear and frequent washings far better than the usual type of floor paint. I do not know of a higher quality floor finish! One gallon covers about 250 sq. ft. 2 coats. Furnished in the following attractive and durable colors: Light Gray, Dark Gray, Dust, Yellow, Medium Brown and Deep Red. Be sure to specify color wanted.

SPAR VARNISH

My Spar Varnish is a pale, heavy-bodied Varnish of great toughness, elasticity and durability. It is recommended for use on both exterior or interior surfaces. It is waterproof and weather-proof, retaining its luster under the most severe atmospheric conditions. Resists washing and sunlight and is particularly well adapted for use on front doors, exposed window sills, porch ceilings and porch furniture. Will not turn white when exposed to hot water.

One gallon covers about 550 sq. feet, one coat.

VARNISH STAIN

The Miracle Finish—
Stains and Varnishes in
ONE Operation!

Bring the charm of harmonious modern new color into your home with the use of Jim Brown Varnish Stain! Odd pieces of furniture may be finished to match perfectly at very little cost, and woodwork, floors, and stairways may be brightened to harmonize with the furniture. Varnish Stain is very easy to apply, brushes on smoothly and covers evenly. I recommend that you use one of my Varnish Brushes shown on page 57.

Unusually Good Coverage

New surfaces should be given two coats allowing 24 hours between each coat. For old or worn surfaces, or when applying a light color over a dark, use an undercoat of Sav-A-Floor Ground Color Undercoat described below, and then one or more coats of Varnish Stain to get the desired shade. One gallon covers about 500 sq. ft. one coat. Furnished in Light Oak, Dark Oak, Walnut, Mahogany, and Clear. Be sure to specify color wanted when ordering. Save YOUR ROOFS!

MAKE THEM LIKE NEW THIS EASY WAY—AT SMALL COST

DON'T WAIT UNTIL YOUR ROOFS ARE "GONE." Look them over now. If they are beginning to dry out give them a coating of Jim Brown's Roof Saver. Even if your roofs leak, Jim Brown's Roof Saver will repair them and make them as leak-proof as when they were new, quickly and easily!

Jim Brown's Roof Saver flows into all the cracks, plugs up and seals all the seams and nail holes. It penetrates down into any and all the dried out felt making it completely waterproof. It forms a solid covering of waterproofing over the entire roof surface which acts as a weather buffer and preserves the durability of your roofing indefinitely for only a few cents a square. Jim Brown Roof Saver stops expensive repair bills. It's the most economical way to rejuvenate and preserve your roofs.

Use Jim Brown Roof Saver on Asphalt Composition, Gravel and other Roofs. Works exceptionally well on old exposed asphalt roofing surfaces which have been subjected to deterioration and disintegration from the effects of the weather, heat, moisture, wind, cold, dryness, and neglect. The sun, light and heat evaporate and draw the solvents out of the roof resulting in cracking, hardening and general decay which finally exposes the felt base causing it to rot and develop leaks. Jim Brown's Roof Saver replaces the asphalt which has weathered out of your old roof.

Jim Brown's

CONTAINS NO TAR—NO RUBBER—NO LEAD!

Jim Brown's Roof Saver contains NO TAR, NO RUBBER, NO LEAD and does not discolor or taint rain water. This excellent product will preserve a roof better and remains soft and flexible for a greater length of time because it is made of specially prepared WATER-PROOFING ASPHALT and the proper amount of ASBESTOS FIBRE selected for its binding qualities. It contains the largest percentage of waterproofing asphalt per gallon and will give you a greater amount of waterproofing value for your money than any other similar roof coating that I know of. My Super Grade contains Soya Bean Oil.

STICKS LIKE GLUE—EASY TO APPLY

Jim Brown's Roof Saver will not run off the roof in Summer or crack, chip and break loose in Winter. It will adhere to the surface, remain flexible and pliable and withstand exposure for many years.

No expensive labor is necessary to apply Roof Saver. Put it on right over your old roofing just as it comes from the container. All that is needed is an ordinary paint brush or if covering a large surface you can save time and labor by using my Roofing Brush shown on next page.

For large holes and cracks, and for use around flashings, use my PLASTIC CEMENT, which is a HEAVY material and is spread with a knife or trowel. See next page.

ASPHALT ROOF SAVER

SAVE YOUR CROPS—SAVE YOUR BUILDINGS!

Leaky roofs spoil fodder and grains, rot sheeting and supports. Why take chances with your roofs when you can make them like new at such a low cost per square with Jim Brown's Roof Saver?

Jim Brown's Roof Saver can be applied on composition, felt or gravel roofs. It requires 1 to 1½ gallons per 100 square feet for ordinary roofs. For gravel roofs or slate surfaced roofing 3 to 3½ gallons to each 100 square feet. Also used for gutters, downspouts, skylights, tanks, silos and building foundations. Roof Saver is not recommended for use on metal, composition shingle or wood roofs. For wood shingles use my Shingle Stain shown on page 56 and for metal roofs I recommend my New Life Roof Paint, my Black Asphalt paint, my Metal Preservative paint, or my Rust Proof paint—all shown in this Paint Section of my catalog.

TWO GRADES TO CHOOSE FROM —BOTH ABSOLUTELY GUARANTEED!

Jim Brown's Roof Saver is made in two grades. My Super Quality contains Soy Bean Oil which is a product of American Farms and which has proved its merit for years in the formulation of many outdoor paints. My E-Cono-Me Roof Saver is equal to any I have ever seen except my Super Quality and is thoroughly satisfactory. Money back if either grade doesn't do the work!

PLASTIC CEMENT FOR PATCHING

Plastic Cement is thicker and heavier than Roof Saver. You put it on with a trowel or big broad blade knife. It's just the thing to seal up the big cracks—filling in around the chimney—sealing worn-out flashings—filling in foundation cracks—stopping leaks in cisterns, tanks, etc.—glazing windows—in fact, there are so many everyday uses for Plastic Cement that you should never be without it. Wonderful for filling holes.

Stops Rust Action—Prevents Further Rust

Almost every farmer and home owner in America has dozens of jobs every year where my Rust-Proofing Metal Paint will save him money! This amazing new paint can be applied directly over rust . . . it not only provides a coating for rusted surfaces, but actually cuts off the outside moisture and stops its progress. Permits the application of additional finish coats, with complete assurance that the paint will not "rust off" from underneath. Withstands fumes from acids and alkalis which ruin ordinary paints, and is especially resistant to salt air. Literally *hundreds* of uses . . . For farm machinery, tanks and towers, metal roofs and siding, windmills, bridges, ventilators, radiators, plumbing.

Saves Hours of Back-Breaking Labor

It's *almost impossible* to remove old rust from large or uneven surfaces, and with my new paint it's *not necessary!* You simply apply this paint directly over the rust . . . this paint then combines with the rust, shuts off the air and stops corrosive action. The inert rust actually becomes a part of the protective coating! Loose rust, of course, should be wire-brushed off before paint is applied.

Economical to use. Covers about 600 sq. ft. per gallon, in one coat work over a smooth surface. Dries to the touch in 2 to 4 hours. May be brushed, sprayed or dipped. Furnished in Red, Gray, or Black at prices shown. If GREEN is wanted, add 25c per gallon or 10c per qt.—*Be Sure to Specify Which Color Is Wanted When Ordering.*

Special

PRESERVATIVE METAL PAINT

As Low As

\$1⁵⁵
Per Gallon

My Special Preservative Metal Paint is used to prevent rust and corrosion on any metal or iron surface. It is especially intended for use on metal roofing and siding, gutters, down-spouts, tanks, windmills, steel fence posts, etc. Wherever "Tinner's Red" is called for this Special Paint can be used at a big saving in cost. Can be used either as a primer or as a finish coat, and is especially recommended for painting *new* metal surfaces where my Rust-Proofing Metal Paint is not required to cover up old rust.

Positive Protection at Low Cost

The fine preservative quality of this paint is due to the Synthetic Gum, Chinawood Oil, Linseed Oil and other effective, long-wearing oils from which it is made. It forms a tough, elastic film of protection which withstands sun and rain, ice and snow. Contains no lead or tar, will not chip or crack under sudden changes in weather!

Can be easily applied with a brush or mop. One gallon covers about 375 sq. ft., two coats. Furnished in attractive Green or Red. Colors are permanent and even the Green will not fade or discolor. Does not affect rain water. Don't confuse my Preservative Metal Paint with cheap products that wash off and crack easily . . . this is **Not** a cheap paint, but a good paint at a low price—I guarantee it to give satisfaction.

TRIPLE THICK NEW LIFE ROOF PAINT

**ONE COAT IS AS THICK AS THREE
COATS OF ORDINARY PAINT!**

New Life is a heavy bodied, high gloss paint which can be applied with a brush and which spreads a thick rubber-like coating which dries hard on the surface but remains flexible underneath, expanding and contracting without cracking. New Life should not be confused with thin black paints you sometimes see as New Life covers thoroughly with only one coat.

As Low As

57^c Per Gal.

Excellent Waterproofing for Any Surface

New Life forms a durable, protective coating on most any surface making it water-tight and weather proof. It restores natural oils to dried out felt or composition roofs and greatly prolongs the life of new roofing. Prevents formation of rust on metal roofs, reducing upkeep expense. Adheres to wood, concrete or stone and is frequently used for waterproofing foundations, silos, auto tops, etc.

Contains no lead, tar, acid, or other ingredients which might taint or discolor rain water. Covers about 175 sq. ft. per gallon on ordinary surfaces. New Life is furnished in either black or red. The red is a dark red but, unlike some other red asphalt paints, New Life will stick on metal surfaces as well as black. I prepay the freight on orders of \$10 or more.

BLACK ASPHALT PAINT

Handiest All-Purpose Paint on the Farm

My Black Asphalt paint is made in two qualities, SUPERGRADE AND UTILITY. Either quality has hundreds of uses around the farm, shop or home.

As Low As

33^c Per Gal.

My Super-grade Black Asphalt Paint is a wonderful inexpensive "all around" liquid asphalt preservative paint, especially suited for rubber, asphalt, felt or paper roofing. Also prevents rust on metal and protects wood against rot and decay. The lowest priced paint we ever heard of, yet good enough for any surface where a black asphalt paint is required. Contains no tar or lead, and will not discolor or taint rain water. Has a good "body," spreads evenly, covers about 175 sq. ft. per gallon and gives real protection where a black paint serves the purpose.

UTILITY AND SUPER-GRADE BLACK ASPHALT PAINT

"Utility" covers about 100 sq. ft. per gal. "Super-grade" covers about 175 sq. ft. per gal.	Utility Grade Cat. No. 5E6	Super-Grade Cat. No. 5E7
50 Gal. Barrel	33c per gal.	48c per gal.
20 Gal. Keg	40c per gal.	57c per gal.
15 Gal. Keg	45c per gal.	60c per gal.
5 Gal. Can	47c per gal.	62c per gal.
1 Gal. Can	59c per gal.	74c per gal.

Freight Prepaid on Orders of \$10.00 or More

My "Utility" grade Black Asphalt Paint covers about 100 sq. ft. per gallon. It is an extremely low priced "utility" paint for all purposes where a black paint is suitable. Sticks to wood, metal, stone, or any kind of composition roofing.

BIGGEST YEAR IN HISTORY

Get YOUR Share Of The Extra Profits—

WHY POULTRY PROFITS WILL BE LARGER

America is going "All-Out" for defense, and this means we are embarked on the biggest Food Production Program in our nation's history!

Cash farm income from poultry products in 1942 probably will be the largest in history, according to the U. S. Dept. of Agriculture, and while costs will be somewhat higher than in 1941, they probably will NOT increase nearly as much as poultry income. There will be extra profits.

The government has asked for increased production of poultry both for eggs and meat. Secretary of Agriculture Wickard has announced that 500,000,000 DOZEN eggs and 18 million pounds of poultry meat have been pledged to Great Britain alone. This is in addition to our own much increased requirements. Over 100 million pounds of eggs will be used in powdered form—almost TEN TIMES normal needs! More Poultry will be used in ALL forms.

With laying flocks on the farms only slightly larger than last year, this tremendous demand for poultry products is a Big Opportunity for those who have Eggs and Poultry to sell. They are bound to profit!

SUPER GRADE CHICKS

Nearly 20,000,000 chicks have been purchased from Jim Brown in the past 13 years which proves that my customers have been satisfied with my baby chicks, and have told their friends about our fine service and wonderful quality. I am getting repeat orders every day from my old customers with wonderful testimonials about their flocks, and the money that these Jim Brown's Super-Grade chicks brought them when they matured, through good egg production and fine meat. It does not cost a cent more to raise good quality chicks, so why not order your chicks from Jim Brown and be more sure of having success, of making extra profits.

Do not hesitate to write to Jim Brown if you have any problems on feeding, general care, brooding, or selecting the breed to make the most profit with, as he will be glad to give you his advice on any subject you may desire more information on.

More Eggs at Less Cost

These Super-grade chicks should not be judged by my low prices. They are worth MUCH MORE by all the accepted methods of determining value! Every flock is blood tested. Every flock is carefully culled by experts. Cockerels from high-record hens are placed in every flock. Every hen is selected for shape, color, egg size, production, and vitality. If you want MORE EGGS than you ever got before from your pullets, and yet pay only a LOW PRICE for baby chicks, I recommend my Super Grade as being the BEST BRED, BEST HATCHED, QUICKEST-GROWING, HEALTHIEST chicks you can buy at anywhere near my low prices!

My Chicks Make Good!

Remember, my guarantee of 100% live delivery or free replacement, and my 53-year reputation for fair and square dealing are back of every shipment of Jim Brown's Baby Chicks. Besides, thousands of my customers know from actual experience that my Super-Grade chicks MAKE GOOD! Order early. Send remittance with order, or if you prefer, I will ship C.O.D. Sex-separated pullets are guaranteed 90% true to sex. If less than 90% I will refund the difference between straight-run and pullet price. Cockerels not guaranteed as to sex because of their low price. Chicks are shipped POSTPAID.

BABY CHICKS are SENT POSTPAID and SHIPPED C.O.D. IF DESIRED

AHEAD FOR POULTRY RAISERS

Earn More! Raise Jim Brown QUALITY Chicks!

WHY JIM BROWN CHICKS BOOST YOUR PROFITS

- They are backed by Jim Brown's reputation for fair and square dealing.
- Every chick comes from Established, QUALITY Hatcheries—every chick is from blood-tested flocks from which all reactors have been removed.
- All eggs for hatching Jim Brown Chicks must weigh 23 oz. or more per dozen.
- Every Jim Brown Chick is strong, healthy, fluffy, well-bred and well-hatched and is carefully inspected and graded before shipment is made.
- 100% Live Delivery Is Guaranteed . . . no matter what grade chicks you buy.
- Every flock is carefully culled at regular intervals in accordance with the high standard of perfection in the minds of Experts who do the culling.
- Each flock has been improved through High Egg Record Strains.
- All current stock has been selected for Vitality, Vigor, and Uniform Size.
- Exceptional Performance of flocks from which Jim Brown Chicks come means faster growth, high egg production . . . extra profits for YOU.
- OTHERS make more; YOU are bound to make more profits with Jim Brown Chicks!

TRIPLE-X QUALITY

My Triple X Quality is the "AA" grade chick which is just what you are looking for, if you do not want the cheapest grade, and yet do not want to go into the pedigree stock. The trend the past year has been toward better stock and this year it will bring you more money than ever before, as the markets will be big for all available poultry and eggs.

Blood Tested and Culled

The flocks from which the eggs come are all blood tested, carefully culled and headed by cockerels whose dams had HIGH EGG RECORDS. Every one of these flocks has been IMPROVED from year to year according to plans which produce bigger, healthier, heavier-laying and quicker-growing birds.

Big, Fluffy, Lively Chicks

The chicks, you get when you order my Triple-X grade will be big, fluffy, lively! They will have the kind of BREEDING back of them that produces regular EGG machines. The first glance will tell you they LOOK like the kind of chicks you've always wanted—and as they grow, mature and begin to lay, YOUR EGG BASKETS will confirm your judgment!

Watch Them Grow

The only reason I cannot give you a more detailed description of these chicks is because I get them from several different hatcheries, but I am confident ALL of these are the BEST chicks you can get at anywhere near my prices. Wait till you SEE them and WATCH THEM GROW! You will wonder how I can make such low prices for such high quality.

Don't Delay! Order Now!

Order early. I will gladly ship C.O.D. if desired. Be sure to state what varieties you want and WHEN you want them. Sex separated pullets are guaranteed 90% true to sex. If less than 90% I will refund the difference between straight-run and pullet price. Cockerels not guaranteed as to sex. 100% live delivery guaranteed or I will refund or replace up to the number of chicks ordered.

PAY STREAK CHICKS

PRODUCED IN A U. S. APPROVED HATCHERY

CHAMPION MATINGS THAT MEAN MORE EGGS!

What U. S. Approved means to you! All breeding flocks and hatchery operations are inspected and approved, under rules and regulations set up by the U. S. Dept. of Agriculture. All statements made in our advertising regarding this breeding program have been verified by the official agency. You will find that U. S. Approved Chicks are Extra Profit Makers.

Pay Streak Champion Strain baby chicks are for folks who can afford to pay a little more and want a LOT more than "just chicks." Since 1909 the Pay Streak Strain has been famous for high production, large egg size, and BIG PROFITS TO POULTRY RAISERS. Since 1928 Pay Streak birds have been establishing outstanding records in National Contests. Since 1937 all contest entries have been from regular Pay Streak Champion Mating Breeding Flocks. Pay Streak has had TWO National Laying Champions, including all breeds and all contests. They have won the Poultry Item trophy for highest average of 50 birds in all standard egg contests in the United States, and the American Poultry Journal trophy for highest hen. The Pay Streak Strain chicks YOU will get are from the same families of hens in competition NOW at Georgia, Florida, New York, Michigan, Maine and Pennsylvania Laying Contests—pens which may well prove to be WINNERS, based on past history! In 1941 a Pay Streak White Rock Hen won special distinction by being Highest White Rock Hen in the Florida test for the year, being the only one to ever produce 300 points at the Florida Contest; scoring 279 eggs, 304 points. The Pay Streak Pen of White Rocks was the Highest White Rock Pen for the year at the Florida Contest. All Pay Streak flocks have been individually bloodtested for pullorum disease by the Stained Antigen Method and all reactors removed. Each breeder is carefully selected by a trained poultry expert.

U. S. Approved Pay Streak "AA" Mating Chicks in 6 special profit breeds listed below carry the blood lines, and in practically all cases, are the direct offspring of our AAA flocks. The males and females are fine specimens of their breed, and have been selected for health and vigor. All eggs set weigh 23 oz. to the dozen and up. Back of these chicks are years of selective breeding for high quality. Each individual meets rigid requirements for size, uniform type and uniform color.

ONLY REAL PRODUCERS WIN BLUE RIBBONS AT BIG POULTRY SHOWS! PAY STREAK CHICKS WILL INCREASE YOUR PROFITS.

PAY STREAK WHITE LEGHORNS

Produced in a U. S. Approved Hatchery

In 1936 a Pay Streak White Leghorn was U. S. White Leghorn CHAMPION, all contests, with official record of 322 eggs, 347 points. Descendants of this bird are now in Pay Streak Champion Mating Flocks. Since 1928 Pay Streak White Leghorns have won DOZENS of NATIONAL HONORS for high ranking pens and hens. In TWO years Pay Streaks were named HIGHEST WHITE LEGHORN PEN IN U. S. in all contests. The Pay Streak Leghorn chicks you will get are from breeding flocks headed by male birds from dams or sire's dams that laid 200 to 315 eggs per year, all eggs weighing 24 oz. or more per dozen. Males and females have been individually selected for size, type and vigor.

PAY STREAK BARRED ROCKS

Produced in a U. S. Approved Hatchery

Foundation breeding stock purchased from the trapnest pedigree pens of some of America's outstanding breeders. Pay Streak Champion Mating Barred Rocks now are big, heavy laying birds. Males weigh up to 9 and 10 pounds, females 6 to 8 pounds. Males heading Champion Matings are all sons of pedigreed sires whose dams have records of 250 to 293 eggs. Especially selected for large size, heavy production of large sized eggs, high livability, fast growth and early maturity. These are among the finest Barred Rocks in America.

PAY STREAK WHITE ROCKS

Produced in a U. S. Approved Hatchery

Since 1932, Pay Streak White Rock contest entries have won HIGH HEN, HIGH PEN at Pennsylvania, HIGH PENS at Florida and Georgia, twice at New York. High hens established official contest records as high as 289 eggs. Birds for Pay Streak Champion Mating breeding flocks are individually selected and include many descendants of these champion layers. All males heading these flocks are from contest hens with records of 185 or more large brown eggs. Order these White Rock chicks and boost your poultry profits!

PAY STREAK RHODE ISLAND REDS

Produced in a U. S. Approved Hatchery

One contest pen of Pay Streak Champion Mating S. C. Rhode Island Reds established the remarkable record of 248 eggs per hen for 10 hens. Breeders carefully selected from finest stock, large size, heavy producers, well colored. Males are all sons of pedigreed sires with dam's records of 200 eggs and up. This stock is especially noted for its rugged health and vitality.

PAY STREAK WHITE WYANDOTTES

Produced in a U. S. Approved Hatchery

Finest profit characteristics of this breed are highly developed in the Pay Streak strain—big, plump body . . . heavy, close fitting feathers . . . good year round laying ability and excellent producers in cold weather. Males are sons or grandsons of hens with records of 200 or more large eggs. Sires of these males are direct from dams or granddams with official records of 250 or more eggs.

PAY STREAK SEXED CHICKS

Yes, you can get Pay Streak Chicks Sex Separated—all pullets or all cockerels. If you raise broilers, you'll save money by ordering all cockerels. If you want an egg flock, all pullets will be your best buy. We guarantee 90% accuracy as to sex, and will refund the difference in price between pullets and cockerels on all cockerels above 10% delivered on your pullet order. Cockerels not guaranteed as to sex because of the low prices at which they are sold.

BREEDING CERTIFICATE FREE: With each order for Pay Streak Champion Strain Chicks you will receive a Valuable Breeding Certificate, testifying to the quality of chicks you are purchasing.

MY GUARANTEE: I guarantee 100% live delivery of the number of Pay Streak Chicks you ordered, and will replace or refund the purchase price of any shortage. More than this, if your Pay Streak Chicks have been brooded under sanitary conditions with satisfactory feed and maintenance of proper temperature, I guarantee to replace at half price all losses over 10% occurring during the first 14 days.

Prices and Delivery Subject to Conditions Beyond Our Control

Again Jim Brown
brings you the famous

PEDIGREE-BRED...

PINE TOP CHICKS

NO BETTER BREEDING AT ANY PRICE!

The number of R.O.P. and Pedigree-Bred Chicks available in any year is always limited. This year, with poultry raisers anxious to secure the very best breeding they can, chicks of this quality will be at a premium. However, I have again secured a large part of the production of the famous Pine Top Poultry Farms for my customers.

The Pine Top breeding farm at Tamworth, N. H., covers over 200 acres. Between 2,500 and 3,000 breeders are trap-nested each year. These are qualified R.O.P. hens and R.O.P. candidate pullets mated to R.O.P. and advanced R.O.P. sires. All R.O.P. work is done under the supervision of the University of New Hampshire. Breeders are selected by the family PROGENY TEST SYSTEM. A thorough program of bloodtesting, trap-nesting, and pedigree work is carried on continuously.

Jim Brown customers who have raised Pine Top chicks are enthusiastic about their livability, high average egg production, quick growth, long productive life and large egg size. Pine Top Chicks will make money for YOU!

FROM
NEW ENGLAND'S GREAT
R.O.P.
BREEDING FARM

BUY PINE TOP EXTRA QUALITY CHICKS TO —

1. Improve the production ability of your flock. Increase egg profits.
2. As foundation stock from which to supply local hatcheries with hatching eggs—hatching eggs bring higher prices than market eggs!
3. To establish a superior breeding flock of your own in order to take fullest advantage of the big egg and meat profits assured for the next two years.

U. S. CERTIFIED NEW HAMPSHIRE

Bred in the heart of New England, where the breed originated, PINE TOP New Hampshires are second to none. Intensive specialization on this breed has built up the health, hardihood and production ability of our strain. EVERY PINE TOP NEW HAMPSHIRE MALE BREEDER IS THE SON OF A 200 TO 300 EGG DAM. Every New Hampshire chick is R.O.P. sired. In rapid growth, early feathering, laying intensity, length of laying year and egg size, PINE TOP New Hampshires are unequalled. They represent the supreme achievement of PINE TOP'S Scientific breeding program.

BIG TYPE WHITE LEGHORNS

U. S.
APPROVED
●
200 to 300
Egg
Blood
Lines

PINE TOP Leghorns are known as year 'round producers. They develop faster, get into production earlier and lay consistently through fall and winter when egg prices are highest. Less laying house mortality because of their inherited New England hardihood, premium size eggs and high flock averages are the result of Pine Top's time-tested breeding formula. These White Leghorns are wonderful profit makers.

BARRED AND WHITE ROCKS

U. S.
APPROVED
●
Double
Money
Makers

PINE TOP Rocks demonstrate the value of the breeding work behind them. They have long been famous as a great Two-profit breed. As meat birds they feather early, reach broiler stage in record time. As egg producers they are noted for large brown eggs. A combination that will appeal to practical poultry raisers in a year when both egg and meat prospects are the best in a decade.

PINE TOP SEXED CHICKS

If you are interested in broilers and want only cockerels, or in egg production and want only pullets, order Pine Top Sexed Chicks. Sexing is carefully done by expert operators, without injury to the chicks.

90% Pullet Accuracy Guaranteed, or the difference between pullet price and Straight Run price will be refunded.

THE BROWN FENCE & WIRE CO., CLEVELAND, OHIO.—MEMPHIS, TENN., Address Nearest Office

A FAMOUS PRIZE WINNING STRAIN

From Maine to Texas, from Michigan to Georgia, Pine Top has carried off high honors in Poultry Shows and Egg Laying Trials. 2 year Sweepstakes Winner at the Boston Poultry Show; Ribbon Winner at the Royal Winter Fair in Toronto; Trophy Cup Winner for best R.O.P. at New Hampshire Baby Chick Show; Two Year "high pen" winner at Michigan Egg Laying Contest; "high pen for breed" at the Rhode Island 1938-39, and the Texas 1939-40 Contests—this record has made PINE TOP chicks nationally famous.

QUALITY GUARANTEED

All Pine Top chicks shipped from New Hampshire. Every shipment carries the PINE TOP GUARANTEE—LABEL certifying to the breeding quality of the chicks you have purchased. All breeders Pullorum Free.

Pine Top Straight Run and Sexed Chicks

PINE TOP chicks are shipped POSTPAID at the prices quoted. Losses on arrival will be replaced without charge. Losses within 2 weeks will be replaced at 1/2 price upon receipt of proof of loss.

AUTOMATIC *Blue Flame* OIL BROODER

*Ends Your
Chick Worries*

THIS IS THE MOST EFFICIENT WICK-TYPE BROODER EVER BUILT!

You need never worry about your chicks when they are in this brooder's care! Thousands of owners all over America can tell you how easy and economical these brooders are to operate, and what a fine job of brooding they do. They burn kerosene (coal oil) with an intensely hot Blue-white flame. An automatic thermostat valve regulates the flow of kerosene to the burner, and a sensitive double-wafer thermostat opens and closes the needle valve by powerful lever action; once adjusted it maintains ideal brooding temperatures. A by-pass in the valve prevents flame ever going out.

Giant Size Burner—Patented Heat Equalizer

The giant Super Burner of my Blue Flame Burner has long-life chrome-steel tubes which outlasts ordinary steel burner tubes at least 3 to 1! Patented Heat Equalizer fits on burner collar below flame level, reflects heat evenly. No Hot Spots near burner . . . no Cold Spots at canopy edge! Tests show less than 5° difference between temperature at burner and at canopy edge. Most economical Blue Flame Brooder made—operates for 24 hours on as little as one gallon of fuel.

The burner, oil reservoir and oil line are housed in one rigid base—very easy to level. Burner Bowl and oil reservoir are heavily

galvanized. Chimney is self-centered, assuring an even smokeless blue flame with no fumes to weaken chicks.

The canopy is extra strong and rigid, made of heavy 26 gauge galvanized steel with adjustable ventilator top, and sturdy steel legs. Oil line is Seamless Copper with brass connections—cannot rust! Visible-type, heavy clear glass fuel tank holds one gallon. Every detail of construction of this brooder is the very best, and it will give you wonderful results.

Automatic Heat Control

JUNIOR DRUM TYPE OIL BROODER

Provides Extra Large Chick Capacity at Low Cost

Burns Kerosene or Distillate. Ideal for poultryman who wishes to start with a small investment. Burner is heavy cast iron and has been tested over a period of years. Produces clean hot flame. Throttles down to low burning speed. Removable flame deflector gives quick access to burner. Regulator valve is automatic. Glass sight feed enables operator to adjust regulator quickly. Wafer thermostat keeps temperature at correct degree. Heater drum is heavy sheet steel. Diameter 13¼ inches. Height 13¼ inches. Overall height 20 inches. Steel legs. Canopy is hexagonal and made in sections that are easily bolted together. Fuel tank is galvanized and has strainer screen. Holds 4 gallons. Hand control valve at tank. Use 5 inch smoke pipe, see page 74.

\$16⁷⁴
 PREPAID
 Broods 1200
 Day-Old Chicks

Jim Brown's WOOD-HEAT BROODER HOLDS FIRE MORE THAN 12 HOURS!

- Large capacity fuel chamber—holds 6 cubic feet.
- Holds fire more than 12 hours even in severe weather.
- Body and ends 24-gauge steel, door is 16-gauge. Frame of door is cast-iron. Sturdy channel iron legs.

Burns green or dry wood and there's no danger of fire going out so long as there is any wood in the stove. No fumes or gases to injure chicks. Stove is easily fueled thru large fuel door. Fire burns slowly and steadily. Leaves practically no ashes to bother about. Body of stove is placed lengthwise which increases fuel capacity and heat radiation.

Patented single-action thermostatic control holds heat a steady brooding temperature so that Chicks thrive and grow; quick-acting and sensitive; conveniently located on door so you can always see what you are doing; no dampers or wires to go wrong.

Economy that's almost unbelievable! Cost of brooding in many cases has been reduced as much as 90%. ½ cord of wood will brood 1,000 Chicks to a safe age in cold weather.

Heavy galvanized steel canopy braced and bolted to stove by means of Channel Steel Braces. Front section of canopy is hinged, fuel door and regulating device are easy to reach. All floor under canopy is available for chicks. Specifications: Actual fuel capacity—6 cubic feet. Length of Stove Drums—28 inches. Dia. of Stove Body, 21 inches. Pipe collar, 5 inches. Size of Fuel Door, 10x12 inches. Size of Canopy, 4x6x2 inches. Capacity, 1200 Day-Old Chicks. Uses 5-in. smoke pipe. See page 74 for price of pipe.

Jim Brown's BROOD KING DRUM TYPE AUTOMATIC OIL BROODER

- Tremendous heating capacity! Cares for 800 day-old chicks.
- Operating Cost is very low—Burns kerosene or 38/40 distillate.
- Heater Drum is built of heavy sheet steel and Hexagonal Shaped Canopy is extra strong and rigid.
- Automatic Temperature Control! Sensitive Double Wafer Thermostat controls flow of oil to the burner, keeps temperature even.

Now Only
\$13⁵³
 800 Chick Cap.

No drum type oil burning brooder I know of at anywhere near my low price equals my Brood King for low operating cost, efficient brooding, and trouble-free operation!

The Heater Drum is built of heavy gauge sheet steel with locked seams at top and bottom. Diameter of drum is 16 inches, depth 15 inches. Heavy steel legs bolted to drum are 7½ inches high. Overall height of brooder, 22½ inches. Has a heavy cast iron Wickless Type Burner which produces a clean, hot flame—and a Special Flame Deflector prevents any waste of heat; is removable for easy cleaning of burner. An automatic valve regulates flow of fuel from tank to burner—it is controlled by a thermostat which responds quickly to changes in temperature.

The hexagonal-shaped heavy galvanized steel canopy is suspended from top of the drum and deflects heat evenly over entire floor space. Diameter of canopy, 48 inches. Galvanized steel fuel tank holds about 7 gallons; has hand shut-off valve. Draft Equalizer shown in small illustration is included; it prevents down drafts. Brooder uses 5-inch smoke pipe; pipe not included, see page 74.

Jim Brown's

MARVEL DRUM TYPE OIL BROODER

Heavy Cast Iron Roto-Flame Burner. Pilot Ring prevents flame from going out even in high wind.

DRUM: Extra large, 24 inch in diameter, is made of heavy rust-resisting blue steel. Inner drum removable for easy cleaning. **CANOPY:** Is made of heavy galvanized sheet metal and is bolted to a heavy rigid canopy ring. **BURNER:** Heavy cast iron. Roto-Flame type. Pilot Ring prevents flame going out even in blustery weather. Uses kerosene or 38-40 distillate. **REGULATOR:** Heat is held at proper temperature by automatic thermostat control which regulates flow of oil to burner. **EQUIPMENT:** Brooder is fully equipped except for smoke pipe. Draft equalizer is furnished and helps maintain steady fire even when strong wind is blowing. Fuel tank holds 8-gallons and is made of heavy galvanized steel. Rigid wire stand holds tank at correct height. Fuel and overflow pipes are included. Both sizes use 5 inch smoke pipe. See page 74 for price of pipe. Complete instructions.

600 Chick Size

Furnishes Plenty of Heat!
Large Heating Elements—Efficient Reflectors

Cat. No.	Heater Watts	Size Canopy	Chick Capacity	Prepaid Price
4E144	800	45x48 in.	600	\$20.19
4E145	1000	45x72 in.	900	27.26

The finest type of electric brooder, and most economical. Insulated heat ring retains heat for a longer time and the use of controlled switch proves highly efficient. Large brooder is equipped with two heating elements and two reflectors. Smaller brooder, one heating unit and one reflector. Reflector over the heat unit radiates heat and health rays over the backs of the chicks; reflected heat penetrates air currents and maintains a dry floor under brooder. Attraction light within brooder burns continuously. Pilot light on top shows when heaters are on. Brooder is well insulated with a special type Masonite and heavily aluminum coated inside. Pre-shrunk fabric curtains admit air and exclude drafts. Equipped with thermometer. Adjustable lens permit raising brooder for more head room. More ventilation, lower operating cost. Rod across top helps prevent roosting. Equipped with eight feet of heavy rubber-covered cord.

Red

Heavy galvanized steel Canopy is 36x36 in. square, aluminum coated on inside for better insulation. Bright tin reflector plate, 16 in. square also provides dead air space for extra insulation. Glo-coil heating element is safe and long-lasting; it is protected by a wire grill. Thermostat controls automatic switch so current is used only part time. Brooder is complete with ventilators, cloth curtains, eye-bolt in top for raising to ceiling, attraction light, thermometer, cord and plug. For 110 to 120 Volt A.C. only.

Will produce healthy broilers or pullets at low cost even in Cold Weather. Refractory type heater guaranteed for 3 years. Conserves current and produces infra-red, health-giving rays which keeps floor under entire canopy area warm and dry. Operates on 110 to 120 volt. Will not short or cause radio interference. Automatic regulator . . . turns on electricity only as needed! Heavy galvanized steel canopy has an aluminum coated interior which reflects and conserves heat. Equipped with pre-shrunk cloth curtains. Two adjustable ventilators insure natural movement of air. Brooder is complete ready to plug in and includes thermometer, rubber covered drop cord and plug and attraction light.

Safe, Clean, Efficient Brooding!

Jim Brown GAS BROODER

Does a fine job of brooding chicks and broods at low cost wherever gas rates are reasonable. Has an automatic gas valve controlled by thermostat wafer. By-pass in valve makes it impossible for flame to go out.

Canopy is made of heavy gauge galvanized steel. Heat deflector distributes heat evenly. Heavy cast iron pedestal is three-legged and provides a solid foundation for brooder to rest upon and allows all of floor space under canopy to be used. Provides unusual capacity.

Hand Valve turns off gas when brooder is not used. Prepaid.

PLENTY OF HEAT UNDER ABSOLUTE CONTROL

Jim Brown's

DOUBLE DRAFT COAL BROODER

- Furnishes an abundance of heat, even for coldest winter weather.

- Has Automatic Double Draft Control which regulates air in-take and check draft at the same time. This assures positive automatic control of brooding temperatures at all times, under all conditions.

- Burns either hard or soft coal—holds fire for more than 12 hours.

- Extra Big Brooding capacities.

My Prepaid
Price Only

\$14⁶⁹

750 Chick Size

My Double Draft Coal burning Brooder does a splendid job of caring for chicks, and the special Double Draft Feature saves you work and worry. The big brooder stove has a heavy cast iron body, fluted for extra strength and for additional radiation. Sloping sides of the body allow fuel to feed down as it is burned, and thus prevents clogging. Big fuel door allows refueling directly from scuttle. Bottom of stove is insulated with *Asbest-o-cel* and free circulation of air under stove protects floor from heat and scorching.

Heavy 26-gauge galv. sheet steel canopy is made in 4 sections with one section hinged. Canopy revolves so that hinged section can be swung around, making it very convenient to fuel, remove ashes, adjust thermostat, etc., as the entire floor area can be reached. Canopy is correctly designed to deflect heat to floor where needed.

Heat is held evenly at the proper temperature by the powerful Automatic Double Draft Control which regulates both the air intake, and the check draft. Regulator is equipped with TWO double thermostat

wafers, double assurance of instant response to changes in temperature. Direct draft thru fuel bed to smoke pipe burns gases, which in some types of stoves are wasted. No indirect flue passages to clog with soot.

This stove will operate on either Hard or Soft Coal; use the fuel which is most convenient or the cheaper. Either will give you an abundance of controlled heat and stove will burn many hours on one filling. Flue collar which maintains a steady fire even when a strong wind is blowing, is included free with each brooder. Coal supplies an abundance of heat and at a very low cost. This Brooder is very simple in construction and therefore very easy to manage. All sizes have large 10¼-in. Rocker Type grates which makes firepot easy to clean and all sizes use a 5-in. smoke pipe. Pipe is not included—See Page 74 for Stove Pipe prices.

Double Draft Coal Brooders

Catalog Number	Size Canopy	Coal Capacity	Chick Capacity	Prepaid Price
4E101	48 in.	34 lbs.	750	\$14.69
4E102	52 in.	42 lbs.	1000	17.35
4E103	56 in.	42 lbs.	1200	18.20

RED WONDER My Best COAL BROODER

- Special shape of stove body and Non-Clogging Magazine gives this stove extra coal capacity.
- Burns either hard or soft coal efficiently and holds fire as long as any coal burning brooder ever built. Saves work of refueling.
- Has Automatic Double Draft Control of Brooding temperatures. 2 powerful wafers open and close air intake and check draft at the same time.
- Efficient Draft Equalizer which prevents down drafts and saves fuel is furnished free.
- Long body bolt braces help prevent warping and opening of seams in stove walls under intensive heat during cold weather.

No baffle plates to clog with soot. No cleaning out necessary, which is a great convenience.

- Coal Magazine lid and ashpit door are made to lift off with a poker—no more burned fingers when you brood with a Red Wonder.

- Ashpit has 1-inch thick *Asbest-o-cel* lining at bottom; perfect insulation, conserves heat and reduces fire hazards.

- Heavy Galvanized Steel Canopy is suspended from top of coal magazine, conserves heat which is wasted in some types of coal brooders.

- Has two hinged sections which can be raised and locked in the raised position.

- Can be bought on Easy Terms—See Page 2.

My Red Wonder coal burning brooder has every feature I know of for efficient, easy, low-cost brooding of baby chicks. The experience of many many years has gone into its construction, and I know it will give you complete satisfaction.

Check all of the high quality features shown at the left, and see how well it is built! The stove body is extra heavy cast iron throughout, bolted and braced to prevent warping, keeps joints gas-tight throughout its long life. Bottom of stove is ventilated and heavily insulated. The Red Wonder has Rocker-type grates, easy to shake and easy to keep clean. With proper care these grates will last for many years. There is plenty of clearance in the ashpit and the handy ash pan makes emptying an easy matter. A Draft Equalizer, see small illustration, is furnished with each brooder.

The 26-gauge galvanized steel canopy distributes heat evenly over the entire floor space—note that no ropes or nullers are needed because hinged sections in the canopy lock in the raised position until they are released; this makes it easy to work around the brooder.

The smallest size uses 4-inch smoke pipe and the two larger sizes 5-inch. Pipe is not included; for prices of pipe, see page 74.

SURE-GRO STARTING BATTERIES

3 Deck Oil
\$25.06
Prepaid

Furnished in 3 or 5-Deck Units. Brooder sections are ALL METAL construction. Each compartment measures 23 inches wide by 30 inches long by 9 1/2 inches high inside and will hold 100 day-old chicks. Floors are 1/2-inch mesh woven wire, heavily tinned. Dropping pans are made of heavy Galvanized Sheet Metal and pull out from front for easy cleaning. Each compartment has two feed troughs and one water trough. Curtain separates exercising space from brooding compartment.

ELECTRIC TYPE—has automatic thermostat control in each compartment. Uses current part time only as conditions require. Each compartment has 100-watt heating element which is completely enclosed. For use with 100 to 120 volt alternating current. Furnished complete with cord and plug.

OIL-HEATED TYPE—has a kerosene lamp in each compartment. Brooding section of compartment has big heat radiator with galvanized deflector. Lamp produces an abundance of heat which is distributed evenly in all parts of brooding section. Heat is controlled by regulating height of flame.

Both the 3-deck and the 5-deck batteries are mounted on a truck which has swivel casters.

Get started today brooding chicks by the modern battery method. If you want to start with the 3-deck outfit now you can add 1 or 2 decks as you need them. See Page 2 for Easy Terms.

My big 3-in-1 Complete Broiler Plant will enable you to turn out 30 to 35 finished broilers every week. Big year round profits possible by this modern method of Broiler Production. The 5 decks are built on a framework of 1-inch angle iron. Mounted on swivel casters for easy handling. Constructed of heavy gauge steel strongly braced and reinforced.

3 BATTERY BROODERS IN ONE!

TOP DECK has two compartments for starting chicks, each having its own heating element and automatic heat regulator. Each compartment is divided into 2 sections which permits regulating temperature for chicks of various ages. Head room 8 inches.

SECOND DECK is divided into 2 sections, for growing chicks. Each one equipped with lamp socket, electric cord and plug, so heat is available when needed. Bulbs not included. Head room 9 inches.

THREE LOWER DECKS are divided into 2 compartments each for finishing and are unheated. All decks measure 49 inches by 29 1/2 inches inside. Two top decks have 1/2-inch mesh tinned wire floors and three bottom deck floors are 3/4-inch mesh. Galvanized dropping pans are removable for cleaning. Heating elements on top deck are for 110 to 120 volt A.C. current. Overall height 72"—Floor space required 40-inch by 60-inch.

BETTER THAN ORDINARY GLASS—COST MUCH LESS

Jim Brown's GLASS SUBSTITUTES

MAKE SUNSHINE VITAMIN "D" PAY YOU BIGGER PROFITS

Easy to apply. Just cut it with shears and tack in place!

Jim Brown's Glass Substitutes not only cost less but are actually BETTER than ordinary glass in most ways! Conclusive tests of Experiment Stations have proved that animal and plant growth is stimulated, health is improved and profits increased by using Glass Substitutes which admit ULTRA-VIOLET RAYS from the Sun, the "Sunshine" Vitamin D. There are many ways to use this material profitably.

For instance, Chicks raised under glass substitutes develop to Broiler Size two to three weeks faster than chicks under common glass! Egg production can be increased up to 50%! Plants thrive! All livestock stays healthier, and is more profitable. Glass Substitutes are also ideal for enclosing screen porches, for making screen door and windows into storm doors and windows at a very low cost. Prices Prepaid, see NOTE.

RAY-LITE is GOOD!

Ray-Lite is a good low cost glass substitute, made from a stout translucent fabric especially treated to make it weather-proof. It is very tough, flexible and non-breakable—shuts out the wind and weather, yet admits Ultra-Violet Rays from the sun. It will give good results when used for hot beds, poultry houses, sleeping porches, etc., and first cost is very low.

Can be cut with shears, easily applied with hammer and tacks. Supplied in 5, 10 and 15 yard rolls only, width 36 inches. Postpaid, see NOTE below.

No. 4E401—5 Yards.....**\$1.01**
No. 4E402—10 Yards.....**1.91**
No. 4E403—15 Yards.....**2.74**

FILM-GLASS is BETTER

Film-glass is more transparent, and more durable than Ray-Lite and other lower priced materials. It is made of 2 continuous sheets of cellulose acetate, cemented to a strong 1/4-inch open mesh reinforced fabric. It admits more of the Ultra-Violet Rays, is stronger and will last longer. Water-proof, light and flexible; easy to cut, easy to handle, easily installed. It is very good for use on storm doors and windows, poultry houses, hog houses, hot beds, etc. Furnished in 36-inch widths and in 15, 25, 50 ft. rolls only. Postpaid.

No. 4E406—15 Ft. Roll. **\$2.95**
No. 4E407—25 Ft. Roll. **4.46**
No. 4E408—50 Ft. Roll. **8.63**

WIRE-GLASS is BEST!

Wire-Glass outlasts any other glass substitute that I know of! It is formed over tough, galvanized 1/4 inch mesh wire. Every wire and joint is first imbedded in a cushion of plastic; then TWO sheets of plastic glass are fused over the wire into one solid weather-proof sheet, with no rosin or glue used. Drawn tough and thin to admit more light and more of the valuable Ultra-Violet Rays.

A very good insulator! Its fine appearance makes it first choice for use on porches, storm doors or windows. Made in 36-inch width. We do not cut rolls. Postpaid.

No. 4E411—10 Ft. Roll. **\$3.81**
No. 4E412—20 Ft. Roll. **7.57**
No. 4E413—50 Ft. Roll. **18.70**

MANY USES!

For Brooder Houses. Makes chicks grow faster.

For laying houses. Increases egg production.

Starts plants faster in Hot Beds or Cold Frames.

Economical for enclosing screen porches.

Transforms screen doors and windows for winter use.

Fine for hog farrowing houses or any stock barn.

HATCH E-Z INCUBATOR

100 and 150 Egg Capacity A Very Efficient Incubator

An efficient hot water incubator suitable for hatching chicks, turkeys or ducks. Large capacity, circular hot water radiator made of copper surrounds egg chamber. Has dependable kerosene lamp heater equipped with Zenith Burner and reliable thermostatic regulator to hold temperature at correct point. Built entirely of metal, heavily insulated. Egg tray has galvanized wire bottom with disc in center to be removed at hatching time to allow chicks to drop into nursery tray underneath. Window in top allows inspection without removing cover. Thermometer and egg tester included. Capacity given is for hen eggs. May be used to hatch pheasant, quail or any domestic or game bird eggs.

No. 4E211—100-Egg Size, Prepaid... **\$14.56**
No. 4E212—150-Egg Size, Prepaid... **16.36**

METAL HEN INCUBATOR

Capacity 50 Eggs

A practical little incubator for the small poultry raiser. Incubator is hot-air heated and uses kerosene for fuel. Has automatic thermostatic control, insulated double walls and top, felt-lined nest and high grade brass burner. Made of metal 18 in. in diameter and 10 1/2 in. high. Capacity 50 hen eggs. Ideal to use in conjunction with a larger incubator, as eggs can be transferred to the larger machine to keep it full. Comes complete with high grade thermometer and instructions.

No. 4E216—50-Egg Size, Postpaid..... **\$5.98**

COMBINATION HATCHER and BROODER

Electrically Operated As Low As

Hatching eggs by electricity is the ideal method. No fumes, no dirt, no fuss. Metal cage heavily insulated against heat waste. Top furnished with legs and curtain which permits use as temporary brooder. Current regulated by thermostat keeps heat at correct degree and avoids waste.

Capacities given are for hen eggs. Ideal also for quail, pheasant and all domestic fowl. Made for 110 to 120 volt alternating current only. Uses very little current. Ready to plug into your light line and furnished complete with cord and plug, thermometer and instructions.

BROODER STOVE and BROODER HOUSE ACCESSORIES

A Adjustable Roof Saddle

Made of heavy galvanized steel. Easily put on without cutting pipe. Complete with adjustable base, 14-inch pipe extension and cap. Watertight.
No. 4E341—4-inch. Postpaid.....**\$1.35**
No. 4E342—5-inch. Postpaid.....**1.45**

B Combination Roof Saddle Ventilator

Can be used as a ventilator or in combination with smoke pipe. Made of heavy galv. steel. Square base is adjustable to flat roof or up to 30 degree angles. Has 8-inch ventilator flue pipe with 5-inch extension above hood. Either 4 or 5-inch smoke pipe from brooder stove can be run through ventilator. Flue cap is removable so pipe may be extended to any height.
No. 4E343—Postpaid.....**\$1.84**

C London Chimney Cap

Best Chimney Cap available to eliminate down drafts of any kind of brooder stove. Main chimney pipe flue enters cap at an angle which prevents wind blowing down into smoke pipe—made of heavy galvanized sheet metal. Hooks are furnished for wiring to chimney pipe. 5-inch size only.
No. 4E344—Postpaid.....**\$1.25**

D Suction Cupola with Revolving Head

Well constructed of heavy rust-resisting ARMCO INGOT IRON. Revolving head of this Cupola or Ventilator is perfectly counter-balanced. Finished with silver aluminum paint. Will fit gable, as well as shed style roof of any pitch. Large strong vane turns ventilator even if breeze is slight. Fitted with bird-proof screen.

Cat. No.	Dia. Flue	Size		Prepaid Price

No-Waste FLOCK FEEDERS

With STAND and WOOD PERCHES

\$4.01
5-Ft. Size
Prepaid

With Short Angle Steel Legs **\$3.05**

Stop wasting feed! These Big, Sanitary galvanized steel flock feeders are shaped to prevent birds from pecking feed out of trough, and the hinged wire guard keeps them out of the trough. Trough is built from heavy 26-gauge galvanized steel. Rust-proof wire guard is V-shaped with wires spaced 2 1/2 in. apart, and is hinged to allow easy filling and cleaning of the trough.

5 Foot or 8 Foot Sizes

Top width of troughs is 8 1/2 in., widest point is 9 1/2 in., bottom 7 in. Depth of trough 4 1/2 inches. 5-ft. troughs hold 5 1/2 pecks, 8-ft. troughs 8 1/2 pecks. Big Flock Feeders furnished in 3 styles—without legs or perches, with 9-in. heavy angle steel legs as shown in smaller illustration above, or with 16-inch high angle steel stand and 1x3-inch wood perches.

Capacity 5 1/2 Pecks—Length 5 ft.	Price

NEW FLOCK WATERER

Plenty of Clean, Fresh Water Always Ready

Give your hens plenty of water at the right temperature and they will lay more eggs. Trough is heavy gauge galv. steel 48 inches long. V-shaped bottom. 5 1/2" deep, side walls 3 1/2", width 8". Capacity 8 gallons. Angle iron legs and wood perches 17" from ground. Drain plug 3/4". If running water is available order all Brass Valve and Float No. 4E390 or trough may be handfilled. Automatic float valve is made entirely of brass and operates on gravity or pressure system from 1/4" pipe line. Waterer is priced without heater but may be had with either oil lamp with Zenith Burner, or 100 watt Nichrome Electric Element. Either will keep water from freezing in coldest weather.

TRAP NESTS

- Made in 5-Nest Sections
- No Back—Hangs Against Wall
- Non-Roost Sloping Roof

Made of heavy galvanized sheet metal. No place for lice or mites. Shipped knocked down.

When trap doors are used it is impossible for hen to get in without tripping door. Trap doors can be locked open or removed and nest used as ordinary laying nests.

Each nest is 11 1/2 inches wide by 13 in. deep. Hole is 9 inches in diameter. All partitions are perforated same as end sections which allows plenty of ventilation. Plenty of room for litter and as nests have open backs, litter may be cleaned out easily.

COMPLETE ONE-STORY HIVES

Jim Brown Bee Hives are Finest Quality, made by one of America's leading manufacturers. They are built in standard size, made from clear, accurately-machined and planed pine of standard thickness. No knots, splits, or sap, but first quality stock in every particular. Joints are tongued-and-grooved to fit perfectly when assembled, but hives are shipped unpainted and knocked down to save you money. They are easy to assemble because all parts fit accurately; nails and simple instructions are included.

All hives are 20 in. long by 9 $\frac{3}{4}$ in. deep; 10-frame hive, 16 $\frac{1}{2}$ in. wide, 8-frame hives are 13 $\frac{1}{2}$ in. wide. Furnished complete as listed below with Wood or Metal Covers, Reversible Bottom Boards, and with Solid Bottom Bar Frames for Universal Foundation, or with Divided Bottom Bar Frames for Wired Foundation. Wood covers are the improved Gable Type, which shed water better. Metal cover has wood frame, and telescopes down over sides of hive body. Order Wax Comb Foundation and Super separately—see listings at left.

Freight Prepaid on Orders of \$10.00 or More.

RATE WITH THE BEST

First Line

18 MONTHS SERVICE GUARANTEED

4-PLY FIRST LINE TIRES

Now, more than ever before, it pays to buy Top-Quality Tires . . . tires that you **KNOW** will stand up under long, hard service . . . that will give the most mileage for your tire dollar. This is *exactly* what you get when you buy my *Wearbest* Tires!

6.00-16
\$10⁶⁸

Performance Is Doubly Guaranteed

Jim Brown First Line 4-Ply tires are guaranteed to equal or excel the quality and performance of any First Line tires with which new cars are equipped at the factory. They are Big and Husky, with a deep, slow wearing, non-skid safety tread and strong sidewall construction. Average drivers get at least 20,000 miles from my 4-Ply First Line tires, and many drivers get much higher mileage. Because driving and road conditions vary so much I give a Double Guarantee on a basis of actual monthly service. For Safety, for Service, for High Mileage, there are no better 4-Ply tires built regardless of name or price! My prices are **Freight Prepaid** when your order amounts to \$10.00 or more, and they save you at least 25% compared to most nationally advertised First-Line tires. Tubes listed below are First Quality, molded to a perfect circle to fit your tires without pinching. Extra Heavy Pinchproof Safety Tubes have an extra thickness of rubber where tube strikes rim and bead of tire.

Here's My Double Guarantee!

Jim Brown First Line 4-Ply tires are unconditionally guaranteed against defects in materials and workmanship for their lifetime. They are **ALSO** guaranteed to give 18 Months average service. I will replace any tire that does not give you this service, charging only for the service you received. To Ohio Customers: I guarantee satisfactory service, or I will furnish a new tire at a fair price considering service received. **Note:** Tires returned for adjustment must be sent prepaid.

PASSENGER CAR TIRES

REGARDLESS OF PRICE..

Finest Quality

**24
MONTHS
SERVICE
GUARANTEED**

6-PLY FIRST LINE TIRES

6.00-16

Built for heavier cars, harder driving, greater mileage! Have extra strong sidewalls and a heavier carcass to give you added protection against stone bruises. I believe they are equal to any so-called "Custom Built" tires which are sold under impressive names at fancy prices.

\$12⁷⁶

Super Safety...Extra Mileage...Longer Service!

My 6-Ply First Line Tires are built in one of America's famous tire factories to my rigid specifications. I guarantee these tires to give at least 24 Months' Service under all average conditions, but they are so well built, so heavy and husky that many users get 50% to 100% more service.

The tough, thick carcass of 6-Ply tires is of wear-defying construction—each of the six husky plies is made from finest quality, long-staple cotton firmly imbedded in live, spongy rubber; vulcanized together into a single unit. The deep safety tread is designed for easy steering and safety from skidding. A Water-Cured Process is used in vulcanizing my 6-Ply tire; this leaves a natural protective wax content in the fabric, leaves the rubber live yet tough in resistance to cuts and bruises.

Here's My Double Guarantee!

Jim Brown 6-Ply First Line tires are Unconditionally Guaranteed against defects in material and workmanship for their lifetime. They are ALSO guaranteed to give you 24 Months of average service. I will replace any tire which does not give you this service with a new tire, charging you only for the length of service which you received. To Ohio Customers: I guarantee satisfactory mileage and service, or I will supply a new tire at a fair price considering service all ready received. Note: Tires returned for adjustment must be prepaid.

WONDER VALUE 4-PLY STERLING

Guaranteed for 12 Months

Not equal to my FIRST LINE Tires, but the Toughest, Longest-Wearing, and Safest 4-Ply Tires I've ever seen at their low price! The Sterling is a real Economy tire . . . it's built to give you a lot of value and longest possible service at very low cost.

My Sterling has a deep-cut Safety Non-Skid tread, sturdy bruise-resisting sidewalls and heavy beads. It is honestly built through-out, and will give splendid service considering the low cost. Equip your car NOW!

Here Is My DOUBLE GUARANTEE

Jim Brown 4-ply Sterling Tires are unconditionally guaranteed against defects in materials and workmanship. They are also guaranteed to give you 12 months' average service, whether you run 1,000 or even 2,500 miles per month. I will replace any tire which does not give you this service with a new tire, charging you only for the length of service which you received. To Ohio Customers: I guarantee satisfactory mileage and service or I will supply a new tire at a fair price considering service already received. Note: Tires returned for adjustment must be prepaid.

Jim Brown's STOP SKIDS Sure Pull You Out!

THE GREATEST SNOW OR MUD TIRE EVER!

STOP-SKIDS meet every requirement of winter and bad road driving. Best for deep mud, sand, slush, snow—for trucks and buses as well as passenger cars. Jim Brown Stop-Skid Tires are Quality Built throughout, designed with rugged, sturdy cleats which resemble the teeth of a Herringbone gear . . . they give the same sure traction either backward or forward. The cleats in the tread are scientifically designed and angled to throw the mud and snow out as the tire revolves—they provide sure and steady traction under all conditions! Truck tires are extra sturdy, built for heavy loads and tough going.

HERE IS MY DOUBLE GUARANTEE

Passenger Tire STOP-SKIDS are guaranteed for 12 months of average service. To Ohio Customers, I guarantee satisfactory mileage and service, or I will supply a new tire at a fair price considering service already received. Truck and Bus Stop-Skids Guaranteed against all defects in material and workmanship.

Note: Tires returned for adjustment must be prepaid.

EXTRA QUALITY CANVAS

For complete protection and satisfaction on trucks, farm machinery, hay stacks, building materials, trailers, in fact anything to be protected from the weather, use Jim Brown waterproofed covers and wagon sheets. Made of strong, long fibre cotton duck, waterproofed with a treatment containing no paraffine. Seams are double sewed with heavy rot-proof thread and reinforced with large patches at corners. Double canvas around all rings. Rolled-rim rust-proof rings inserted about 5 feet apart all around. Tie ropes included. Weight of goods is per square yard before waterproofing in compliance with commercial standard CS-28-32 U. S. Department of Commerce. Sizes listed are cut sizes—finished dimensions will be from 4 in. to 6 in. less because of seams and hems. My 12.41 oz. Olive Drab, Double Filling Duck Covers are closely woven, strong, yet easily handled. A special value for use on trucks, especially in tobacco growing districts. A size for any use. Catalog prices are **Postpaid** Prices. See notice at left below.

Jim Brown STURDY STEEL WHEELS

WITHSTAND MANY TIMES THEIR RATED CAPACITY

ONLY
\$5¹⁵
No. 7E331

Directions For Ordering Made to Measure Wheels

We must have exact measurements of your old skeins at points indicated in diagram. Use calipers or cut card-board to fit each skein dimension. Always measure crosswise and not from top to bottom since old skeins are usually worn on underside. Always take measurements from your skeins and not from your wheel hub. Give exact sizes; we allow for play.

Measure (1) Length of spindle; (2) diameter collar next to spindle; (3) largest diameter spindle; (4) smallest diameter spindle; (5) largest diameter nut. Allow from 5 to 10 days for shipment.

MADE-TO-MEASURE STEEL WHEELS TO FIT ANY SKEIN

A set of Jim Brown Steel Wheels is one of the greatest conveniences about the farm. They save time and labor. Tires never come off and never need resetting. Wheels do not shrink or swell. Wide tires pull easy and make no ruts. They save your horses.

Heavy Spokes Have Large Head Upset on Hub End

Jim Brown Made to Measure Wheels have heavy oval staggered spokes hot-forged into tire with large head upset on hub end. Hubs are made of special analysis grey iron which is cast solid around the headed spokes thus forming an integral part of the wheel with a wall of metal between the spoke heads and the bearing surface. The hubs have full length bearing. Spokes cannot loosen in hub and grease cannot leak out around the spokes. My made-to-measure wheels have improved deep grooved tires electrically butt welded. Tires have extra thick edges and new deep grooves which afford ample protection to spoke heads from actual road contact.

BE SURE TO SEND IN CORRECT SKEIN MEASUREMENTS WHEN ORDERING

When ordering made-to-measure wheels, it is absolutely necessary that you send in your skein measurements as indicated under "Directions for ordering" shown at left. Extra heavy wheels with 4 x 1/2" tires listed below are recommended for road use or rocky ground.

Freight Prepaid on Orders of \$10.00 or More

With 3x3/8-In. Tires— 7/8-In. x 7/16-In. Spokes				With 4x3/8-In. Tires— 7/8-In. x 7/16-In. Spokes				With 3x1/2-In. Tires— 7/8-In. x 7/16-In. Spokes				With 4x1/2-In. Tires— 7/8-In. x 7/16-In. Spokes

Jim Brown Ready Made STEEL WHEELS

Freight Prepaid on Orders of \$10.00 or More

Jim Brown Ready Made Steel Wheels combine maximum strength with minimum weight. They have improved deep grooved tires electrically butt welded. Heavy staggered spokes with reinforced bell shaped ends are hot-forged into hub and riveted permanently tight into tire. Heavy cast hubs have extra large bearing surface. Break-down tests and tests under actual operating conditions prove Jim Brown wheels withstand many times their rated capacity.

Ready Made Steel Wheels have cast iron hubs to fit 3 1/4 x 10" D.V. cast skeins measuring 3 3/8" diameter at large end, 2 1/4" diameter at point, 10 1/8" in length, collar 4 5/8", nut 3 1/4". Furnished in sets of four wheels with skeins, also individual wheels without skeins to fit skeins with same measurements as given above. If your skein measurements are different than those given here it will be necessary for you to order my Made-to-Measure Wheels listed above.

For a Better Built FARM TRUCK!

Here is a high grade, substantially constructed Low Wheel Farm Truck, built from superior quality materials and the finest of workmanship and carefully assembled to give the greatest possible durability and strength. Jim Brown Farm Trucks are a quality product backed by the forty-five years of practical manufacturing experience of one of the "Pioneers" of the industry. They are fully guaranteed by them, and by me. They are well known for their light-running qualities and will give excellent service and satisfaction in every way.

CHECK THE EXTRA-STRONG CONSTRUCTION FEATURES!

The Jim Brown Farm Truck is offered to meet the demand for a correctly priced gear for various types of farm work where economy and rugged service are desirable. All parts are extra large and well proportioned. The axles are made from selected Hickory, the bolsters are solid oak, and the ironing is heavy and complete throughout. The gears are fully clipped. The finish is the very best with a protective priming coat finished with high grade red gloss enamel with striping and ornamenting neatly done.

BUILT TO LAST MANY YEARS

Jim Brown Farm Trucks are built for those who recognize quality and are desirous of securing a truck that will last for years and at a reasonable price.

HORSE OR TRACTOR DRAWN

DISC HARROWS

Extra Heavy Bearings

Designed to give long service with modern high-speed tractors.
(A) Four inter-changeable, oil soaked, wood bushings.
(B) Three heavy thrust flanges take up the wear from end thrust.
(C) Klean Seal grease fittings easily reached by grease gun. Grease quickly spreads to all wearing parts.

WHEEL CONTROL
Hand control with wheel and worm gear instead of lever control can be furnished at no extra cost. If wanted, State on Order.

HORSE DRAWN DISC HARROW

- 11 Gauge, "Galesburg" Heat-treated Disc blades; they require less re-sharpening.
- Heavy Angle Bar Steel Frame with built-in weight boxes.
- Extra large bearings with Maplewood bushings. Zerk lubricated, Klean Seal Fittings.
- Complete adjustability with Levers and Foot Pedal Depth Control.
- Oversize 1-inch square Axle.
- Heavy weight throughout assures deep, even cut.

AS LOW AS

\$48⁸⁸

Freight Prepaid

Gives top performance under any field condition. Its sturdy all-steel construction insures many years of service—no harrow built is more durable. Note the quality features as outlined above and below and you will agree that this Harrow has everything that a farmer requires.

The two long hand levers make angling the gangs easy. A foot controlled depth lever gives user any amount of vertical adjustment required. A firm downward pressure on foot lever pivots middle portion of gangs downward so that dead furrows may be cultivated and so that the middle discs will always cut as deep as outside discs. This lever is released by another small foot lever extending up between the two supports of the depth lever.

Complete with 16-inch Discs, Fore Truck, Seat, Weight Boxes, and with or without scrapers as priced below. For Long Pole in place of Fore Truck deduct \$5.00 and specify on order.

Jim Brown 2-GANG TRACTOR DISC HARROW

- Automatic angling of gangs by rope and tractor power.
- Heavy bearings for long wear.
- Genuine "Galesburg" heat treated discs.
- Strong frame and good weight for proper cut.
- Flexible frame allows shorter turns.
- Heavy tractor hitch for use with any tractor.

\$80⁶⁹
5 Ft. Cut

With 16" Blades
Freight Prepaid

Jim Brown Tractor Disc Harrows will stand up under hard, rough use behind any tractor. Strong angle iron frame construction with heavy braces. Axles, or gang rods are 1-inch square. Equipped with genuine "Galesburg" No. 11 gauge disc blades for hardness, toughness and strength and insurance against breaking, chipping or bending. Front and rear gangs may be adjusted to different angles by use of hand lever making it possible to operate the harrow with the front gangs straight and rear gangs angled to fill in a dead furrow, or with front gangs angled and rear gangs straight, to level. From an angled position, the gangs are straightened by pulling the rope while tractor is in forward motion. This allows light discing over soft ground without stopping the tractor. The connection between front and rear gangs is a double draft beam. Rear gangs cut exactly between front discs and at the same time give sufficient flexibility for short turns. Rear gang will not sway from side to side on uneven ground. Extra heavy bearings designed to counteract the end thrust and to offset the tendency of dirt to work into the bearings. Bearing box and spool fit closely to exclude dirt. Grease gun fittings are easily reached. Grease is quickly spread to all parts of bearing. The heavy steel hitch may be used with any make of tractor. Harrow is furnished with or without scrapers and with 16-inch or 18-inch discs as listed:

SPRING-TOOTH and SPIKE-TOOTH HARROWS

Big Illustration Shows 3 Sections

Sections Can Be Used in Any Multiple Desired

UNIVERSAL SECTION SPRING TOOTH HARROW

\$12⁸⁰
1-Section
Freight
Prepaid

Greatest improvement in harrow construction that I know of. Sections are universal and can be used in any multiple desired with the proper draw bar supplied regardless of the number of sections being used as one unit. Each section is heavy angle steel, reinforced on the under side by extra heavy $\frac{3}{4}$ -inch steel shoes for long wear. Each section has 8 teeth and have outside and inside units to make up a complete harrow. Tooth bars and inner arms of the frame are built to give high clearance. Draw bar may be adjusted up or down to insure even working of the teeth. Adjusting levers may be reversed to the front for tractor use. Freight Prepaid.

COMBINATION PULVERIZER HARROW and PACKER

ROLLER BEARINGS
On All
Jim Brown
Pulverizers

Double Gang AS LOW AS

\$74.59 Freight Prepaid

Makes a better seed bed—does away with humps and hollows, eliminates air spaces and reduce soil blowing and erosion after plowing or planting. For crushing, pulverizing, rolling, packing and thoroughly preparing the soil, this Roller-Bearing implement has no superior! Unusually light draft because of the extra-wide bearing space.

Rigid angle steel frame is strongly built for long hard service. Frame brackets are heavy cast iron. Weight box is formed by heavy angle-steel frame. Front wheels are 15-inch, rear wheels are 12-inch and both are 4 inches wide. The axles are made from 1½-inch steel and revolve in dirt-proof, self-aligning Roller Bearings equipped with hard grease cups. Prices below are with two-horse pole and seat. Stub pole with tractor hitch in place of long pole at no extra cost IF Specified On Order. If wanted with foretruck in place of regular pole add \$7.50 and Specify On Order.

Farm and Garden CULTIVATORS

TWO WHEEL ARCH CULTIVATOR

\$6.34
Freight
Prepaid

This cultivator has sturdy all-steel frame construction and nicely finished Oak Handles which are adjustable for height. It does a very efficient job and is easy to operate. The arch is 8½ inches wide and permits cultivation on both sides of plants up to 20 inches high. The steel wheels are 16 inches high, have wide tires.

Cultivator Complete with All Attachments Shown

Attachments illustrated at left are two plows for furrowing, covering and hilling, two 7-inch steel scuffer hoes, and two five-prong cultivating attachments made of high grade spring steel, shown attached to cultivator. It also has two adjustable leaf guards, shown in position on cultivator, which may be turned up or down to take care of high or low plants.

This is an all-around garden cultivator which will do as much as several men with ordinary hoes—and do it better, with less work. Prepaid, see NOTE below.

Cat. No. 9E24.....**\$6.34**

5-Prong Cultivator Attachment

An efficient weeding tool. Has 5 tempered steel teeth with forged points. Center tooth can be removed for straddling rows. Will fit cultivators Nos. 9E22, 9E23 and 9E24. Prepaid, see NOTE below.

9E41
74¢

\$3.71
Prepaid

FLOW AND CULTIVATOR

Has a balanced frame, with center of draft above and forward of center of wheel to insure easy running. Furnished with mould-board, one 2-inch and one 4-inch shovel, combination weeding and cultivating tool and wrench. Wheel is 24-inch diameter with 1¼-inch tire and heavy oval spokes. Unusually easy to operate! Prepaid, see NOTE below.

Cat. No. 9E22—Each.....**\$3.71**

HILL or DRILL GARDEN SEEDER

Sows all common garden seeds accurately but not recommended for large seeds such as Lima Beans. Has adjustable seed plate. Furrowing shoe is adjustable to 2-inch depth. Seeds are in view of operator as they drop. 16-inch front wheel, 1½-inch wide tire; adjustable furrow coverer and 2½-inch wide rear packer-wheel. Has oak handles, adjustable rear wheel scraper, positive seed shut-off and adjustable row marker, which can be changed from side to side. Prepaid, see NOTE below.

A Great Labor Saver!
Works Easier, Faster!

\$5.02

MULCHER-CULTIVATOR

Weeds, hoes, cultivates and mulches all in one operation! Eliminates back-breaking hand-hoeing. You push it like a lawnmower. Large illustration shows it in position for mulching. Reverse the position for deep cultivating with the five teeth. Under-surface knife cuts weeds at roots and throws them on top of ground. 8 double-edge revolving blades pulverize the soil. 7-inch malleable iron wheels and wire leaf guards. Prepaid, see NOTE below.

No. 9E21—Each.....**\$5.02**

MULTI-GARDEN TOOL

Has interchangeable attachments for different cultivating uses. Can be operated either with or without rear wheel which is adjustable and regulates depth. Front wheel is 16 inches in diameter, rear wheel is 14-inch. Complete with three cultivator teeth, rake, sweep, reversible bull tongue and wrench. Prepaid, see NOTE below.

Cat. No. 9E23—Each.....**\$4.91**

\$11.19
Prepaid

Excelsior Cultivator with Front and Rear Gauge Wheels

Adaptable for practically any kind of cultivation. Will also make seed drill ridges. Depth of teeth is controlled by front and rear gauge wheels and two levers which relieve operator from strain in holding cultivator. When moving cultivator from one field to another, teeth can be elevated entirely out of ground.

Teeth stanchions or legs are hollow pressed steel to give additional strength. Standards of the hilling attachments can be turned all the way around so hilling teeth can be used with either point or rounded end forward. Has 7½ by 1¼-inch solid steel side and center bars, five 3-inch cultivator teeth and three hilling attachments.

No. 9E34—Prepaid.....**\$11.19**
No. 9E32—Same as above except without Rear Wheel and Depth regulating Lever. Prepaid, see NOTE. Each.....**\$9.03**

HORSE-DRAWN CULTIVATORS

14 Tooth Cultivator with Lever Expander

A field cultivator that thoroughly pulverizes the ground but will not throw dirt on the plants. Just the thing for working very close to small plants of tobacco, corn, cotton, potatoes, etc. Teeth are reversible so that the tool may be used either as a sharp-point cultivator or as a harrow.

Has a lever expander which enables you to set width of teeth to suit width of rows. Many prefer this implement with a front wheel and I recommend using the wheel. Prepaid, see NOTE below.

No. 9E35—
Each.....**\$7.43**
No. 9E42—Wheel for Cultivator above.....**91c**

7 and 5 Tooth Expander Cultivators

Some soils require more intensive cultivation than others and this 7-tooth cultivator will do a first class job in such soils. Strong all-steel frame construction. Has lever expander so you can adjust the width from 9 to 26 inches as desired. Complete with seven 2-inch teeth. A cultivator wheel, 9E32, priced below, makes this cultivator easier to handle. Prepaid, see NOTE below.

Diverse Field Cultivator

For harrowing and cultivating corn, cotton, tobacco, potatoes, etc. Easily converted into an "A"-shape with center tooth in front, a "V"-shape center tooth in rear, a straight harrow, or a right-hand or left-hand side harrow. Center tooth can be removed to cultivate on both sides of row. Reversible teeth are bolted on to oil-tempered spring steel shanks and you can use either end of the teeth which saves time needed for sharpening during the busy season. Thoroughly turns and pulverizes the soil, uproots and buries weeds, grass and leaves a level, clean bed! Seasoned oak beam and handles. Prepaid, see NOTE below.

NEIGHBOR **DON'T ROB YOURSELF**
BY SUPPORTING A WORN-OUT SEPARATOR—
GET **ALL THE CREAM—GET BIGGER CREAM CHECKS**
WITH THIS CLOSE-SKIMMING
JIM BROWN SEPARATOR

Jim Brown

MERIT Cream Separators

Skim Down to 2/100 of 1%!

Jim Brown "Merit" Separators get all the cream! Laboratory tests on regular stock machines show that they skim down to 2/100 of 1%. In fact, there is scarcely a trace of cream left, less than a tablespoonful in a hundred pounds of milk! That is the kind of a separator which you want because it will put money in your pocket, rather than lose it in the skimmed milk.

STAINLESS STEEL DISCS are used in these separators. They stay bright because they are stainless steel clear through. They wash easier and they never rust. But, best of all, they wear for years and years! These discs are interchangeable and have no welded spacers on their surface to interfere with flushing and washing.

BUILT FOR LONG LIFE

The strong, helical gearing not only makes turning easier, but has longer life than the common, hard-turning worm type drive employed in some other makes. They are large-tooth, special-cut gears of the same type as used in automobiles. My separators use BOTH plain bearings and ball bearings. Ball bearing is used on the end of the main shaft and on the end of the bowl spindle. Plain Bronze Alloy or Babbitt Bearings are used elsewhere, because they are not affected by moisture and lactic acid. This combination of bearings makes what I believe to be the easiest turning and smoothest-running separator ever built!

The top of the big 7-gallon tin supply can is only 40 inches from the floor—you don't have to stretch and strain to empty a pail of milk into the supply can. Likewise the crank is placed low. This, coupled with the proper gears and bearings, make a machine that a child can turn readily.

The supply can is set on a turntable which enables you to swing the supply can clear around, even while full of milk, if desired. Both spouts are adjustable to almost any position. Has true balanced bowl, speed indicator-bell and an accurate adjustable cream screw.

I believe my "Merit Separators" are the equal of any separators you can buy, regardless of price! They are properly designed, sturdily built, turn easily, run smoothly, get ALL the cream, and are built to last. Remember My Prices Are Freight Prepaid.

PRICED AS LOW AS

EFFICIENT BOWL

Compact, light, and easy to clean. Skimming discs are rust-proof aluminum. Bowl spindle is short and sturdy. Cream comes out at top of bowl and skimmed milk at bottom.

EASY TURNING

Efficient Balanced Construction of bowl makes turning EASY!

Easy Terms
See Page 2

385 Lb. Capacity
\$30.14
Freight Prepaid

225-lb. per hour model at left is recommended for one to three cows. 385-lb. per hour model at right will take care of from three to five cows. The larger model has the supply tank set on a handy turn-table. Both will do an excellent skimming job when securely bolted to a solid bench or table.

I believe these are the finest Bench Model Separators in America at anywhere near my low price! They have what is termed "oil-less bearings"—It is not necessary to oil these separators, other than to squirt from four to six drops of oil on the spindle each time before the bowl is placed in position. This oiling of the spindle serves a double purpose. If any grit or dirt gets into the bowl socket, the oil will float it to the upper end of the bowl socket, so that there will be no danger of the bowl bushing sticking to the spindle. The surplus oil will at all times renew the lubricant in the bearings on the bowl spindle, while the speed of the spindle will throw sufficient surplus oil to other parts of the gearing to contact ANY price can skim closer than that!

Galvanized Cow Stalls

\$5.81 **Each, Less Stanchions**

Jim Brown Arch-Type Cow Stalls are made of 1 1/2 in. outside diameter Galvanized Steel Tubing.

Arch is 5 ft. high above curb and 28 in. wide inside. Stall consists of arch, arch connector and one curved partition; also a clamp for fastening top of stanchion to arch, and anchor for fastening bottom of stanchion to curb. Stalls can be supplied in any width from 3 ft. 2 in. to 4 ft. (Be sure to give width wanted when ordering.)

With each row of stalls we supply a fitting for fastening one end to wall and one curved end section. (State whether end section will be used at right or left hand when standing at gutter and facing manager.) If neither end of stalls connects to a wall you will need an extra end section which must be ordered separately.

Price of stall does not include stanchion. Either style of stanchions shown below can be used. The Superior Stanchion is recommended as the strongest and best constructed; will give many years service. Freight Prepaid Prices at Left. See Notice at Bottom of Page.

Automatic Waterer

\$2.68 **Ea.** **Postpaid**

One of the most, practical and popular waterers ever made—lets hogs, sheep and other small stock drink when they want to. Has a heavy cast iron double drinking bowl, with wide flared top. Quickly and easily attached to side of barrel, tank or to pipe line from a gravity tank. Will not work on a pressure line. An automatic brass float regulates the flow of water. Construction keeps dirt out of valve mechanism. Comes with strainer, pipe nipple and gaskets for attaching. Size, 14x7x4 inches. Postpaid.

No. 7E552—Each..... **\$2.68**

WATER BOWLS

NOTE!

Jim Brown Galvanized HEAVY STEEL TANKS

Made from 20 Gauge Galvanized Steel

Jim Brown cattle and stock tanks are made from strictly first-class 20 gauge galvanized sheet steel. Constructed in such a manner that water will not come in contact with any material that is not galvanized. When you buy from Jim Brown, you get a heavy, rust-resisting steel tank that will give you long service without leaking. Corrugated and smooth styles and supplied with necessary top and side braces.

Corrugated Tanks Corrugated tanks with vertical corrugations all around add strength and stiffness and allow for expansion of freezing water. Sides are folded at top making a flange of three thicknesses of steel while the bottom and sides are folded together to form a flange of four thicknesses which is packed with a special water-proofed packing, coated with a water-proof seal and closely riveted, making a water-tight joint and a tank that does not leak.

Smooth Tanks Smooth tanks have angle-iron tops properly braced according to size of tank. All joints or seams are made with a rust-proof lock seam, sweat soldered on the inside, which makes a smooth clean joint. Two 1/2" by No. 10 bands are closely riveted to bottom flange. This joint is sweat soldered on the inside, insuring the tank against leakage.

FATTEN 200 LB. HOGS 34 DAYS SOONER THAN HAND FEEDING!

USE *Jim Brown's* CAFETERIA HOG FEEDERS

HOGS FEED THEMSELVES!

Positive Acting Feed Agitators

Hogs nose doors up to feed. Feed agitators, attached to chain, extend from eating level into feed—hogs root against agitator bars as they eat—keeps feed flowing into trough. Flow of feed stops when hog stops eating and door drops shut—prevents any waste of feed and prevents spoilage from the weather.

\$26⁷⁵

20 Bushel
Prepaid

You are raising hogs to make a profit and it will pay you and pay you well to use a Jim Brown improved Cafeteria Feeder for self-feeding. Self-fed hogs gain weight faster at less feed cost and go to market many days quicker than hand-fed hogs. Self-fed hogs eat slowly, crunch every bite and digest ALL the feed eaten. Always contented, no fighting. PUT ON

FAT all the time. Records show that 5½ bu. shelled corn and 40 lbs. good supplement feed will produce 100 lbs. of GAIN. In hand-fed lots it takes about 603 lbs. of feed. Self-feeding saves you about 162 lbs. of feed for every 100 lbs. of gain.

Hogs Feed from Both Sides of Cafeteria Feeders

Jim Brown's Improved Cafeteria Hog Feeders are built from heavy galvanized sheet steel, very rigidly braced. They will give long service under rough usage. Cannot warp, rot or accumulate moisture to cause feed to sour. Feed Hopper has sloping sides—wider at bottom. Handles most ground feeds without bridging, wedging or clogging. Adjustable Throat controls flow of all ground or whole grains into feed trough. Double Trough with raised "V" center—hogs eat from both sides. Self-closing lids protect feed from weather and other livestock. Hogs lift lid with snout and eat. Hinged roof on hopper has hasp for locking. Special hinge lets lid drop to one side for easy filling. All feeders have partitions, one door wide, making separate compartment for supplement or mineral. Width at trough edge 42 inches. Width of Hopper—bottom 24 in.; top 21 in.; height overall 41 in.

HOGS FATTEN FASTER IF THEY DRINK PLENTY OF CLEAN WATER

SUMMER FOUNTAIN **\$16⁵⁴**

For pasture, cornfield or feeding floor. Four large hogs can drink at once. T-iron runners with rod and pipe cross braces. Single wall tank; has double lock-seamed bottom and top. Depressed top with 3-inch screw cap for easy filling. Brass outlet plug. Side rods hold tank in place. Tank may be lifted out of pan for cleaning. Drinking pan is 32x27x8½ in. deep. Trough edge is 10½ in. high. Two sizes made from heavy galvanized steel approximately 85 gal. or 100 gal. capacity. Overall height 40 in. and 44½ in. Freight Prepaid.

No. 7E1505—85 Gal. Capacity.....**\$16.54**
No. 7E1506—100 Gal. Capacity.....**17.55**

CIRCULAR PAN FOUNTAIN **\$21⁶⁵**

A portable, heavy duty hog waterer that soon pays for itself in rapidity of hog growth. Twelve hogs can drink from round pan at one time. Strap iron stanchions prevent fighting. Single wall drum easily lifted for cleaning out pan. Sled runners with pipe and rod cross braces. Tank has double lock-seamed top and bottom. Depressed top with 3 inch screw cap for easy filling. Brass outlet plug. Drinking pan 41¾ inches in diameter, 5 inches deep. Tank diameter 27¼ in. Overall height 40 inches. Capacity 100 Gals.

No. 7E1507—Circular Pan Fountain. Freight Prepaid.....**\$21.65**

ALL-SEASON FOUNTAIN **\$28⁴⁰**

Water is your cheapest feed for rapid growth. When hogs have warm water to drink it requires less feed to keep them warm. An ideal all-year fountain. Sled runners with chain hitch—easily moved when filled. Double drum tank, heated by two double wick burners with 5 qt. oil reservoir. Water kept from freezing by warm air which flows between pan edge and heater enclosure. Drinking pan is 32x35½ inches, 4 inches deep. Height to drinking pan edge 10½ inches. Lamp heater removed from either end of fount. Capacity 100 gallons.

No. 7E1508—All Season Fountain. Freight Prepaid.....**\$28.40**

TWIN CUP FOUNTAIN **\$27³²**

Provides all season watering for hogs or sheep in pasture, cornfield, or feeding floor. Heavy galvanized steel tank and drum. Double wall construction and two lamp heaters keep water from freezing in zero weather. Heated air circulates between drums. The 1½-inch clearance keeps water cool in summer. Inner tank bolted to trough. Outer can has cone top, easily removed for filling open top inner water tank. Automatic Float Valve maintains even water level in drinking cups. Brass strainer screen protects valve parts. Adjustable brass float controls water level. Drinking cups are 9½ in. wide, 9 in. long and 6 in. deep. Height from ground 11½ in. Hinged lids retain heat. Removable clean-out pans in cups—easy to keep clean. Lamps burn 30 hours on one filling. Overall height 44 inches. Diameter 30 inches. Capacity 78 gallons.

No. 7E1509—Twin Cup Fountain with Two Lamps. Freight Prepaid.....**\$27.32**

JIM BROWN PAYS THE FREIGHT ON ORDERS OF \$10.00 OR MORE

Government Experiment Stations Advise Feeding Mineral Mixtures to Increase Animal Growth and Productivity

Jim Brown Advises That You Feed These High Quality KAKO COMPLEX MINERAL MIXTURES FOR ALL LIVESTOCK

MY PRICES ARE FREIGHT PREPAID! SEE NOTE BELOW.

Uncle Sam Wants More Pork

Don't let your hogs lay down on the job now. Uncle Sam is calling for heavier pork production. Finish your hogs earlier—get them to market sooner and with less cost by supplementing your feed with Jim Brown "Kako" mineral mixture. It balances the feed, builds bone and flesh, giving you a greater gain with less feed. Helps produce larger litters of good, strong, sturdy, healthy pigs that will pay you back many times the cost. This mixture contains the proper proportions of Carbohydrates, Protein, Fats, Phosphorus and Calcium substances necessary to supply the body requirements for proper nutrition and growth. Prepaid with orders of \$10.00 or more.

No. 21E1—Complex Hog Mixture.
100-lb. Bag. Each.....**\$3.10**

Scientific Feeding Important!

No animal on the farm needs Mineral so much as the Dairy Cow. The Mineral drain, especially Lime and Phosphorus on the Dairy Cow is most terrific and must be replaced by the feeding of a good Complex Mineral Mixture. Jim Brown's "Kako" Dairy Mineral provides the necessary elements of not only Lime and Phosphorus but also Iron, Potash, Sulphur, Magnesium, Chloride, Sodium, etc. Practically all grains and pastures are low in Minerals and my "Kako" Dairy Complex Mineral Mixture will supply the necessary elements for development and production. Also a good mineral supplement for Sheep, Goats and Horses. Prepaid with orders of \$10.00 or more.

No. 21E2—Complex Dairy Mixture.
100-lb. Bag. Each.....**\$3.60**

Increases Egg Production

The science of chick feeding is developing by leaps and bounds. More attention is being centered upon the importance of mineral or inorganic material in the rations for growing chicks. Minerals build the bone, provide a good skeleton for the meat and provides the necessary material for greater egg production. Complex Poultry Mineral has been found to also aid materially in the digestion of other foods and in building up a natural resistance against disease. Jim Brown "Kako" Mineral Mixture will supply everything in Minerals that is necessary for growth of bone and body and greater egg production. Prepaid with orders of \$10.00 or more.

No. 21E3—Complex Poultry Mixture.
100-lb. Bag. Each.....**\$3.70**

100 Lbs. Contains 20 Lbs. Yeast

A combination of the best minerals with a sufficient amount of yeast added to use in fermenting your feeds. Three pounds of Jim Brown "Kako" Super Yeast Mineral added to 100 lbs. of Oats, Mill Feed or any ground feed will ferment it in 12 hours ready to feed. Also made to give results as a straight Mineral Mixture. Super Yeast Mineral also contains Nicotinic Acid which helps to control Necro. Necro hogs require soft feed and by fermenting feed with a yeast mixture containing Nicotinic Acid it has been found that Necro has been controlled to the extent of getting the hogs to market. My price is exceptionally low. Freight Prepaid on orders of \$10.00 or more.

No. 21E4—Super Yeast Mineral.
100-lb. Bag. Each.....**\$5.20**

STEEL PIPE

BLACK OR GALVANIZED

STANDARD STEEL PIPE

Meets All U. S. Government AS
Specifications—Tests LOW
30% Better Than Ordinary AS

5¹/₂ c
Per Ft.

This brand new pipe meets all specifications of the Army, Navy, Amer. Ry. Assn. and Society for Testing Materials. Every length is perfect. Tested to 1000 lbs. per sq. in. water pressure as against 750 lbs. standard in most mills.

Black pipe is just as it comes from the mill, with no coating, and is generally used for irrigation, oil, gas, steam, hot water systems, air lines, etc. Galvanized pipe is coated inside and outside with a heavy layer of zinc spelter put on by the hot-dip process, which protects it from rust. Galvanized pipe is recommended for drinking water, supply and waste pipes, etc. Pipe is measured by INSIDE DIAMETER.

(³/₄" pipe is almost 1" OUTSIDE DIAMETER.) Furnished in 21 foot lengths. Each length includes a thread on each end and one straight end coupling. If you specify other lengths ALL THREADS WILL COST EXTRA as shown below, and NO COUPLINGS WILL BE SUPPLIED unless ordered extra.

COPPER-BEARING

STEEL PIPE AS LOW AS 7³/₄ c Per Ft.

For those who want the longer service that copper-bearing steel always gives! You can obtain Copper-Bearing Steel Pipe which will last up to twice as long as ordinary steel pipe for just a few cents more per length. Jim Brown Copper-Bearing Steel Pipe is made to the same perfection as the Standard Steel Pipe described at the left, but in addition, it has the DURABLE COPPER CONTENT which insures longer life against rusting. Furnished in 21-foot lengths.

Jim Brown

Heavy Duty FARM PUMPS

Jim Brown Pumps have Heavy Cast Iron Bodies. Every casting is smooth, sturdy and well made. Tapping and machining are carefully done. The cylinder is the strong, outside-capped style. This cylinder will go into a well casing measuring 4 3/4 inches (or more) inside diameter. Both the Force Pumps and Lift Pumps have 6-inch stroke, anti-freeze drip-hole, adjustable handle and a 3x10-inch cylinder.

Prices of COMPLETE PUMPS INCLUDE: Pump, Cylinder, 3/4-inch Galvanized Rod, Couplings and enough 1 1/4-inch Galvanized Pipe to reach within two feet of the bottom of well. Cylinder is 4 feet below base of pump for wells up to 25 feet deep. For wells over 25 feet deep, enough rod will be furnished to place cylinder within 2 feet of bottom of well. State TOTAL DEPTH of well, from top of platform to bottom of well. If well is a special depth not listed in table below, use next deeper price.

Heavy Duty Force Pump

\$1786 For 10 Ft. Well
Freight Prepaid

Single-Acting Force Pump for Hand, Windmill, Gasoline Engine or Electric Motor. Has large, smooth, round plunger which passes through a brass packing nut, preventing leakage. Extreme upper end of rod is flattened for attaching to windmill. Can be operated by gasoline engine or electric motor if used with pump jack shown at right below.

Body of pump is tapped in back (opposite spout) to accommodate a 1 1/4 inch standard steel pipe. When cock-spout is closed water can be forced through this pipe to some distant point. Cock-spout also is threaded for garden hose.

Force pump comes complete with cock-spout, hose connector and brass lined cylinder (not furnished with plain iron cylinder).

RUNNING

Jim Brown DIRECT TYPE WATER SYSTEM

WATER ALWAYS READY

At the right is shown my Automatic Electric Shallow Well Water Pump. This outfit is a FRESH WATER SYSTEM. It starts to operate as soon as a faucet is turned on and pumps fresh water direct from the well. It does not have the large pressure-storage tank as shown on the lower half of this page. Ideal for the home, cottage, tourist camp, etc.

ONLY
\$40³⁷
FREIGHT PREPAID

275 Gallons Per Hour Capacity

This pump will draw water up vertically 22 feet and then will draw it horizontally a distance of 100 feet. In addition, it will force the water up to the second or third floor if desired. Pump is tapped for $\frac{3}{4}$ inch standard steel pipe on suction and discharge lines. The outfit comes complete as illustrated with automatic air volume control, pressure gauge, automatic switch and safety valve. Pump has spring closing valves, brass lined cylinder, automatic starting and stopping switch, automatic splash oiling system, one gallon priming chamber, and $\frac{1}{2}$ H.P. CAPACITOR-TYPE electric motor to operate on a 110 volt, 60 cycle alternating current. Floor space required for this compact outfit is 20 inches by 12 inches. Overall height is 21 inches.

One of the most outstanding features of this pump is that the valves and cylinder are easily accessible by removing a few nuts, without dismantling the whole system. And remember, my low price is freight prepaid.

Automatic Electric PRESSURE TANK SYSTEM

275 or 425 Gallons Per Hour Capacity Enough to Supply the Whole Farm

\$48²⁵
FREIGHT PREPAID
With 15 Gal. Tank,
275 Gals. Per Hour
Capacity

Plenty of clean fresh water is essential for many things on the farm and around the home. It is needed to produce healthy livestock, sprinkle the lawn and garden, wash the car, do laundry and cleaning, for baths, fire protection, etc. You no longer need to use it if you install one of these Jim Brown Automatic Electric Pressure Tank Water Systems. You can get this system in two capacities, namely: 275 gallons per hour with various size pressure tanks; see below. The close-grained semi-steel castings are accurately machined and thoroughly inspected before the pump is assembled. The pump has Tobin Bronze piston rods. The connecting rod is split-type, the same as used in automotive construction. The main bearings are heavy double bronze type. The packing box is extra large and is all brass construction. The pump head is easily detached by removing the two nuts on the end of the pump. This facilitates the inspection or replacement of piston parts. Both suction and discharge valves may be replaced by removing the nut on the top of the air chamber or the bottom section of the pump head as the case may be. Everyone of these pumps has automatic oiling from the crank case at each revolution; valve seats are cast brass accurately machined and polished, valve plates and stems are made from brass, and phosphorus bronze springs are used. The 275-gal. size pump uses a $\frac{1}{2}$ H.P. electric motor, while the 425-gal. size pump has a $\frac{3}{4}$ H.P. motor. Both motors are the CAPACITOR-TYPE and operate on 110 volt, 60 cycle alternating current.

Each outfit comes with automatic switch and safety valve. Tank models have automatic air volume control and pressure gauge. Each pump will lift water up a distance of 22 feet vertically and will draw it a distance of 100 feet horizontally. The 275-gallon per hour capacity pump is tapped to receive $\frac{3}{4}$ -inch size standard steel pipe on both the suction and discharge lines. The 425-gallon per hour capacity pump is tapped for 1-inch suction line and $\frac{1}{2}$ -inch discharge line. Each tank is made of heavy gauge steel.

**Correct Design
Rigid Construction**

Big Steel Tray Holds 4 1/2 Cubic Feet

The illustration above shows the sturdy construction of the frame used on the Jim Brown Jumbo Wheelbarrow. The legs are of channel iron and are hot-riveted to the leg braces, forming one unit. The leg or bearing surfaces are bent square instead of round, giving substantial bearings on the ground which keeps the barrow steady and in a secure position when being loaded.

The legs are set in grooves when attached to the handle, these being reinforced by cross stretchers bolted to frame. The frame is reinforced and tied together by cross bars. Tray brace in front is of channel iron, reinforced to prevent bending. Handles are hard wood with dumping guard at the end. Tray is 25 in. wide, 37 in. long with a depth of 19 1/2 in. at dash and 9 1/2 in. at back. Capacity 4 1/2 cu. ft. Never-slip type axle is screwed into the wheel bearings. Has 15-inch steel wheel with 1 1/4 in. wide tire. Wheel revolves on a steel bushing. My Jumbo is a wheelbarrow that has what it takes!

THE VICTORY

Jim Brown's **FINEST**
LAWNMOWER

Save Up to \$8.00 at My Prepaid Price!

\$13²⁵
16-In. Cut

Freight Prepaid

My New Streamlined Victory Mower is the kind that makes lawn mowing Fun instead of hard work! It rolls on Ball-bearing Rubber-tire wheels, has a rubber-covered Roller. It does its job *So Easily, So Quietly*, that it seems to whisper its way through the job! And the Victory is so good-looking that I want to emphasize the fact that it is precision-built as well as beautiful.

This machine is made with precision workmanship throughout, and from finest materials. Notice the modern All-Steel construction . . . even the handle is made of strong tubular steel, with malleable castings and comfortable Rubber Grips.

Wheels are 10 inches high, have Cadmium Hub Caps, big semi-pneumatic Rubber Tires—Chrome-Steel Ball Bearings! The Roller has a solid wood center, and rot-resisting rubber cover. These features make this mower amazingly quiet in operation. Flange on inside of wheels and spring-cap oilers keep dust out of gears.

A fine blade assembly and quality cutter bar assure perfect cutting. Five crucible steel blades are rigidly aligned on the reel by 4 malleable steel spiders which are *sweated* onto the shaft. This rigid assembly makes perfect adjustment of blades and cutter bar *EASY*. There is no knife-play, no vibration. The self-adjusting feature of the reel, shown at left, automatically takes up any end-play in the reel which long wear may cause.

The Victory is what is commonly called a "self-sharpening" mower—blades tend to sharpen themselves, but the cutter bar has many more times than ordinary mowers. *Finish* is a handsome 2-tone Green Enamel, with Red trim. This mower will give you perfect satisfaction for many years; it's the one to choose if you want the very best!

HIGH QUALITY STEEL WHEEL MOWERS

E-Z-CLIP BARGAIN MOWER

A high-grade ball-bearing lawn mower at a very low price. It is sturdy and compact, and will stand hard use. Has many features found on higher priced machines. If you can't afford one of my higher priced mowers, do not pass by this one.

High-grade ball-bearing parts insure easy running. Dust-proof caps protect the polished steel ball bearings. Hardened cones, one of which is self-adjusting to take up play, will last for years. The pinion-clutch is a one-piece casting, so arranged that it is both force and gravity feed. Dirt and grass can't clog up the gears. Raised lip on cutting bar enables you to sharpen mower many more times than is usual. Has 4 self-sharpening crucible tool steel blades, 8-inch high wheels and is finished in Gold body with Blue trim. Freight Prepaid with Orders of \$10.00 or More.

The WINNER—5-BLADES

An outstanding value in a well-built 5-blade steel wheel lawn mower. Finest materials! Polished chrome steel, ball bearings in wheels are case hardened to withstand hard use, make mower easy to push. The Caps, Pins and Cones are made of the best tool steel. Five Cutting Blades are high-grade crucible tool steel, properly tempered and smoothly ground to insure even cutting. The Cutter Bar has a raised lip, is heavily reinforced, and accurately machined and fitted. Pinion Gears and Pawl are positive in action. This gives quick pick-up to the reel. Wheels are 10 inches high, are heavily reinforced and have a deep tread steel tire which insures a non-slip drive. Hardwood handle is smoothly finished and beautifully varnished. My Winner mower is finished in GOLD and BLUE trim. Freight Paid with \$10.00 Orders.

AIRFLITE

BALL-BEARING

LAWN MOWER

Fine mechanical construction and high quality materials are combined in my "AIR-FLITE" to give you the lawn mower buy of the season! I don't know of any mower that offers these high quality features at my low prepaid prices!

\$10⁸⁰
16-Inch Cut

The 5 cutting blades are of Crucible Steel and the reel is Self-Adjusting as shown in the illustration at right. Prevents play in the blades as they strike past the cutting bar, so that the grass is mowed smoothly the full width of the cut. The Pinion Gears and Pawl are positive in action, using both Force and Gravity Feed. This, together with the Non-Slip, Semi-Pneumatic Tires, gives a quicker pick-up to the reel. You never have "skips" with the AIR-FLITE!

Precision Built Throughout!

The raised lip on the cutter bar keeps it sharp longer and polished chrome steel ball bearings, 10½ inch wheels and rubber covered roller make operation quiet, smooth and effortless. Construction of wheels keeps dirt from clogging gears. Polished, Cadmium Finished Hub Caps together with a beautiful TWO-TONE GREEN finish give the AIR-FLITE a handsome, distinctive appearance.

Six Inspections

To eliminate the possibility of defective materials or workmanship, there are six inspections by six separate inspectors at the factory. Their job is to guard the quality that is built into every AIR-FLITE lawn mower so that you will get the extra years of service which you may expect from this deluxe machine. Freight Paid on Orders of \$10.00 or More.

With 16-Inch Cut

Jim Brown
SUPERIOR

BALL BEARING LAWN MOWER

Feature for Feature my Superior Ball Bearing Lawn Mower matches the quality and efficiency of mowers which sell for as much as \$4.00 more! It matches them in fine appearance and easy operation too! It is the ideal machine for those who want the newest features and fine construction in a medium priced machine.

Has Deluxe Features illustrated at left—and many more fine details of construction to assure long life, easy operation, and freedom from repairs. Has 5 crucible steel blades, securely fastened to reel cross-bar so that blades always stay in perfect adjustment with bed-knife—cut clean and easy. Bed-knife is extra heavy with raised lip for permanent perfect alignment.

Precision ball-bearings assure easy running and longer life and the heavy rubber tires reduce vibration and lessen the shock when you strike a wall or side-walk. Rubber tires also reduce the clatter of operation and deep-cut tread gives positive traction . . . enabling you to cut grass even in cramped, awkward corners and avoids "skips." Frame is rigidly braced; hardwood handle is well-formed. The Superior is finished in gold with blue trim.

Freight Paid on Orders of \$10.00 or More.

I guarantee all Jim Brown Nursery stock to be healthy, clean, and true to name. I further guarantee safe delivery of every shipment. Stock found not true in transit or damaged free. Stock lost free if reported within 15 days. We assume no responsibility beyond original purchase price.
Your order will be shipped direct from nursery to you at the best time for planting in your locality. On account of State laws shipments cannot be made to Colorado or west of the Rocky Mountains.
NOTE: We cannot accept orders for less than \$1.00. We do not break packages, so order only in quantities specified.

A Word About Nursery Stock

Nursery Stock prices cover a very wide range. I have been offered stock that I could sell at lower prices but I don't want it, and I don't think you would either. In fruit trees especially the first cost is a very small part of the total when you consider the care and time required before you get your first crop, so you can readily see it is to your advantage to get strong, sturdy stock that will go right ahead and give you results in the shortest time.

All of my Nursery Stock is hardy, Northern Grown Stock, except Figs, Pecans and Crepe Myrtles which are not hardy in the North. It is grown by old established, reliable nurseries that have years of experience in growing good sturdy stock and care is taken in packing so it will reach you in perfect condition. All trees are standard grade, that is, 2 to 3 ft. trees will be 3/4 in. in diameter, 3 to 4 ft. 7/8 in. to 1 in. and 4 to 6 ft. 1 1/2 in. and larger. Some of the 2 to 3 ft. trees might be "whips," but all of the larger sizes are well branched trees of which you can be proud. Fruit trees are trimmed before packing. This of course costs more, but I have it done because it not only saves you time but makes a sturdier bundle that can be handled without damage. Many nurserymen think there will be a shortage of good stock this year so it will pay you to get your order in early and I will ship it to you at the proper time for planting in your locality.

APPLE TREES

"Eat Apples for Health" is a well-known saying. A little money invested in Apple trees will give you enough fruit for your family and allow some over to sell. A few trees add many times their cost to the value of your home. Plant 30 to 40 ft. apart.

Summer and Fall Varieties

No. 12E2—Yellow Transparent—Good quality with crisp flesh. A popular market variety.
No. 12E1—Early Harvest—Medium size, rich, acid flavor. Straw color when ripe. High quality, productive.
No. 12E11—Red June—A beautiful, large red apple. Choice market and home variety.

Winter Varieties

No. 12E3—McIntosh—Large, deep crimson with white flesh. Bears regular and is a favorite in the apple belt. A good market variety.
No. 12E5—Baldwin—An old reliable, red apple. High quality and flavor. Excellent keeper.
No. 12E7—Grimes Golden—Rich, golden color. Flesh is yellow, very firm, crisp and juicy. Excellent for eating or cooking.
No. 12E18—Red Jonathan—Beautiful red color. Highly flavored and of excellent quality. Popular for home use or market.
No. 12E20—Red Northern Spy—An improved Northern Spy which bears much earlier than the old variety. Highest quality. Its delicious flavor and excellent cooking qualities make it a favorite.
No. 12E9—Red Rome Beauty—An established market variety. Bears early and is a good keeper.
No. 12E13—Red Stayman—A vigorous grower and is drought resisting. Has large, bright red fruit and is very productive. Juicy, fine flavor.
No. 12E21—Double Red Delicious—A much deeper red than the common variety. Large, highly flavored fruit in demand at good prices.
No. 12E14—Yellow Delicious—Rich yellow. Flesh fine-grained, crisp and juicy. Vigorous, bears young.

Height	Each	5 Trees	10 Trees	25 Trees	50 Trees

3 to 4 ft.	57c	2.47	4.18	9.98	19.00
4 to 6 ft.	86c	3.99	7.60	16.63	29.93

Order by number. State variety wanted.

PEACH TREES

Peach trees prefer a well-drained sandy loam but will adapt themselves to almost any well-drained location if given proper care. Plant 18 ft. apart. Listed in order of ripening.

No. 12E90—Mayflower—A brilliant red, fine flavored early peach. Popular in the South for home use and early market.
No. 12E86—Golden Jubilee—A delicious, yellow freestone of good size. Hardy and a regular bearer.
No. 12E81—Belle of Georgia—White freestone of good flavor. The leading white fleshed variety.
No. 12E96—South Haven—Large yellow freestone of excellent quality. Firm, richly flavored and hardy.
No. 12E87—Champion—Yellowish white freestone with mottled red on sunny side. Hardy. A good variety for nearby markets and home use.
No. 12E99—Hale Haven—A large round yellow freestone. Hardy and rot-resistant. Excellent flavor. About two weeks earlier than Elberta.
No. 12E95—Rochester—Orange-yellow freestone blushed with deep red. Juicy and highly flavored.
No. 12E82—Early Elberta—Similar to Elberta but ripens about a week earlier.
No. 12E84—J. H. Hale—Larger than Elberta. A high quality yellow freestone of superior quality.
No. 12E83—Elberta—Large yellow freestone. Widely known and a favorite market variety.
No. 12E94—Indian Cling—Large size. Creamy white skin mottled with deep red. This famous old Southern peach is good to eat and will make the finest peach pickle.

Height	Each	5 Trees	10 Trees	25 Trees	50 Trees
2 to 3 ft.	29c	\$1.14	\$2.09	\$4.75	\$ 8.55
3 to 4 ft.	34c	1.52	2.85	6.65	11.88
4 to 6 ft.	42c	2.00	3.80	8.55	15.20

Order by number. State variety wanted.

APRICOT TREES

While Apricots cannot always be depended on for a sure crop in all localities, a few trees should pay as the fruit is always in demand. Plant 16 to 20 feet apart.

No. 12E33—Royal—Large oval shape, heavy cropper. Dull yellow with orange cheek. Preferred for drying and canning.
No. 12E3—Moopark—Large and of fine quality. Yellow with red cheek. Flesh sweet, rich and juicy. Very productive.

Height	Each	5 Trees	10 Trees	25 Trees
2 to 3 ft.	48c	\$2.05	\$3.84	\$ 8.56
3 to 4 ft.	57c	2.50	4.69	10.15

Order by number. State variety wanted.

FIG TREES

This fruit thrives in the Cotton Belt but is not hardy in the North. Delightful to eat and for preserves. Plant 15 feet apart.
No. 12E212—Magnolia—A very large, brownish fig of excellent flavor. Widely grown for commercial preserves.

18 to 24 in. 60c each

NOTE As small packages of Nursery Stock are easily damaged, Please make your Order amount to \$1.00 or More.

PEAR TREES

Pear trees require little space and are usually money makers, especially in the South. Plant about 20 ft. apart.

No. 12E61—Bartlett—Large, yellow with red blush. Rich, juicy and high flavored.

No. 12E62—Kieffer—Large, good keeper. Prolific, bears early. Ripens October to November.

No. 12E63—Seckel—The old reliable sugar pear so popular for spicing. A small sweet pear of highest quality.

No. 12E65—Clapps Favorite—Resembles Bartlett but ripens earlier. Hardy and productive.

No. 12E66—Bosc—A long, tapering russet pear. Fine quality and brings good prices in November and December.

2 to 3 ft.	48c	\$2.09	\$3.80	\$ 8.55	\$15.20
3 to 4 ft.	57c	2.66	4.94	11.40	21.85
4 to 6 ft.	67c	3.23	6.27	15.20	29.45

Order by number. State variety wanted.

CHERRY TREES

Sour cherries thrive on most well-drained soils but should not be planted on wet ground. Sweet Cherries are not recommended for the South. Plant 18 to 25 ft. apart.

Sour Varieties

No. 12E42—Early Richmond—Medium size, light red. About ten days earlier than Montmorency.

Fine for canning.

No. 12E43—Large Montmorency—Large bright red fruit. Tree is thrifty and productive. Considered best market variety.

Sweet Varieties

No. 12E46—Windsor—Large, dark red fruit; high quality, firm and juicy. Very productive.

No. 12E47—Gov. Wood—Yellow with red cheek. Large, sweet and delicious. Productive and popular.

No. 12E41—Black Tartarian—Large blackish red. Ripens early. Juicy, rich, and of fine flavor.

No. 12E44—Royal Ann—Large size. Pale yellow with bright red cheek. Firm, juicy and sweet. Good for eating or canning.

Height	Each	5 Trees	10 Trees	25 Trees	50 Trees
2 to 3 ft.	48c	\$2.28	\$4.18	\$ 9.50	\$17.58
3 to 4 ft.	57c	2.85	5.13	12.35	23.28
4 to 6 ft.	72c	3.42	6.27	14.73	28.98

Order by number. State variety wanted.

NECTARINE TREES

A cross of Peach and Plum resulting in large, juicy, freestone fruit, unequalled for use fresh or for canning or drying. Color is a deep orange-red. Flesh is fine grained and of a reddish color. Culture is same as for peach trees.

No. 12E75—3 to 4 ft. trees, 72c each. 5 for \$3.23.

QUINCE TREES

In sections where it thrives the Quince is in demand for cooking purposes. I offer the Orange, which is the most popular quince. Large golden yellow fruit with excellent flavor. Reliable cropper.

No. 12E231—3 to 4 ft. 76c each. 5 for \$3.52.

PECAN TREES

In the Southern states where they can be successfully grown Pecans are as good as insurance. If properly cared for they should begin paying in 5 to 8 years and the older they get the better they pay. Plant 40 to 60 feet apart. Not hardy in the North.

No. 12E223—Stuart—An old favorite for commercial orchards. Large, well shaped and of good flavor. Semi-thin shell. Sturdy 2 to 3 ft. trees. \$1.10 each.

On account of State laws shipments cannot be made to Colorado west of the Rocky Mountains.

MY 1942 SPECIAL

"5 in 1" APPLE TREE

Now anyone with a space 20 x 20 ft. can have their own apples from early summer to winter. Just think of it—Early Harvest, Yellow Transparent, Golden Delicious, Red Stayman, and Double Red Delicious Apples all from the one tree!

Trees are sturdy three year olds with the different varieties top-grafted. Each graft has a full year's growth, so don't confuse them with trees sent out shortly after they have been grafted. These trees should not be trimmed when you get them because trimming is done by experts at the nursery. You don't have to guess what to trim off. This work has been done for you at the nursery. **Order Early**—Supply is limited!

IT COSTS LITTLE TO *Beautify* YOUR HOME AND GROUNDS

BUSH ROSES

Every home should have a rose garden—a small nook, sheltered but not shaded, where the rose reigns supreme. We offer you a selection of varieties that combine beauty with sturdy hardiness and will give you a profusion of bloom throughout the summer.

No. 12E376. Autumn: Color varies from brownish orange to brilliant copper. A heavy blooming new rose.

No. 12E357. Betty Uprichard: Copper red buds opening into flowers of salmon pink and carmine copper. A strong, vigorous grower.

No. 12E367. E. G. Hill: Handsome, well shaped flowers of bright scarlet which deepen as they open. Vigorous and a free bloomer.

No. 12E351. Etoile de Hollande: An outstanding brilliant red rose. Very fragrant and is a free bloomer.

No. 12E375. Golden Dawn: Flowers of a decided yellow borne profusely on strong, low stalks. One of the best yellow roses.

No. 12E373. Joanna Hill: Buff on the outside and Indian Yellow within. A gorgeous rose which is also a profuse bloomer.

No. 12E369. K. A. Victoria: The old favorite white rose. Flowers are very fragrant and beautifully formed.

No. 12E353. Margaret McGredy: Large fragrant flowers of solid orange-vermilion. Vigorous grower and profuse bloomer.

No. 12E354. Pres. Hoover: Bright red tinged with yellow, orange and scarlet.

No. 12E364. Radiance: Beautiful rich pink flowers. Bush is vigorous and upright. Radiance produces more flowers per bush than any other rose.

No. 12E365. Red Radiance: Same as Radiance but color is a deep rosy red.

No. 12E356. Tallman: Bright red, old gold and yellow. A strong grower with glossy, attractive foliage.

CLIMBING ROSES

No. 12E301. Climbing American Beauty: Large, rose red flowers on long stems. Excellent for cutting.

No. 12E309. Crimson Rambler: Perfectly hardy and a fast grower. Large clusters of vivid crimson.

No. 12E307. Dr. Van Fleet: Large, shell pink flowers delightfully perfumed. Disease resistant.

No. 12E306. Hardy Marechal Niel: Charming golden yellow flowers. Well known in the South.

No. 12E308. Pauls Scarlet: Flowers of fiery scarlet are borne in clusters.

No. 12E310. Yellow Rambler: Large, double flowers of primrose-yellow borne in clusters.
Your Choice of Above 32c Each 3 for 90c

VINES

No. 12E702. Bittersweet (Celastrus Scandens): Shiny, rounded green leaves, bearing fruit of intense scarlet-orange. Used extensively for winter decorations.
29c Each 3 for 81c

No. 12E706. Boston Ivy: Fine for covering walls as it clings firmly to almost any surface. The dense leaves are a deep green changing to crimson.
34c Each 3 for 95c

No. 12E707. Silver Lace: A very fast grower that gives you more bloom than any other hardy vine. Covered with large sprays of silvery white flowers from late summer into fall.
40c Each 3 for \$1.10

HEDGE PLANTS

No. 12E754. Jap. Barberry: Most popular low hedge plant. Tough, hardy and dense. Can be left untrimmed but shears well if formal hedge is desired. Handsome green foliage turning to red and red berries in winter make it interesting the year through.

Size	25 Plants	50 Plants	100 Plants
9 to 12 in.	\$.98	\$1.89	\$3.25
12 to 15 in.	1.50	2.80	5.00

No. 12E753. Amoor River North: Privet is the most widely planted hedge. This is a hardy northern grown variety which stands extremely low temperatures. Persistent dark green foliage.

25 for 67c 50 for \$1.24 100 for \$2.00

No. 12E912. Cannula Collection: A mixture of 8 choice varieties. The new large flowering Cannas that make the beautiful beds so often admired. Plant in well-drained land and you will have flowers throughout the summer. Many gardeners plant Cannas in the Tulip Beds and thus have a beauty spot from early Spring to late Fall.

3 for 35c 8 for 79c—Prepaid

SHRUBS

No. 12E416. Jap. Barberry (Berberis Thunbergii): One of the most useful of all shrubs. Compact and low-growing. Handsome light green foliage in spring and summer turning yellow and red in fall, and the red berries in winter make it attractive the year around. Use for foundation, low group plantings, hedges, and around evergreen plantings for protection against dogs. Grows almost anywhere and will stand some shade. 15 to 18 in. plants.

No. 12E403. Red-Leaved Barberry: Same as Barberry, excepting that if planted in full sun the foliage is purplish red throughout the summer. 15 to 18 in. plants.

No. 12E410. Butterfly Bush (Summer Lilac): A beautiful shrub with long, lilac-colored flowers. Dies down in Winter in the North but makes quick growth in Spring. Sweet scented and very popular. Blooms all Summer. 2-year-old plants.

No. 12E438. Flowering Quince (Firebush): A tall, upright shrub with shining dark green foliage. Covered with crimson and rose flowers just as leaves appear. 18 to 24 in. plants.

No. 12E431. Forsythia (Golden Bell): Tall, upright growing. Covered with bright yellow flowers before the leaves appear in the spring. An excellent filler for massed shrub groups. 2 to 3 ft. plants.

No. 12E418. Honeysuckle: Tall, dense, and has good foliage which remains almost all winter. Fragrant pink and white flowers in early spring. 2 to 3 ft. plants.

No. 12E409. Hydrangea. A.G. (Hills of Snow): Large billowing white flower heads. If left alone grows tall but most people cut them back to the crown each spring which makes a round, dense bush 3 to 5 ft. Very good for foundations. 15 to 18 in. plants.

No. 12E427. Hydrangea P.G.: Long, pointed panicles of white bloom, changing to pink and reddish bronze in fall. If left untrimmed make fine tall hedges, but if severely pruned each spring develop into dense dwarf clumps. 18 to 24 in. plants.

No. 12E443. Red Snowberry (Symphoricarpos Chamaejasme): Grows to about 4 ft. Graceful, arching branches and good foliage. Small flowers are followed by large, bright red berries. Does well in shady spots. 2 to 3 ft. plants.

No. 12E445. Spirea Froebeli: A low growing shrub reaching a height of 2 to 3 ft. Red leaves in spring turning to reddish green. Large clusters of deep pink flowers nearly all summer. 18 to 24 in. plants.

No. 12E422. Spirea Van Houtte (Bridal Wreath): Graceful, arching branches blanketed with flowers make this a fountain of pure white bloom during the spring. Dense, dark green foliage during the summer. One of the most useful and popular shrubs. Grows to 5 or 6 ft. 2 to 3 ft. plants.

No. 12E412. Tamarix Africana (Flowering Cedar): A tall-growing plant having branches topped with delicate plumes of soft pink flowers. Foliage resembles asparagus leaves and is a tender gray-green which makes an attractive contrast with other shrubs in the summer. 2 to 3 ft. plants.

No. 12E424. Weigela: Medium-growing, upright. Lovely trumpet-shaped flowers, varying from light pink to deep rose, in Spring. 2 to 3 ft. plants.

Jim Brown's HARDY NORTHERN GROWN NURSERY STOCK

EVERGREENS

NORWAY SPRUCE

A tall growing, noble tree of pyramidal habit. Used extensively for "living Christmas Trees," and as it stands trimming is one of the best evergreens for hedges.

No. 12E503. 12 to 18 inches. Prepaid.
70c Each 3 for \$2.00

BLUE SPRUCE SHINERS

The silvery blue needles are short, stiff and closely set. One of the most impressive evergreens. These shiners have been carefully selected for their distinct blue shade.

No. 12E526. 8 to 10 in.
60c Each 3 for \$1.70 Prepaid

PFTZER'S JUNIPER

Most popular low growing evergreen known. Long, whip-like branches at various angles covered with extremely dense, gray-green foliage. Fast growing and hardy. Used extensively for entrances and foregrounds.

No. 12E506. 10 to 12 in.
70c Each 3 for \$2.00 Prepaid

IRISH JUNIPER (Jun. Hibernica)

Has very dense, glaucous green foliage. The slender columnar growth makes it very popular for entrance and also for cemetery plantings.

No. 12E518—Prepaid Prices
9 to 12 in. 40c Each 3 for \$1.10

GOLDEN ARBOR VITAE

(Biota Aurea Nana)

A beautiful dwarf evergreen. The new growth is a bright golden color which makes a good contrast with other evergreens.

No. 12E527—Prepaid Prices
8 to 10 in. 70c Each 3 for \$2.00

PYRAMIDAL ARBOR VITAE

Erect, pyramidal growth and dense, bright green foliage. As it can be trimmed at will, shape and height can be controlled.

No. 12E517. 10 to 12 in.
60c Each 3 for \$1.70 Prepaid

GLOBE ARBOR VITAE

Grows naturally into a dense, low, globe-shaped plant. Foliage is a rich, dark green. Very popular for foundation planting and entrances.

No. 12E516. 6 to 8 in.
50c Each 3 for \$1.40 Prepaid

CREEPING JUNIPER

(Jun. Horizontalis)

Long trailing branches with dense, bluish-green foliage. Valuable where a low growing evergreen is needed. Fine for rockeries.

No. 12E511. Prepaid
9 to 12 in. 40c Each 3 for \$1.15
12 to 15 in. 70c Each 3 for \$2.20

AUSTRIAN PINE

A fast growing pine with extra long needles of dark green. Branches and needles are thick set making an extremely dense growth. Ideal for windbreaks in exposed places.

No. 12E533. 10 to 12 in.
60c Each 3 for \$1.70 Prepaid

SPREADING JAP. YEW

(Taxus Cuspidata)

An evergreen of many uses. Its spreading, irregular habits of growth makes it good for informal corner plantings, but as it stands trimming can be sheared for a low hedge or kept in compact shape. The heavy, dark green foliage is different from other evergreens and many red berries hang close to the branches in the winter.

No. 12E535. 9 to 12 in.
80c Each 3 for \$2.30 Prepaid

UPRIGHT JAP. YEW

(Taxus Capitata)

Similar to Spreading Yew but grows in columnar, upright form.

No. 12E534. 9 to 12 in.
80c Each 3 for \$2.30 Prepaid

PEONIES

Peonies are one of the most popular garden flowers as they give you a wealth of bloom in spring and early summer and thrive in almost any soil. They are gross feeders and should be given a top-dressing in late fall and this should be worked into the ground in spring.

No. 12E880. Baroness Schroeder: Late; rose type. White shaded with flesh. Immense flowers with high centers that last a long time. Very fragrant.

No. 12E875. Felix Crousse: Large bomb type flowers of clear, brilliant red. A vigorous plant of spreading habit. Blooms in late mid-season.

No. 12E877. Festiva Maxima: Paper white with crimson markings in center. Large rose type flowers with long stems. Early.

No. 12E876. Karl Rosenfeld: A better quality red Peony than the older varieties. Pure, intense crimson. Valuable for cut flowers. Late.

No. 12E878. Mons. Jules Elie: Glossy lilac-pink shading to rose and overlaid with a sheen of silver. Bomb type, early mid-season.

CREPE MYRTLES

For Gardens in the South

The glory of the Southern garden. They grow to great heights and increase in beauty with the years. Supplied in the old reliable soft rose color. Well branched plants with good roots. 18 to 24 in. plants. Not hardy in the North.

Cat. No. 12E428 70c Each 3 for \$1.90

HANSEN'S BUSH CHERRY

Besides being very effective in any landscape planting, this shrub also produces delicious fruit. Perfectly hardy and usually bears fruit the year after planting. 2 to 3 ft. plants.

Cat. No. 12E446 43c Each 3 for \$1.19

MAY DAY TREE

So called because it blooms in April or early May. Flowers are pure white borne in clusters resembling lilacs and are followed by small edible fruits. Strong 3 to 4 ft. plants.

Cat. No. 12E447 53c Each 3 for \$1.49

PINK FLOWERING CHERRY

Considered by many to be the most beautiful flowering tree. Covered in Spring with exquisite pearly pink flowers. The large planting at Washington, D. C. is well known for its beauty. Perfectly hardy. 3 to 4 ft. trees.

Cat. No. 12E623 \$1.24 Each 3 for \$3.42

BARGAINS in SEEDLING EVERGREENS

EVERGREEN SEEDLING COLLECTION

These seedlings with proper care will develop into nice trees. They are 2 years old, 3 to 6 in. high. Each collection contains 10 Colo. Blue Spruce, 10 Norway Spruce, 10 Ponderosa Pine, 10 Am. Arbor Vitae and directions for planting.

Cat. No. 12E579—Postpaid.
40 Evergreen Seedlings..... \$1.10

SEEDLING DOORWAY PLANTING

A doorway planting of six evergreens. Two Pyramidal Arbor Vitae for background, two Pfitzer Junipers for intermediate and two Mugho Pines for foreground; this allows one of each for both sides of the entrance. All are strong transplanted stock 4 to 6 inches and with a little care will develop into nice specimens in a year or so.

Cat. No. 12E570—Postpaid.
Doorway Planting, 6 Evergreens..... \$1.59

CUSHION "MUMS"

The plants are a blanket of delicate flowers from August to late fall. One of the most popular and showy perennials. Your choice of 3 colors. Postpaid.

No. 12E836 Pink 27c Each 3 for 72c
No. 12E834 Yellow
No. 12E835 Red

DOUBLE MOCK ORANGE

(Philadelphus Virginal)

A moderately tall compact grower. Has good foliage and is a persistent bloomer. The snow white, double or semi-double flowers are large, handsome and sweetly fragrant. 18 to 24 in. plants.

Cat. No. 12E437 57c Each 3 for \$1.62 Postpaid

HARDY PERENNIALS

No. 12E826. Columbine (Aquilegia): A profusion of long-spurred flowers in shades of blue, yellow, pink and rose. 12 to 18 in.

No. 12E805. Delphinium (Hardy Larkspur): Immense spikes of handsome thickly set flowers varying from pale to darkest blue. Spikes reach a height of 3 to 4 ft. and are fine for cutting.

No. 12E816. Hibiscus (Mallow Marvel): Hardy, giant-flowering Marshmallows. Rich, gorgeous, free-blooming and hardy. Color ranges from white to deep red. Grows 3 to 4 ft.

No. 12E824. Red Carnation: Large, rich deep red flowers with a spicy fragrance. Blooms profusely from June to late fall.

Your Choice of Above

17c Each; 3 for 46c, Prepaid

BLEEDING HEART

(Dicentra Spectabilis)

The numerous rosy red, heart shaped flowers on graceful stems give the flash of color and beauty to your planting in early spring. One of the oldest garden flowers and still popular. Grows to about 2 ft.

Cat. No. 12E825 30c Each 3 for 84c Postpaid

FANCY EVERGREEN SEEDLINGS

Some of my customers have requested that I list small fancy evergreens that they could buy at a reasonable price and grow for a year or so before setting out. Well, here are some that will make nice plantings. All are strong stock and have been transplanted once or more to make good root systems. Prepaid.

MY **RIO RANGE**

Quality You Can't Match for Less Than \$35!

The RIO is such a *stand-out value* in the low-price class because it has most of the quality and most of the efficiency of larger ranges—compactly built into a small-kitchen range. It is well constructed in every detail, and provides operating economy that larger ranges cannot equal. The RIO is a good cooker and baker and will give many years of service! It is very economical to operate.

Read Specifications—See What You Can Save

The body, oven and base strips are made of steel. The top, oven door frame, fire and ash door frame and doors, draft slide and legs are cast iron. Body is black with White Porcelain Enameled Panels as illustrated. Polished cooking top contains four 7-inch lids and push-pull type damper for regulating heat. Cast iron firebox has dumping grates for wood and soft coal. Takes 17-inch wood with end liners removed. Has 6-inch pipe collar. Galvanized reservoir holds 18 quarts.

MEASUREMENTS: Top with end shelf 28½"x18½"; with reservoir 37"x18½"; height 27½". Height with high shelf 44½", with warming closet 55". Floor space with end shelf 28½"x24", with reservoir 37"x24". Oven measures 13½" wide, 16½" deep, 9" high. Firebox for coal 13½" long, 7" wide, 6" deep.

E-CONO-ME

Ruggedly Built Cast Iron Range. A Good Cooker and Baker at Rock-Bottom Price!

When you can buy a heavy rugged Cast-Iron Range, built to give you efficient and economical cooking and baking results and almost a lifetime of service for such low prices as you find here on the Jim Brown E-Cono-Me . . . You're Saving Money!

Body design is smooth and neat. Finished in jet black with white porcelain enameled splasher back and white enameled panels on reservoir, oven door and warming closet.

Low Priced—But Built to Last a Long Time

Constructed with heavy castings thruout; has many features of higher priced ranges such as a roomy warming closet, good capacity reservoir, hearth, a six lid cooking top with pouch feed and ample size self-insulating cast iron oven and above all—Compactness.

The cooking-top contains four 8-inch and two 5-inch lids and has pouch feed. Oven door has a non-hot handle and operates with a spring control. When door is open it forms a solid shelf and when closed is firmly held by two sturdy hinges. Firebox has cast iron linings and flat dumping grate for burning wood and soft coal. Pipe collar 7-inch. Galvanized reservoir holds 20 quarts. Hot Water Front can be furnished for \$5.00 extra, IF SPECIFIED ON ORDER.

Tea Shelf Model

With Warming Closet and End Shelf

EBONY

Heavy Cast Iron—Has Many Features of Higher-Priced Ranges, Plus Compact Size

The EBONY combines most of the good features of larger ranges with the low fuel consumption of smaller ranges. It is a splendid value at my Prepaid Price! In material, workmanship and design it is unequalled by many ranges which would cost one-third more! And your family will compliment you on the delicious meals you will be able to prepare with your new EBONY.

Rugged Construction—Very Efficient Design

Here is a range which will give you years of economical cooking and baking satisfaction. The first cost is low, fuel consumption will be low and, with ordinary care, upkeep will be practically nothing because sturdy cast iron does not wear out. Hundreds of my customers who are using the Ebony Range have proven to their own satisfaction that it saves them money on fuel and pays extra dividends. Why not obtain all of these advantages for yourself and your family now? My price makes it easy.

The jet black body is smooth and streamlined. Has pouch feed, slide draft, sliding damper and accurate thermometer in oven door. Cooking Top has four 8-inch lids and two 5-inch lids. Oven Door has a strong spring control and a graceful horizontal handle. Handy clean-out door is below oven door. Oven is made of sturdy cast iron and does an excellent job of baking. Firebox has heavy cast iron linings all around and a flat dumping grate for burning wood and soft coal. Galvanized Reservoir holds 20 quarts. Hot Water Front can be furnished for \$5.00 extra, IF SPECIFIED WITH ORDER. For Easy Terms, see Page 2.

THRIFTY

A Sensational New Cast Iron Range at a Sensationally Low Bargain Price!

Everybody likes to eat good food, properly cooked, and enjoyment is increased when you can do so and still save money. The "THRIFTY" Cast Iron Range helps you to economize by providing plenty of real cooking heat at lower fuel cost. It gives you the kind of heat that roasts or bakes your meats and pastries evenly without wasting your coal or wood.

The cooking top is heavy cast-iron, is jet black, and has six 8-inch lids. This range is equipped with one non-scorch lid and one sectional lid. The front keyplate with these two lids lifts up for refueling by merely pushing up lever at left-rear corner of range. These are features generally obtainable only on higher priced ranges. The panels and splashers-back are finished in beautiful white porcelain enamel, while the body is plain black. Oven is made of self-insulating cast-iron and bakes or roasts with splendid results. Oven door is equipped with a heat indicator, and a sliding damper enables you to control the temperature. Firebox has one piece porcupine fireback and the heavy end linings are easily removed when you burn wood. Equipped with Duplex Grates for burning soft coal or wood.

With Warming Closet and End Shelf

Generous Specifications

Good workmanship thruout. Top with end shelf 32 $\frac{3}{4}$ x 22 inches, with reservoir 39x22 inches; height 30 $\frac{1}{4}$ inches. Height with warming closet 60 $\frac{3}{4}$ inches. Floor space with end shelf 35x28 inches, with reservoir 41x28 inches. Oven 16x16x10 inches. Firebox for coal 14x8 $\frac{1}{2}$ x9 $\frac{3}{4}$ inches, takes 18 inch wood with end linings removed. Pipe Collar is 7 inches. Galvanized Reservoir holds 18 qts. A $\frac{1}{2}$ inch Hot Water Coil can be supplied for \$3.00 extra, IF SPECIFIED WITH ORDER. See Page 2 for Easy Payment Terms.

PARADISE

Extra Heavy Cast Iron Construction Has a Large, Quick-Heating Cooking Top

A beautiful and efficient range constructed of heavy cast-iron. All parts are carefully fitted to produce a steady and even distribution of heat. The full size jet black, quick-heating cooking top has six 8-inch lids. (Note this range has one sectional lid and one non-scorch lid.) Pouch feed allows for refueling without removing cooking utensils. Is furnished in two large capacity oven sizes.

Neat in appearance—a modern and beautifully designed Kitchen Range in every respect. Note the straight line at bottom running from end to end including reservoir. Not only is the Paradise efficient but it is conservative in style. Oven is made of self-insulating cast-iron with corrugated bottom. Sliding damper enables you to regulate heat. Tight-fitting oven door has heat indicator. Firebox has heavy sectional fireback and end linings. Duplex grates for soft coal and wood are regular equipment. Dock ash grates for hard coal can be supplied instead of duplex grates, at no extra cost, IF SPECIFIED WITH ORDER. Galvanized Reservoir holds 20 quarts. Hot Water Front can be furnished for \$5.00 extra, IF SPECIFIED WITH ORDER.

Check the High-Quality Specifications Below

With Warming Closet and End Shelf

Paradise Ranges are built in 2 sizes, with oven 16 inches or 18 inches wide. Both size ranges have 7-inch pipe collar, cooking top 31 inches high, warming closet 61 $\frac{1}{2}$ inches high, high shelf 52 $\frac{1}{2}$ inches high, firebox for coal 15 $\frac{1}{2}$ x9 $\frac{1}{2}$ x8 $\frac{1}{2}$ inches and will take 18-inch wood when end linings are removed. Following measurements are for smaller range first and larger range next. Oven: 16x17x11 inches; 18x17x11 inches. Cooking Top with end shelf: 35x24 inches; 37x24 inches. Cooking Top with reservoir: 40 $\frac{1}{2}$ x24 inches; 42 $\frac{1}{2}$ x24 inches. Floor space with end shelf: 36 $\frac{1}{2}$ x30 inches; 38 $\frac{1}{2}$ x30 inches. Floor space with reservoir: 43 $\frac{1}{2}$ x30 inches; 45 $\frac{1}{2}$ x30 inches.

Jim Brown's PARAGON Balanced Cast Iron and Copper Steel Range will add to the beauty of ANY kitchen—to look at it you'd think it cost about DOUBLE my low price! But fine appearance is just a part of the Big Value Story behind this beautiful range.

The clean, modern lines of the Paragon will never go out of date . . . it has the type of beauty that endures, and it is built to fill your every cooking and baking need throughout the years.

Quality Construction as Well as Lasting Beauty

Rust-Resisting Copper-Steel is used in the frame and body of the Paragon, where strength is most essential. . . . Heavy Cast Iron is used for the cooking top, fire box and grates and to reinforce the quick-heating steel oven. The oven is built from one-piece 20-gauge sheet steel, with asbestos insulation between the double top-walls. The oven door is insulated with rock wool to conserve heat and has an easily adjusted spring arrangement entirely out of the heat zone on back of the range. The door has sturdy hinges and forms a solid shelf when open.

The fire box has heavy cast linings, one-piece fire-back, reversible duplex grates for burning either wood or soft coal; there is an extension to allow using extra long sticks of wood. Dock Ash Grates for burning hard coal can be supplied instead of Duplex Grates, at no extra cost, IF SPECIFIED ON YOUR ORDER; and a 1/2-inch Hot Water Coil can be supplied for only \$3.00 extra if Specified On Order. Check the Features at left and Measurements below.

MEASUREMENTS: Floor space 41 1/2 x 28 inches. Cooking top including pouch feed and reservoir 40 1/2 x 21 inches; 30 inches high. Overall Height with warming closet 58 1/2 inches. Overall Height with high shelf 50 1/2 inches. Firebox for coal 16 1/4 x 6 1/4 x 7 1/4 inches for burning wood with end linings removed 20 inches. Oven is 17 inches wide, 18 inches deep and 10 1/2 inches high. Pipe collar is 6 inch size.

MY LARGEST and FINEST KITCHEN RANGE
Two Styles in Each of the Two Beautiful Models

Whichever one of these ranges you select, you will find that it is not only a leader in style and beauty but it is an excellent cooker and baker as well. You will be as well pleased with the meals which you prepare with this range as you will be with its neat appearance.

HEAVY CAST IRON FOR LONG LIFE

The main body and cooking top are made of extra heavy weight cast iron to insure years of satisfactory service. **Cooking Top** is heavy cast iron (jet black finish on the semi-enameled style and polished on the full enameled style) and has six 8-inch lids (one sectional and one non-scorch). Sliding damper regulates oven heat and heat

indicator registers correct temperature. Counter-weighted clean-out door is below oven. **RESERVOIR TANK** is heavy COPPER and holds 28 quarts. Hot Water Front furnished at \$5.00 extra, IF SPECIFIED WITH ORDER. Finish is White Porcelain Enamel, except the steel cabinet base which has a special Baked-On Enamel finish to match body of range, and plain black finish as shown.

MEASUREMENTS: (Following measurements are common for both size ranges.) Height Warming Closet 61½ inches; Height High Shelf 51¾ inches; Height Cooking Top 31 inches; Firebox 15¾x9½x8½ inches; Length for wood with end linings removed 18 inches; Pipe Collar 7 inches. (Following measurements are for small range first and larger range next.) Oven 16 inches wide x 17 inches deep x 11 inches high; 18 inches wide x 17 inches deep x 11 inches high. Floor Space 43x30 inches; 45x30 inches. Cooking Top including reservoir 40½x24 inches; 42½x24 inches.

Extra Heavy Firebox

The firebox has sectional removable linings, and Duplex Grates for soft coal and wood. Dock Ash Grates for hard coal can be supplied instead of duplex grates, at no extra cost, IF SPECIFIED WITH ORDER. Notice the convenient lift-up pouch feed door.

Big Insulated Oven

The bottom of the self-insulating cast iron oven is corrugated to prevent warping and to give a greater radiating surface. Oven rack is removable. The counter-weighted clean-out door is located directly below the oven. Ample flues assure quick heat and even baking.

High Shelf Style

EXTRA FINE—EXTRA HEAVY CONSTRUCTION ON ALL MODELS

OIL RANGES and STOVES

This Range Has a Concealed Fuel Tank

One-Gallon Metal Oil Tank. Swings Out for Easy Filling. Leg Levelers and a Spirit Level on Oil Line makes it easy to level up range.

AUTOMATIC WICKLESS OIL RANGE

- Fully Enclosed Body.
- Beautifully Enameled Finish.
- Full Size High Oven.
- Efficient Blue Flame Burners.

\$38⁶²
Freight Prepaid

This range has the most desirable up-to-date features and will give you long, satisfactory service. I know you will be pleased with its excellent cooking and baking results. It burns low-priced clear kerosene oil for fuel.

Big Cooking Top has double grates which give double cooking space. The front holes receive the concentrated heat while the back holes are for simmering. The five full-size burners have heat-resisting silicon steel tubes and produce an intense blue flame.

The large oven has aluminized steel linings and an accurate heat indicator. Oven door and oven size are white porcelain enameled. Burner drums are black porcelain enameled. Balance is finished in black and white baked-on enamel as shown. Handles are chrome and bakelite.

Measurements: Overall—46½ inches long, 29¾ inches wide and 47 inches high. Cooking Top—26½ inches long, 21¾ inches wide and 32½ inches high. Oven—16 inches wide, 19 inches deep and 14 inches high.

Catalog No. 6E710—5-Burner Oil Range.

White Baked-On Enamel Finish 3-BURNER CABINET MODEL

\$20¹⁵
Freight Prepaid

Notice the graceful lines and the smooth well-rounded corners of this beautiful stove! The three large automatic wickless burners contain rust-resisting silicon steel tubes. The grates are cast-iron and the 3½-quart concealed fuel tank can be filled without moving the stove. The spacious utensil compartment with double doors will solve the problem of extra space for your pots and pans. Patented levelers attached to the bottom of the legs permit the stove to stand level and firm. Spirit level enables you to tell when the pipe line is level, thus permitting a free flow of oil at all times. The 5-inch Splasher Back keeps your wall from becoming soiled.

MEASUREMENTS: Overall—34 inches long, 17 inches wide and 38 inches high; Cooking Top—34 inches long, 17 inches wide and 33 inches high; Utensil Space—27½ inches long, 9½ inches wide and 13 inches high.

Silver Flash WASHER

No Electricity Required

Your opportunity to end wash-day drudgery and to save time and money with the amazing Jim Brown SILVER FLASH WASHER! Washes a tubful of the dirtiest clothes clean in 5 minutes. The soapy water will do the job as it swirls and sweeps through every fiber. Just swing the compensating lever back and forth, a simple operation even for a child, and see your clothes come out of the SILVER FLASH tub, washed to perfection. You can wash heavy blankets or dainty lingerie without harm. The SILVER FLASH is built to lighten work—built to do a perfect job of washing with ease and speed. It will completely change your ideas about washing clothes. There are no cogs, no gears, no shaft or motor. The 19 gallon tub is galvanized, double seamed, reinforced at top and guaranteed leak-proof. Legs are heavy angle iron, cross braced, with easy-slide feet. Easy draining faucet is threaded for attaching hose if desired. (No hose furnished.) Outside of tub is finished in beautiful green. Top, handle and legs are green.

FAMOUS SURGE ACTION TAKES DRUDGERY OUT OF WASHING

Swirling, surging suds in a half dozen strokes with this amazing washer! The agitator plate (illustrated at the right) swings back and forth, working up a tubful of suds that swirls through the clothes, removing dirt at each movement of the lever. The agitator arm is pivoted so that this action, aided by gravity, makes washing easy.

FINEST GRAIN LEATHER UPPERS

This Super-Tanned Re-tan Leather is made of selected cuts from selected hides where the fibre is tough-grained, yet soft and pliable. This costlier leather and finer tanning process gives you a shoe that will resist those rotting barnyard acids and minimize the destructive action of water... leather which contains far more fats and greases which are its very life! You'll be repaid over and over by the greater comfort, finer appearance and longer service.

**Genuine Goodyear Welt
Construction—the Best!**

You can't beat Genuine Goodyear Welt Construction in men's shoes. It leaves the flexible grain leather insoles absolutely smooth and free from irritating tacks or stitches.

Built on a medium wide last, the same as many use for dress as well as for work. Furnished in either Black or Tan.

Men's sizes: 6, 6½, 7, 7½, 8, 8½, 9, 9½, 10, 10½, 11, 12. State Size. See Page 131 for How to Measure for Size.

Jim Brown's EXTRA MILEAGE Work Shoe

If you are looking for something out-of-the-ordinary—something SPECIAL in the way of Supreme Service in a Heavy Duty Work Shoe, then, I know you will surely be interested in my new OLD HICKORY. I believe it is the finest and most rugged work shoe made for the money. Has outstanding features of construction which will assure you the maximum amount of genuine service.

Giant Triple Sole Construction—Barnyard-Proof Uppers!

Look at that sole construction on my Old Hickory Work Shoe! Think of it—the sole of this shoe, including the water-resisting leather caulk welt, is actually $\frac{3}{4}$ -inch thick! I call it my "Old-Hickory" because it is just as tough as Hickory Wood and I call it my Extra Mileage Shoe because it is the most wear-resisting work shoe that I know of. Uppers are made from Genuine Retan acid-resisting, water-resisting, cowhide leather with tan top binding. Leather lined counter pocket. Drill lined vamp. Cord heel. Munson last. Wide Width. Men's sizes: 6, 6½, 7, 7½, 8, 8½, 9, 9½, 10, 10½, 11 and 12. State size. See page 131 for How to Measure for Size. No. 18E7—Pair, Postpaid.....**\$3.09**

**BARNYARD
PROOF
UPPERS!**

My Sturdy "Dreadnaught" is one of the best Farm Shoe Values that I know of. Wear them for any work around the farm. Their double-tanned uppers resist barnyard acids and the extra heavy, triple thick soles and other sturdy features make them wear longer. Try a pair and you'll find they outwear any ordinary shoes you ever bought at this price!

Super-Service Soles—Steel Rimmed Heels

Have Black Double Tanned, Acid-Resisting Leather uppers famous for durability and comfort. Extra Heavy long-wearing rubber sole is ½ inch thick. Steel rimmed rubber heels. Moulded rubber caulk welt keeps out moisture. Leather counter pocket. Lined Vamps are riveted and triple-stitched. Gusset tongue excludes dirt and dust. Nickel hooks and eyelets. Plain toe Blucher Style. Wide widths. Men's sizes: 6, 6½, 7, 7½, 8, 8½, 9, 9½, 10, 10½, 11 and 12. State size. See Page 131 for instructions for measuring for size.

\$2.10
Pair Postpaid

Long wearing, composition outsole. Full-length Oak Leather Midsole keeps out moisture!

This shoe has been made for folks who have to watch their pennies. Sold at a remarkably low price but NOT cheaply built! I think you would have to pay at least 50c to \$1.00 more per pair than my price, even if you could get these shoes at some special sale.

Has durable, double-tanned Cowhide, barnyard acid resisting heavy black leather uppers and long wearing composition outsoles. Grain leather insoles and midsoles. Nailed and sewed construction for extra wear. Riveted vamp for extra strength. 13-Nail Rubber Heel. Nickel hooks and eyelets. Wide widths. Men's sizes: 6, 6½, 7, 7½, 8, 8½, 9, 9½, 10, 10½, 11 and 12. State Size. See How To Measure, Page 131.

Leather Midsole Makes
Re-soling Easy

Quality Features and a Bargain Price

Farmers who demand a long-wearing Work Shoe at a reasonable price will agree that here is the answer. Try one pair and you will KNOW that here is Sensational Value at an amazing LOW PRICE.

Black Cowhide Leather Uppers are Double-Tanned to resist Barnyard acids. The Cord Soles and Heels are built with many cords of long-staple, high-tensile cotton thoroughly mixed with tenacious friction rubber. Skid-proof for safety in water and oil. And they wear like iron!

Leather Mid-Sole keeps out moisture and makes re-soling easy. Flexible inner-sole keeps shoe in shape for comfort and fit. Triple-stitched and double-riveted vamps! Leather counter pockets and sturdy counters! Half gusset tongue keeps out dirt and chaff. Hooks and eyelets make lacing quick and easy. Strong nailed and sewed construction. Wide Width. Men's Sizes: 6, 6½, 7, 7½, 8, 8½, 9, 9½, 10, 10½, 11 and 12. State Size. See page 131 for instructions for measuring for size.

Steel
Arch

High
Shoe or
Oxford

Today, more than ever before, men are giving more attention to their health—from their feet up. "Walk to health" is a popular phrase and to do so, comfortable shoes are a vital necessity.

Jim Brown's Kangaroo Shoes are made with the stabilizer pegged shank construction which makes a rigid arch, which, with the steel shank, holds together the natural mold of the feet, preventing weakening of bone structures and protecting nerve centers. See what a difference this added support makes by wearing Jim Brown Kangaroo Shoes.

Genuine Goodyear Welt Construction Blucher style with Beaded Box Tip. Bright natural finish uppers—hold their shape and polish! Full drill lined. Smooth Sanded Leather Innersoles. Lined tongue. On Purchases Over \$250.00 Write for Terms

HOW TO TAKE MEASUREMENTS FOR CLOTHING

Many articles of clothing require us to have chest measurement in order to send you the correct size. In taking your chest measurement, measure over vest. Keep the measuring tape up under your arms and over the shoulderblade.

Inseam measurement should be taken from crotch, down inseam to the length desired. In taking waist measure, remove your belt. Hold tape snugly but do not pull tightly.

If you do not know exactly the neck size of your shirt, measure your neck at the collar-band. The number of inches is the size you require.

HOW TO MEASURE SHOE SIZE

Give us your regular shoe size if you know what it is. If you do not know what size you wear, and if you cannot decipher the marks on the inside of the shoes you are now wearing, send us a pencil outline of your left foot with shoe removed. Stand on a piece of plain paper, with your full weight on your left foot. Be sure to hold pencil straight up and down, and make sure that it touches the foot all the way around when drawing outline. If the pencil point is extended too far away from your foot you will get shoes too large for you. If the pencil point is run underneath the foot, you are likely to get shoes too small for you. So, be sure to hold the pencil so that the point makes an accurate outline of the exact shape of your foot. Be sure to remove shoes when making this outline.

Look at the Formula! Look at the Price!
**CONVINCE YOURSELF THAT THIS IS THE
WORLD'S GREATEST PAINT VALUE!**

Jim Brown's

100% HOUSE PAINT

The Best You Can Buy—As Low As

\$2.69
Per
Gallon

You can pay much more for many house paints—but you cannot buy better or purer paint at any price! Two coats of 100% House Paint will give the greatest paint protection you can put on wood. So when you can't get better Quality, when you can't get better Coverage or Hiding Power, when you can't get better Appearance . . . WHY PAY MORE?

I Ask YOU To Be The Judge!

Forget the low price when you compare the Quality of my 100% House Paint. I claim that 100% House Paint is equal to, or better than, any other House Paint made, regardless of name or price, and as proof I ask that you compare my Formula with that of any other paint on the market. THAT tells you the story of Quality!

Lead—Zinc—Titanium—Linseed Oil

The pigment consists of 58% Pure White Lead for durability and even weathering; of 24.9% Zinc Oxide to make the surface harder and more resistant to dirt; of 17.1% Titanium Magnesium for greater hiding power and clearer colors. This is considered a PERFECT balance of pigment and conforms to Federal Specifications TT-P-101A for this type of paint.

The vehicle or liquid consists of 90% Pure Linseed Oil, and 10% Thinner and Drier. From every standpoint my 100% House Paint is an ideal paint, as any good painter or your State Chemist will tell you.

Gallon Covers 400 Sq. Ft. 2 Coats

100% House Paint is so thick, heavy and full-bodied that 2 coats cover better than 3, or 4 coats of some cheap paints. One coat completely hides most colors.

MY GUARANTEE CAN'T BE STRONGER!

I Guarantee that you will be completely satisfied with my 100% House Paint, provided you follow directions in applying it. After completing your painting, if you are not delighted with the results, I will refund your money or replace the paint free. If you do not get the number of years service you have a right to expect from this paint, I will make an adjustment that will make up for the difference.

JIM BROWN

**THE BROWN FENCE & WIRE CO. CLEVELAND, OHIO
MEMPHIS, TENN.**

Uncle Sam Says:

"RAISE MORE HOGS"

Millions of people of other nations are going on short rations this year—unless American farm production is GREATLY increased! Stock raisers can help, and will be well paid for helping. ONE BILLION FIVE HUNDRED MILLION POUNDS of Pork and Lard have been promised to Great Britain alone! And that's just a start. How many hogs are YOU raising?

Jim Brown Says: **LOOK AT MY
BARB
BOTTOM HOG FENCE
SPECIALS for 1942!**

Believe that this Special Barb Bottom Fence is the best ever for holding hogs. It's close-spaced at the bottom, hog-tight 'g-tight! Hogs don't like this fence, because it has a barb wire woven right into the fence, with barbs spaced only 3 inches apart. This barb bottom wire sure discourages rooting—just sample' of the sharp-pointed barbs usually makes hogs decide where they are.

All of the fences listed below are made in the famous Hinge Joint

style and built from Copper-Steel with Hi-Test Pure Zinc Galvanizing. This kind of fence has been famous for years for extra resistance to rust and corrosion, and for its longer life. Barb Bottom Hog Fence is made in 3 heights and weights, so that you can select exactly the kind you require to best fill your needs. Close spacing of line wires is shown on the drawing above. My Direct-From-Factory prices offer you a big saving and I still have a generous stock of this fence on hand—but order NOW.

FREIGHT IS PREPAID ON ORDERS OF \$10.00 OR MORE.
